in England about 1721; was second son from statements in official despatches, he of Viscount Gage; entered the army in believed there was an "actual and open

Bank of Chicago. He was the first presi- defeat on the Monongahela, when he was dent of the board of directors of the lieutenant-colonel; and led the advance. In that hot encounter he was wounded. Late in 1758 he married a daughter of Peter Kemble, president of the council of New Jersey. Gage served under Amherst in northern New York and Canada, and on the capture of Montreal by the English in 1760 he was made military governor of that city. He was promoted to major-general, and in 1763 succeeded Amherst as commander-in-chief of the British forces in North America. In 1774 he succeeded Hutchinson as governor of Massachusetts, and occupied Boston with troops, much to the annoyance and irritation of the inhabitants. Acting under instructions from his government rather than in accordance with his conscience and judgment, he took measures which brought on armed resistance to British rule in the colonies. When his demand for 20,000 armed men at Boston was received by the ministry they laughed in derision, believing that a few soldiers could accomplish all that was necessary to make the patriots cower.

Lord Dartmouth wrote to Gage, in the King's name, that the disturbers of the peace in Boston appeared to him like a rude rabble "without a plan, without World's Columbian Exposition; served concert, and without conduct," and three times as president of the American thought a small force would be able to Bankers' Association; first president of encounter them. were keenly watched. "Your chief de- they do now. I think it is my duty to let your lordship know the true situation of affairs." Franklin wrote to his English friends, "Americans will fight; England has lost her colonies forever.'

Gage, performing no act of courage during the summer of 1775, while Washington was besieging Boston, endeavored to terrify the Americans and to keep up the spirits of his own soldiers by warning the former that thousands of veteran warriors were coming from Russia and the German principalities to crush the "unnatural rebellion." He vented his ill humor upon American prisoners in his hands, casting into prison officers of high rank, thinking thus to terrify the common soldiery, whose intelligence and courage he entirely underrated in reality, though praising them when it suited his purpose. Against this treatment Washington remonstrated; but Gage insolently scorned to promise "reciprocity with rebels," and replied: "Britons, ever pre-eminent in mercy, have overlooked the criminal in the captive; your prisoners, whose lives, by the laws of the land, are destined to the cord, have hitherto been treated with care and kindness-indiscriminately, it is true, for I acknowledge no rank that is not derived from the King." Washington remembered that Gage's want of presence of mind had lost the battle of the Monongahela and affect sir, to despise all rank not derived from the same source as your own. GAILLARDET-GAINES

Gaillardet, Theodore Frederic, journalist; born in Auxerre, France, April 7, 1808; emigrated to the United States and established the Courrier des Etats-Unis in New York; took part in the Presidential canvass of 1872 on behalf of Horace Greeley. He is the author of Profession de foi et considérations sur le système républicain des Etats-Unis, and of a large number of communications on American subjects which appeared in the leading French newspapers. He died in Plessy-Bouchard, France, Aug. 12, 1882.

Gaine, Hugh, journalist; bern in Ireland in 1726; emigrated to America and became a printer in New York City in 1750; established The Mercury in 1752, originally a Whig journal. After the capture of New York by the English, The Mercury was a strong advocate of the British. Upon the conclusion of the Revolutionary War he was permitted to remain in New York, but was obliged to give up the publication of his newspaper. He died in New York City, April 25, 1807.

Gaines, EDMUND PENDLETON, military his general good services during the war, officer; born in Culpeper county, Va., March 20, 1777; removed with his family

The opponents of Jefferson's administration complained vehemently, in 1808, that the country was threatened with direct taxation at a time when the sources of its wealth, by the orders and decrees of Great Britain and France, were drying president of the American Ethnological by reproducing a flattering but delusive York Historical Society from 1843 until suggestion contained in his annual report the preceding year. He suggested that, as the United States were not likely to be involved in frequent wars, a revenue progress of the country, and wrote much derived solely from duties on imports, even though liable to diminution during war, would yet amply suffice to pay off, philosophical characteristics of the North during long intervals of peace, the expenses of such wars as might be under- Humboldt. taken. Should the United States become involved in war with both France and Great Britain, no internal taxes would be graduated at Yale College in 1805, where necessary to carry it on, nor any other financial expedient, beyond borrowing dover Theological Seminary he prepared money and doubling the duties on imports. The scheme, afterwards tried, bore bitter

Gallatin's influence was felt in other departments of the government and in the politics of the country. Opposed to going to war with Great Britain in 1812, he exerted all his influence to avert it. In March, 1813, he was appointed one of the envoys to Russia to negotiate for the mediation of the Czar between the United States and Great Britain. He sailed for St. Petersburg, but the Senate, in special session, refused to ratify his appointment because he was Secretary of the Treasury. The attempt at mediation was unsuccess- Gallaudet published several works for the ain proposed a direct negotiation for peace, books. He was of Huguenot descent. Gallatin, who was still abroad, was ap- His two sons, Thomas and Edward Miner, pointed one of the United States commissioners to negotiate. He resigned his Secretaryship. In 1815 he was appointed minister to France, where he remained until 1823. He refused a seat in the cabinet of Monroe on his return, and declined to be a candidate for Vice-President, to which the dominant Democratic party nominated him. President Adams appointed him minister to Great Britain, TINE, clergyman; born in The Hague, Hol-

when President Jefferson appointed him where he negotiated several important United States in 1827, he took up his residence in the city of New York. There he was engaged in public services, in various ways, until 1839, when he withdrew from public duties and directed the remainder of his life to literary pursuits, especially in the field of history and ethnology. He was the chief founder (1842) and first Gallatin replied to these complaints Society, and was president of the New his death, in Astoria, N. Y., Aug. 12, 1849. Although strictly in private life, Mr. Gallatin took special interest in the on the subject. As early as 1823 he wrote an essay on the ethnological and American Indians, at the request of

Gallaudet, THOMAS HOPKINS, educator; born in Philadelphia, Pa., Dec. 10, 1787; he was a tutor for a while. At Anfor the ministry, and was licensed to preach in 1814. Becoming interested in the deaf and dumb, he began his labors for their instruction in 1817, with a class of seven pupils. He became one of the most useful men of his time, labored incessantly for the benefit of the deaf and dumb, and was the founder of the first institution in America for their instruction. He was president of it until 1830, when he resigned. The asylum was located at Hartford, where Dr. Gallaudet became chaplain for the Connecticut Retreat for the Insane in 1833, which office he retained until his death, Sept. 9, 1851. Dr. When, in January, 1814, Great Brit- instruction of the young, besides other also devoted their lives to the instruction of the deaf and dumb. The former, an Episcopal clergyman, was instrumental in organizing churches for the deaf and dumb; and the latter established in Washington, D. C., the National Deaf-Mute College, in 1864, of which he became president.

Gallitzin, PRINCE DEMETRIUS AUGUS-

GALLOWAY—GALVESTON

Russian ambassador. He belonged to one of the oldest and richest families among the Russian nobles. In 1792 he came to the United States for the purpose of travel, but determined to become a Roman Catholic priest. He entered the St. Sulpice Seminary in Baltimore, and was ordained a priest March 18, 1795, being the first priest who had both received holy orders and been ordained in the United States. He was sent on missions, but was recalled in consequence of his impetuosity and over-zeal. In 1799 he was appointed pastor at Maguire's settlement. He purchased 20,000 acres in the present Cambria county, Pa., which he divided into farms and offered to settlers on easy terms. Although constantly hampered by lack of money to carry out the grand schemes he contemplated, his colony took root and soon sent out branches. He had adopted the name of Schmettau, which was anglicized into Smith, but in 1811 he resumed his own name. He died in Loretto, Pa., May 6, 1841.

Galloway, Joseph, loyalist; born near West River, Anne Arundel co., Md., about 1730; was a member of the Pennsylvania Assembly in 1764, and at one time speaker and, with Franklin, advocated a change of the government of Pennsylvania from the proprietary to the royal form. A member of the first Continental Congress, he was conservative in his views, yet his line of argument in his first debates tended towards political independence. He proposed a plan of colonial government, which was rejected. It contemplated a government with a president-general appointed by the King, and a grand council, chosen every three years by the colonial assemblies, who were to be authorized to act jointly with Parliament in the regulation of the affairs of the colonies. Parliament was to have superior authority, with a right to revise all acts of the grand council, which, in turn, was to have a negative in British statutes relating to the colonies. This plan was, at first, favorably considrejected, and not permitted to be entered on the minutes of the journal.

ment. His conduct through the session, and property valued at \$30,000,000.

land, Dec. 22, 1770, where his father was viewed in the light of subsequent history, appears insincere and disingenuous. He was one of the most bitter Tories who misrepresented the colonies in England, to which he fled when his principles were discovered and denounced. He quailed before Samuel Adams, the stern Puritan and patriot, and cordially hated him be-"Though by no cause he feared him. means remarkable for brilliant abilities," wrote Galloway, "he is equal to most men in popular intrigue and the management of a faction. He eats little, drinks little, sleeps little, and thinks much; and is most decisive and indefatigable in the pursuit of his objects. He was the man who, by his superior application, managed at once the faction in Congress at Philadelphia and the factions in New England."

> After the question of independence began to be seriously agitated, Galloway abandoned the Whig, or republican, cause, and was thenceforward an uncompromising Tory. When the British army evacuated Philadelphia, in 1778, he left his country, with his daughter, went to England, and never returned. He died in Watford, Hertfordshire, Aug. 29, 1803.

> Gally, MERRITT, inventor; born near Rochester, N. Y., Aug. 15, 1838; learned the printer's trade; graduated at the University of Rochester in 1863, and at the Auburn Theological Seminary in 1866; was a Presbyterian minister for three years. In 1869 he founded a manufactory for the construction of the "Universal" printing-press, which he had shortly before designed. His patents aggregate more than 400, including the "Orchestrone," an automatic musical instrument; the back vent system, for tubular church organs; the counterpoise pneumatic system of the æolian, pianola, and other automatic musical instruments; a machine for making type from cold metal; differential telephone, etc.

Garcia, CALIXTO, military officer; born was appointed major of a New York regi- in Holguin, Cuba, Oct. 14, 1836. He ment in July, 1775, and in August joined studied law and began practice, but subsethe army, under Montgomery, that in- quently joined the struggling patriots in Cuba, and in 1868 (with Carlos Manuel Cespedes and Marmol) planned the revolution which is known historically as the "Ten Years' War." On Oct. 10, 1868, he took up arms with Marmol at the head of 150 men. For a time great success attended them, and they captured many towns. For courage and ability in these actions Garcia was made brigadier-general under Gomez. Later the provisional government made him commander-in-chief of the Cuban forces in place of Gomez, removed. On Sept. 3, 1873, his victorious career suffered a decided reverse. With twenty men he was attacked by 500 Spaniards at San Antonio del Babor. When commanded to surrender he determined to die by his own hand rather than submit to capture. Placing a revolver in his mouth he fired upward. The ball came out at his forehead, and he carried a scar for life. He was taken to Manzanillo in vaded Canada. He rose to colonel the his wounded condition, and when he renext year; and in April, 1777, he was covered was sent to Spain. parts of the civilized world. See Blaine, life has indicated the wisdom of the

President Garfield delivered the following people long ago made themselves safe inaugural address, in which he eloquently against danger from without and secured considered the condition of the country at for their mariners and flag equality of the turning of a century of its constitu- rights on all the seas. Under this Constitional existence:

Fellow-Citizens,—We stand to-day upon an eminence which overlooks 100 years of national life—a century crowded with perils, but crowned with the triumphs of liberty and law. Before continuing the onward march let us pause on this height for a moment to strengthen our faith and renew our hope by a glance at the pathway along which our people have travelled.

It is now three days more than 100 years since the adoption of the first written Constitution of the United States ---the Articles of Confederation and Perpetual Union. The new republic was then beset with danger on every hand. It had not conquered a place in the family of nations. The decisive battle of the war for independence, whose centennial anniversary will soon be gratefully celebrated at Yorktown, had not yet been The colonists were struggling not only against the armies of a great nation, but against the settled opinions of mankind; for the world did not then believe that the supreme authority of government could be safely intrusted to the guardianship of the people themselves.

We cannot overestimate the fervent love of liberty, the intelligent courage, and the sum of common-sense with which our fathers made the great experiment of selfgovernment. When they found, after a good government during the century, our short trial, that the confederacy of States people are determined to leave behind them was too weak to meet the necessities of a vigorous and expanding republic, they things which have been irrevocably setboldly set it aside, and in its stead estab- tled, and the further discussion of which upon the will of the people, endowed with full power of self-preservation and ample authority for the accomplishment of its laws should be no longer a subject of degreat object.

ple in all the better elements of national laws made in pursuance thereof are and

JAMES GILLESPIE; GUITEAU, CHARLES J. founders and given new hope to their de-Inaugural Address .- On March 4, 1881, scendants. Under this Constitution our tution twenty-five States have been added to the Union, with constitutions and laws, framed and enforced by their own citizens, to secure the manifold blessings of local self-government.

> The jurisdiction of this Constitution now covers an area fifty times greater than that of the original thirteen States and a population twenty times greater than that of 1780.

> The supreme trial of the Constitution came at last under the tremendous pressure of civil war. We ourselves are witnesses that the Union emerged from the blood and fire of that conflict purified and made stronger for all the beneficent purposes of good government.

> And now, at the close of this first century of growth, with the inspirations of its history in their hearts, our people have lately reviewed the condition of the nation, passed judgment upon the conduct and opinions of political parties, and have registered their will concerning the future administration of the government. To interpret and to execute that will in accordance with the Constitution is the paramount duty of the executive.

Even from this brief review it is manifest that the nation is resolutely facing to the front, resolved to employ its best energies in developing the great possibilities of the future. Sacredly preserving whatever has been gained to liberty and all those bitter controversies concerning lished a national union, founded directly can only stir up strife and delay the onward march.

The supremacy of the nation and its bate. That discussion, which for half a Under this Constitution the boundaries century threatened the existence of the of freedom have been enlarged, the foun- Union, was closed at last in the high court dations of order and peace have been of war by a decree from which there is no strengthened, and the growth of our peo- appeal—that the Constitution and the

They deserve the generous encouragement of all good men. far as my authority can lawfully extend, they shall enjoy the full and equal protection of the Constitution and the laws.

The free enjoyment of equal suffrage is still in question, and a frank statement of the issue may aid its solution. It is alleged that in many communities negro citizens are practically denied the freedom of the ballot. In so far as the truth of this allegation is admitted, it is answered that in many places honest local govstitution of 1787. No thoughtful man can ernment is impossible if the mass of uneducated negroes are allowed to vote. These are grave allegations. So far as the latter is true, it is the only palliation that can be offered for opposing the freedom of the ballot. Bad local government forces of our people. It has liberated the is certainly a great evil, which ought to be prevented; but to violate the freedom and lation which wronged and enfeebled both. sanctities of the suffrage is more than an evil. It is a crime which, if persisted in, people, and has opened to each one of cide is not a remedy. If in other lands them a career of freedom and usefulness. it be high treason to compass the death It has given new inspiration to the power of the king, it shall be counted no less a of self-help in both races by making labor crime here to strangle our sovereign power and stifle its voice.

Caron pushed northward and westward Lake Huron.

In 1635 the Jesuit missionaries founded the Mission St. Mary. In 1654 another priest had entered the wilderness of springs of Onondaga. In 1659-60 French traders and priests passed the winter on Lake Superior and established missions along its shores.

Among the earlier discoverers, no name shines out with more brilliancy than that of the Chevalier La Salle. The story of cal restraints to confront the dangers of port his discoveries. the New World, and to extend the empire of Louis XIV. From the best evidence accessible, it appears that he was the first white man that saw the Ohio River. At twenty-six years of age we find him with southward and westward through the winof the Ohio, probably the Alleghany. He followed it to the main stream, and descended that, until in the winter of 1669 and 1670 he reached the Falls of the Ohio, companions refusing to go farther, he returned to Quebec, and prepared for still greater undertakings.

In the mean time the Jesuit missionaries had been pushing their discoveries on the northern lake. In 1673 Joliet and Mar-

heights of Quebec, and to the rapids above the westward, and on the 16th of June Montreal, which were afterwards named reached the Mississippi near the spot La Chine, in derision of the belief that where now stands the city of Prairie du the adventurers were about to find China. Chien. To-morrow will be the 200th anni-In 1609 Champlain pushed above the versary of that discovery. One hundred rapids and discovered the beautiful lake and thirty-two years before that time De that bears his name. In 1615 Priest La Soto had seen the same river more than 1,000 miles below; but during that inthrough the wilderness and discovered terval it is not known that any white man had looked upon its waters.

Turning southward, these brave priests descended the great river, amid the awful solitudes. The stories of demons and northern New York and found the salt monsters of the wilderness which abounded among the Indian tribes did not deter them from pushing their discoveries. They continued their journey southward to the mouth of the Arkansas River, telling as best they could the story of the Cross to the wild tribes along the shores. Returning from the Kaskaskias, and his explorations can scarcely be equalled travelling thence to Lake Michigan, they in romantic interest by any of the stirring reached Green Bay at the end of Septemtales of the Crusaders. Born of a proud ber, 1673, having on their journey padand wealthy family in the north of France, dled their canoes more than 2,500 miles. he was destined for the service of the Marquette remained to establish missions church and of the Jesuit order. But his among the Indians, and to die, three years restless spirit, fired with the love of ad- later, on the western shore of Lake Michiventure, broke away from the ecclesiasti- gan, while Joliet returned to Quebec to re-

In the mean time Count Frontenac, a noble of France, had been made governor of Canada, and found in La Salle a fit counsellor and assistant in his schemes of discovery. La Salle was sent a small party, near the western extremity to France, to enlist the Court and the of Lake Ontario, boldly entering the do- ministers of Louis; and in 1677-78 remain of the dreaded Iroquois, travelling turned to Canada, with full power under Frontenac to carry forward his grand entry wilderness until he reached a branch terprises. He had developed three great purposes: first, to realize the old plan of Champlain, the finding of a pathway to China across the American continent; second, to occupy and develop the regions near the present site of Louisville. His of the northern lakes; and, third, to descend the Mississippi and establish a fortified post at its mouth, thus securing an outlet for the trade of the interior and checking the progress of Spain on the Gulf of Mexico.

In pursuance of this plan, we find La quette started from Green Bay, dragging Salle and his companions, in January, their canoes up the rapids of Fox River; 1679, dragging their cannon and macrossed Lake Winnebago; found Indian terials for ship-building around the Falls guides to conduct them to the waters of of Niagara, and laying the keel of a vesthe Wisconsin; descended that stream to sel 2 leagues above the cataract, at the

> Second.—The Struggle for National Dominion.

> I next invite your attention to the less

At the beginning of the eighteenth cen-

Besides the struggle for national pospowers of France and Spain.

Indeed, at an early date, by the bull of I will not follow further the career of Pope Alexander VI., all America had been the efforts of France and Spain were resisted only by the Protestants of the Atlantic coast.

The main chain of the Alleghanies was supposed to be impassable until 1714, when Governor Spotswood, of Virginia, led an expedition to discover a pass to the great valley beyond. He found one somewhere near the western boundary of Virginia, and by it descended to the Ohio. On his return he established the "Transmontane Order," or "Knights of the Golden Horse-shoe." On the sandy plains of eastern Virginia horse-shoes were rarely used, but, in climbing the mountains, he had found them necessary, and, on creating his companions knights of this new order, he gave to each a golden horseshoe, inscribed with the motto,

"Sic juvat transcendere montes."

He represented to the British ministry the great importance of planting settlements in the western valley; and, with the foresight of a statesman, pointed out the danger of allowing the French the undisputed possession of that rich region.

The progress of England had been slower, but more certain, than that of her great rival. While the French were establishing trading-posts at points widely remote from each other, along the lakes and the Mississippi, and in the wilderness of Ohio, Indiana, and Illinois, the English were slowly but firmly planting their settlements on the Atlantic slope, and preparing to contest for the rich prize of the great West. They possessed one great advantage over their French rivals. had cultivated the friendship of the Iroquois Confederacy, the most powerful combination of Indian tribes known to the New World. That confederacy held possession of the southern shores of lakes Ontario and Erie; and their hostility to the French had confined the settlements of that people mainly to the northern shores.

During the first half of the eighteenth century many treaties were made by the English with these confederated tribes, and some valuable grants of land were obtained on the eastern slope of the Mississippi Valley.

About the middle of that century the the night on the northwest bank."

wisdom of Governor Spotswood, and perceived that an empire was soon to be saved or lost.

In 1748 a company was organized by Thomas Lee and Lawrence and Augustine Washington, under the name of "The Ohio Company," and received a royal grant of 500,000 acres of land in the valley of the Ohio. In 1751 a British trading-post was established on the Big Miami; but in the following year it was destroyed by the French. Many similar efforts of the English colonists were resisted by the French; and during the years 1751-53 it became manifest that a great struggle was imminent between the French and the English for the possession of the West. British ministers were too much absorbed in intrigues at home to appreciate the importance of this contest; and they did but little more than to permit the colonies to protect their rights in the valley of the Ohio.

In 1753 the Ohio Company had opened a road, by "Will's Creek," into the western valley, and were preparing to locate their colony. At the same time the French had sent a force to occupy and hold the line of the Ohio. Ohio Company was under the especial protection of Virginia, the governor of that colony determined to send a messenger to the commander of the French forces and demand the reason for invading the British dominions. For this purpose he selected George Washington, then twenty-one years of age, who, with six assistants, set out from Williamsburg, Va., in the middle of November, for the waters of the Ohio and the lakes. After a journey of nine days through sleet and snow, he reached the Ohio, at the junction of the Alleghany and the Monongahela; and his quick eye seemed to foresee the destiny of the place. spent some time," said he, "in viewing the rivers. The land in the fork has the absolute command of both." On this spot Fort Pitt was afterwards built, and still later the city of Pittsburg.

As Bancroft has said, "After creating in imagination a fortress and city, his party swam across the Alleghany, and wrapped their blankets around them for British government began to recognize the ceeding down the Ohio to Logstown, he

Virginians planted settlements in Kentucky; and pioneers from all the colonies Alleghany to the Tennessee.

Third.—The War of the Revolution, and

"Thus," says Mr. its Relations to the West.

How came the thirteen colonies to posobject of their struggle was independence. not only was the independence of the Late in December Rogers returned to thirteen colonies conceded, but there was

granted to the new republic a western territory bounded by the northern lakes, the Mississippi, and the French and Spanish possessions.

How did these hills and valleys become a part of the United States? It is true that by virtue of royal charters several of the colonies set up claims extending to the "South Sea." The knowledge which the English possessed of the geography of this country at that time is illustrated by the fact that Capt. John Smith was commissioned to sail up the Chickahominy and find a passage to China! But the claims of the colonies were too vague annexed that country to the Old Donies had taken no such action in reference to the territory northwest of the Chio.

The cession of that great territory, under the treaty of 1783, was due mainly to the foresight, the courage, and the endurance of one man, who never received from his country any adequate recognition for his great service. That man was George Rogers Clark; and it is worth your while to consider the work he accomplished. Born in Virginia, he was in early life a surveyor, and afterwards served in Lord Dunmore's War. In 1776 he settled in Kentucky, and was, in fact, the founder of that commonwealth. As the war of the Revolution progressed, he saw that the pioneers west of the Alleghanies were threatened by two formidable dangers: first, by the Indians, many of whom had joined the standard of Great Britain; and, second, by the success of the war itself. For, should the colonies obtain their independence while the British held possession of the Mississippi Valley, the Alleghanies would be the western boundary of the new republic, and the pioneers of the West would remain subject to Great Britain.

Inspired by these views, he made two

with the importance of warding off these dangers, he appealed to the governor, Fatrick Henry, and received from him authority to enlist seven companies to go to Kentucky subject to his orders, and serve for three months after their arrival in the West. This was a public commission.

Another document, bearing date Williamsburg, Jan. 2, 1778, was a secret commission, which authorized him, in the name of Virginia, to capture the military posts held by the British in the Northwest. Armed with this authority, he proceeded to Pittsburg, where he obtained ammunito be of any consequence in determining tion and floated it down the river to Kenthe boundaries of the two governments. tucky, succeeded in enlisting seven com-Virginia had indeed extended her settle- panies of pioneers, and in the month of ments into the region south of the Ohio June, 1778, commenced his march through River, and during the Revolution had the untrodden wilderness to the region of the Illinois. In other words, George Rogers Clark conquered the Territory of the Northwest in the name of Virginia. and the flag of the republic covered it at the close of the war.

> In negotiating the treaty of peace at Paris, in 1783, the British commissioners insisted on the Ohio River as the northwestern boundary of the United States; and it was found that the only tenable ground on which the American commissioners relied, to sustain our claim to the Lakes and the Mississippi as the boundary, was the fact that George Rogers Clark had conquered the country, and Virginia was in undisputed possession of it at the cessation of hostilities.

In his Notes on the Early Settlement journeys to Virginia to represent the of the Northwest Territory, Judge Burcase to the authorities of that colony. net says, "That fact [the capture of the Failing to impress the House of Burgesses British posts] was confirmed and admit-

It is interesting to follow them on through Little Falls, and from the present thence down the Oswego to Lake Ontario, coasting along the lake to Niagara. After encountering innumerable hardships, the party reached Buffalo on June 17, where they met Red Jacket and the principal chiefs of the Six Nations, and on the 23d of that month completed a contract with those chiefs, by which they purchased all en the Reserve, for £500, New York cur-Indians, and two beef cattle and 100 gal-On Sept. 5, 1795, Connecticut executed lons of whiskey to the Eastern Indians, besides gifts and provisions to all of them.

Setting out from Buffalo on June 27, they coasted along the shore of the lake, some of the party in boats and others marching along the banks.

In the journal of Seth Pease, published in Whittlesey's History of Cleveland, I find the following:

"Monday, July 4, 1796.-We that came by land arrived at the confines of New Connecticut, and gave three cheers precisely at five o'clock P.M. We then proceeded to Conneaut, at five hours thirty minutes, our boats got on an hour after; we pitched our tents on the east side."

In the journal of General Cleaveland is

the following entry:

"On this Creek ('Conneaugh'), in New On the same day that the trust deed Connecticut Land, July 4, 1796, under General Moses Cleaveland, the surveyors and men sent by the Connecticut Land Company to survey and settle the Connecticut Reserve, were the first English people who took possession of it. . . .

women and children, fifty in number. The men, under Captain Tinker, ranged themselves on the beach and fired a federal salute of fifteen rounds, and then the sixteenth in honor of New Connecticut. Drank several toasts. . . . Closed with three cheers. Drank several pails of grog. Supped and retired in good order."

Three days afterwards General Cleaveland held a council with Paqua, chief of the Massasagas, whose village was at Conneaut Creek. The friendship of these Indians was purchased by a few trinkets and

\$25 worth of whiskey.

A cabin was erected on the bank of Conneaut Creek; and, in honor of the commissary of the expedition, was called "Stow Castle." At this time the white inhabitants west of the Genesee River and along the coasts of the lakes were as follows: the garrison at Niagara, two families at Lewiston, one at Buffalo, one at Cleveland, and one at Sandusky. There were no other families east of Detroit; ing, the interior of New Connecticut was a portion of the Western Reserve. an unbroken wilderness.

government had been established. there was but little of that lawlessness suance of which so often characterizes the people 22, 1800, Governor St. Clair institutions and opinions of Old Connecti- held at Warren, its county seat, cut in their new wilderness homes.

There are townships on this Western Reserve which are more thoroughly New England in character and spirit than most of the towns of the New England of today. Cut off as they were from the metropolitan life that had gradually been moulding and changing the spirit of New England, they preserved here in the wilderness the characteristics of New England, as it was when they left it at the beginning of the century. This has given to the people of the Western Reserve those strongly marked qualities which have always distinguished them.

For a long time it was difficult to ascertain the political and legal status of the settlers on the Reserve. The State of Connecticut did not assume jurisdiction over its people, because the State had parted with her claim to the soil.

By a proclamation of Governor St. Clair, in 1788, Washington county had been organized, having its limits extended westward to the Scioto and northward to the and, with the exception of a few advent- mouth of the Cuyahoga, with Marietta as urers at the Salt Springs of the Mahon- the county seat. ning of these settlements. the spirit and character of the pioneers of the Reserve. Here is a broad-axe brought from Connecticut by John Ford, father of the late governor of Ohio; and we are told that the first work done with this axe by that sturdy old pioneer, after he had finished a few cabins for the families that came with him, was to hew out the timbers for an academy, the Burton Academy, to which so many of our older men owe the foundation of their education, and from which sprang the Western Reserve College.

These pioneers knew well that the three great forces which constitute the strength and glory of a free government are the family, the school, and the church. These three they planted here, and they nourished and cherished them with an energy and devotion scarcely equalled in any other quarter of the world. On this height were planted in the wilderness the symbols of this trinity of powers; and here, let us hope, may be maintained forever the ancient faith of our fathers in of the Alps," in the Sardinian service an undimmed lustre.

If not, then summer, as freemen are? "If we prick our slaves will peradventure take us them, do they not bleed? If we tickle at our word and there will be given unto them, do they not laugh? If we poison them, do they not die? And if we wrong them, will they not be revenged?"

"For the slave-holders," we are told, "there is no peace, by night or by day; but every moment is a moment of alarm, and their enemies are of their own household." It is the hand of a friendly vindicator, moreover, that rolls up the curtain! What but the most atrocious tyranny on the part of the masters, and the most terrible sufferings on the part of the slaves, can account for such alarm, such insecurity, such apprehensions that "even a more horrible catastrophe" than that of arson and murder may transpire nightly? It requires all the villany that has ever been charged upon Southern oppressors, and all the wretchedness that has ever been ascribed to the oppressed, to work out so fearful a result—and that the statement is true, the most distinguished slave-holders have more than once certified. That it is true, the entire code of slave laws-whips and yokes and fetters—the nightly patrol—restriction of locomotion on the part of the slaves, ex-But, it seems, abolitionists have the cept with passes-muskets, pistols, and audacity to tell the slaves, not only of bowie-knives in the bed-chambers during

GARRISON, WILLIAM LLOYD

If it must be so, let the defenders of slavery still have all the brick-bats, bowie-knives, and pistols, which the land can furnish; but let us possess all the arguments, facts, warnings, and promises which insure the final triumph of our holy cause.

Nothing is easier than for the abolitionists, if they were so disposed, as it were in the twinkling of an eye, to "cry havoc and let slip the dogs of war," and fill this whole land with the horrors of a civil and servile commotion. It is only for them to hoist but one signal, to kindle but a single torch, to give but a single bugle-call, and the 3,000,000 of colored victims of oppression, both bond and free, would start up as one man, and make the American soil drunk with the blood of the slain. How fearful and tremendous is the power, for good and evil, thus Besides being lodged in their hands! stimulated by a desire to redress the wrongs of their enslaved countrymen, they could plead in extenuation of their conduct for resorting to arms (and their plea would be valid, according to the theory and practice of republicanism), that they had cruel wrongs of their own to avenge, and sacred rights to secure, inasmuch as they are thrust out beyond the pale of the Constitution, excluded from one-half of the Union by the fiat of the lynch code, deprived of the protection of the law, and branded as traitors, because they dare to assert that God wills all men to be free! Now, I frankly put it to the understandings of Southern men, whether, in view of these considerations, it is adding anything to their safety, or postponing the much-dreaded catastrophe a single hour — whether, in fact, it is not increasing their peril, and rendering an early explosion more probable-for them to persevere in aggravating the condition of their slaves, by tightening their chains and increasing the heavy burdens -or wreaking their malice upon the free people of color or in adopting every base and unlawful measure to wound the character, destroy the property, and jeopard the lives of abolitionists, and thus leaving no stone unturned to inflame them to desdone, and are still doing, as if animated be no humanity. by an insane desire to be destroyed.

The object of the Anti-slavery Association is not to destroy men's lives, despots though they be, but to prevent the spilling of human blood. It is to enlighten the understanding, arouse the conscience, affect the heart. We rely upon moral power alone for success. The ground upon which we stand belongs to no sect or party—it is holy ground. Whatever else may divide us in opinion, in this one thing we are agreed, that slave-holding is a crime under all circumstances, and ought to be immediately and unconditionally abandoned. We enforce upon no man either a political or a religious test as a condition of membership; but at the same time we expect every abolitionist to carry out his principles consistently, impartially, faithfully, in whatever station he may be called to act, or wherever conscience may lead him to I hail this union of hearts as a 90. bright omen that all is not lost. To the slave-holding South it is more terrible than a military army with banners. indeed a sublime spectacle to see men forgetting their jarring creeds and party affinities, and embracing each other as one and indivisible in a struggle in behalf of our common Christianity and our common nature. God grant that no root of bitterness may spring up to divide us "United we stand, divided we asunder! fall," and if we fall what remains for our country but a fearful looking for of judgment and of fiery indignation that shall consume it? Fall we cannot if our trust be in the Lord of Hosts and in the power of His might—not in man, nor any body of men. Divided we cannot be if we truly "remember them that are in bonds as bound with them," and love our neighbors as ourselves.

Genuine abolitionism is not a hobby got up for personal or associated aggrandizement; it is not a political ruse; it is not a spasm of sympathy which lasts but for a moment, leaving the system weak and worn; it is not a fever of enthusiasm: it is not the fruit of fanaticism; it is not a spirit of faction. It is of Heaven, not of men. It lives in the heart as a vital principle. It is an essential part All this Southern men have Christianity, and aside from it there can Its scope is not confined to the slave population of the United

States, but embraces mankind. Opposi- selves with human blood; if they be not tion cannot weary it out, force cannot put the plunderers of the poor, the spoilers it down, fire cannot consume it. It is the of the defenceless, the traffickers in spirit of Jesus, who was sent "to bind "slaves and the souls of men"? Who are up the broken-hearted, to proclaim liberty the cowards, if not those who shrink from to the captives, and the opening of the manly argumentation, the light of truth, prison to them that are bound; to pro- the concussion of mind, and a fair field; claim the acceptable year of the Lord, if not those whose prowess, stimulated and the day of vengeance of our God." by whiskey potations or the spirit of mur-Its principles are self-evident, its meas- der, grows rampant as the darkness of ures rational, its purposes merciful and night approaches; whose shouts and yells just. It cannot be diverted from the are savage and fiend-like; who furiously path of duty, though all earth and hell oppose; for it is lifted far above all down with the liberty of the press! down earth-born fear. When it fairly takes with the right of petition! down with possession of the soul, you may trust the constitutional law!"; who rifle mail-bags, soul-carrier anywhere, that he will not be throw type and printing-presses into the recreant to humanity. In short, it is a river, burn public halls dedicated to "virlife, not an impulse—a quenchless flame of philanthropy, not a transient spark of sentimentalism.

Will it be retorted that we dare not resist—that we are cowards? Cowards! no man believes it. They are the dastards who maintain might makes right; whose arguments are brick-bats and rotten eggs; whose weapons are dirks and bowieknives; and whose code of justice is lynch law. A love of liberty, instead of unnerving men, makes them intrepid, heroic, invincible. It was so at Thermopylæ-it was so on Bunker Hill.

Who so tranquil, who so little agitated, in storm or sunshine, as the abolitionists? But what consternation, what running to and fro like men at their wits' end, what trepidation, what anguish of spirit, on the part of their enemies! How Southern slave-mongers quake and tremble at the faintest whisperings of an abolitionist? For, truly, "the thief doth fear each bush an officer." Oh! the great poet of nature is right—

"Thrice is he arm'd that hath his quarrel just;

And he but naked, though lock'd up in steel, Whose conscience with injustice is cor-

A greater than Shakespeare certifies the "wicked flee when no man pursueth; but the righteous are bold as a lion." In grace, and by our deep concern for the opthis great contest of right against wrong, pressed, we have been enabled, in Chrisof liberty against slavery, who are the tian magnanimity, to pity and pray for wicked, if they be not those who, like our enemies, and to overcome their evil vultures and vampires, are gorging them- with good. Overcome, I say: not merely

exclaim: "Down with free discussion! tue, liberty, and independence," and assassinate the defenders of inalienable human rights?

And who are the righteous, in this case, if they be not those who will "have no fellowship with the unfruitful words of darkness, but rather reprove them"; who maintain that the laborer is worthy of his hire, that the marriage institution is sacred, that slavery is a system cursed of God, that tyrants are the enemies of mankind, and that immediate emancipation should be given to all who are pining in bondage? Who are the truly brave, if not those who demand for truth and error alike free speech, a free press, an open arena, the right of petition, and no quarter? If not those, who, instead of skulking from the light, stand forth in the noontide blaze of day, and challenge their opponents to emerge from their wolf-like dens, that, by a rigid examination, it may be seen who has stolen the wedge of gold, in whose pocket are the thirty pieces of silver, and whose garments are stained with the blood of inno-

The charge, then, that we are beside ourselves, that we are both violent and cowardly, is demonstrated to be false, in a signal manner. I thank God that the weapons of our warfare are not carnal, but spiritual. I thank Him that, by His

The former, by taking a pe- (q. v.), afterwards a commodore in the culiar course, caused the latter to run Continental navy. When, subsequently,

the colonists were at war with Great Britain, the act of Captain Whipple was avowed, and Sir James Wallace, in command of a British ship-of-war in Narraganset Bay, wrote as follows to the perpetrator of the act: "You, Abraham Whipple, on June 9, 1772, burned his Majesty's vessel, the Gaspee, and I will hang you at the yard-arm." Whipple coolly replied: "Sir, always catch your man before you hang him." A ballad was written at the time, containing fiftyeight lines of doggerel verse, which ended as follows:

"Now, for to find these people out, King George has offered very stout, One thousand pounds to find out one That wounded William Duddington. One thousand more he says he'll spare For those who say the sheriff's were. One thousand more there doth remain For to find out the leader's name; Likewise five hundred pounds per man For any one of all the clan. But, let him try his utmost skill, I'm apt to think he never will Find out any of those hearts of gold, Though he should offer fifty-fold.

sel under the guns of the castle. The or Portugal. moon was shining brightly. The barges fourteen launches were sent in, manned years he received from the King of Sweby about 500 men. A terrible conflict ensued, which lasted forty minutes, when the launches were again repulsed, with a loss of 120 killed and 130 wounded. At daylight (Sept. 27) a third attack was made by the brig Carnation, which opened heavily, but was soon so cut up by the well-directed guns of the Armstrong that she hastily withdrew. The privateer was also much damaged, and it being evident that she could not endure a fourth attack, Captain Reid directed her to be scuttled, to prevent her falling into the hands of the British. She was then abandoned, when the British boarded her and set her on fire. While the British lost over 300 men in the three attacks, the Armstrong lost only two men killed and seven wounded during the ten hours.

To Captain Reid and his brave men is justly due the credit of saving New Orleans from capture. Lloyd's squadron was a part of the expedition then gathering at Jamaica for the invasion of

of neutrality, Lloyd sent into the harbor, for the destruction of the American vessel at eight o'clock in the evening, four large in their neutral port. highest offices in the kingdom. When to him and presented the draft of an ad- of the New York Historical Society. dress to be pronounced at the meeting of the Privy Council, he was politely informed that the speech was already prepared and the preliminaries were arranged. Pitt immediately perceived that the King's tutor and warm personal friend of the young King's mother, the Earl of Bute, had made the arrangements, and would occupy a conspicuous place in the administration. George chose Bute for his counsellor and guide, and Pitt, to whom England, more than to any other man, owed its present power and glory, was allowed to retire and have his place filled by this Scotch adventurer. people of England were disgusted, and by this blunder George created a powerful opposition party at the beginning of his reign.

The people of New York City, grateful for the repeal of the Stamp Act, voted a statue to the King and to Pitt. That of the former was equestrian, made of lead, and gilded. It was placed in the centre of the Bowling Green, near Fort George, at the foot of Broadway. Raised upon a pedestal, with the head of the King and the horse facing westward, it made an imposing appearance. It was set up, with great parade, Aug. 21, 1770. Within six years afterwards the people pulled it down, with demonstrations of contempt. Washington occupied New York with Independence (July 9), and it was read and his fixed determination concerning,

Queen was simple in her tastes and habits, to the army. The same evening a large rigid in the performance of moral duties, concourse of soldiers and civilians askind and benevolent. USUAL APPEARANCE OF GEORGE III. ABOUT 1776. (From a sketch by Gear.)

The arrival of Richard Penn in London Continental troops in the summer of 1776. With the second petition of Congress There he received the Declaration of aroused the anger of the King towards,

the "rebellious colonies." He refused to see Penn or receive the petition, and on Aug. 23 he issued a proclamation for suppressing rebellion and sedition in Amer-"There is reason," said the proclamation, "to apprehend that such rebellion [in America] hath been much promoted and encouraged by the traitorous correspondence, counsels, and comfort of divers wicked and desperate persons within our realm," and he called upon all officers of the realm, civil and military, and all his subjects, to disclose all "traitorous conspiracies," giving information of the same to one of the secretaries of state, "in order to bring to condign punishment the authors, perpetrators, and abettors of such traitorous designs." This proclamation was aimed at Chatham and Camden in the House of Lords, and Barré in the House of Commons, and their active political friends. When it was read to the people at the Royal Exchange it was received with a general hiss from the populace. But the stubborn King would not yield. He would rather perish than consent to repeal the alterations in the charter of Massachusetts, or yield the absolute authority of Parliament. And North, who in his heart thought the King wrong, supported him chiefly, as was alleged, because he loved office with its power and emoluments better than justice. When, in November, the wife of John Adams read the King's proclamation, she wrote to her husband, saying, "This intelligence will make a plain path for you, though a dangerous one. I could not join to-day in the petitions of our worthy pastors for a reconciliation between our no longer parent state, but tyrant state, and the colonies. Let us separate; they are unworthy to be our brethren. Let us renounce them; and, instead of supplications as formerly for their prosperity and happiness, let us beseech the Almighty to blast their councils and bring to naught all their devices." The proclamation stimulated Congress to recommend the formation of State governments, and filled the minds and mond, in the House of Lords, proposed a hearts of the people with thoughts of, total change of measures in America and and desires for, independence. prepared an appeal to the people of America in favor of independence.

The British ministry, either blind or wicked, misled George III. into the belief that a few regiments could subdue Massachusetts, and that New York could easily be seduced to the support of the crown by immunities and benefactions. The deceived monarch, therefore, ordered letters to be written to Gage, at the middle of April, 1775, to take possession of every colonial fort; to seize and secure all military stores of every kind collected for "the rebels"; to arrest and imprison all such as should be thought to have committed treason; to repress rebellion by force; to make the public safety the first object of consideration. and to substitute more coercive measures for ordinary forms of procedure, without pausing to require the aid of a civil magistrate. Four regiments, at destined for Boston, were ordered to New York, to assist in the progress of intrigue; and a vessel carried out six packages of pamphlets, containing a very soothing and complimentary Address of the People of Great Britain to the Inhabitants of America, written by Sir John Dalrymple, at the request of Lord North. The Americans were not coaxed by this persuasive pamphlet, nor awed by the attempts to execute the sanguinary orders of Lord Dartmouth to Gage.

The great landholders in England, as well as the more warlike classes, had become sick of trying to tax the Americans without their consent. Indeed, all classes were convinced of its futility, and yearned for a change in the policy. Even the stubborn King, though unrelenting in his purpose to bring the Americans into submission, declared that the man who should approve the taxing of them, in connection with all its consequences, was "more fit for a madhouse than for a seat in Parliament." In the House of Commons (June, 1779), Lord John Cavendish moved for orders to withdraw the British forces employed in America; and the Duke of Rich-England, and a clear and powerful writer, hints to the King that the advantages to

alleged that a quarrel with Great Britain had been sought because she had adopted measures solely retaliatory as to France, and that as these measures had been abandoned by a repeal of the Orders in Council, the war was now continued on the questions of impressment and search. On this point he took such a decisive position that the door for negotiation which the recommendation of the committee of the American Congress on foreign relations proposed to open seemed irrevocably shut. "His royal highness," said the manifesto, "can never admit that the exercise of the undoubted and hitherto undisputed right of searching neutral merchant vessels in time of war, and the impressment of British seamen when found therein, can be deemed any violation of a neutral flag; neither can he admit that the taking of such seamen from on board such vessels can be considered by any neutral state as a hostile measure or a justifiable cause of war." After reaffirming the old English doctrine of the manor-house of Gen. John Smith, at impossibility of self-expatriation of a Smith's Point, L. I., fortified it and the British subject, the manifesto continued: grounds around it, and named the works "But if to the practice of the United Fort George, which they designed as a de-

and in their negotiations with them. He sovereign by acts of naturalization and certificates of citizenship, which they pretend to be as valid out of their own territory as within it, it is obvious that to abandon this ancient right of Great Britain, and to admit these naval pretensions of the United States, would be to expose the very foundations of our maritime strength." The manifesto manifesto charged the United States government with systematic efforts to inflame the people against Great Britain; of ungenerous conduct towards Spain, Great Britain's ally, and of deserting the cause of neutrality. He spoke of the subserviency of the United States to the ruler of France, and against this course of conduct the prince regent solemnly protested. He thought that while Great Britain was contending for the liberties of mankind, she had a right to expect from the United States far different treatment-not an "abettor of French tyranny." George became King in 1820, and died in Windsor, June 26, 1830.

George, Fort, the name of four defensive works connected with warfare in the United States. The first was erected near the outlet of Lake George, N. Y., and, with FORT WILLIAM HENRY (q. v.) and other works, was the scene of important operations during the French And Indian War (q. v.) of 1755-59.

The second was on Long Island. the autumn of 1780, some Rhode Island

he saw the ships of the enemy pass the English batteries at the southern end of the island, he knew resistance would be in vain, so he ordered his squadron to run up to Frederica, while he spiked the guns at St. Simon's and retreated with his troops. There, waiting for reinforcements from South Carolina (which did not come), he was annoyed by attacks from Spanish detachments, but always repulsed them. Finally, he proceeded to make a night attack on the Spanish camp at St. Simon's. When near the camp a Frenchman in his army ran ahead, fired his musket, and deserted to the enemy. The Spaniards were aroused, and Oglethorpe fell back to Frederica, and accomplished the punishment of the deserter in a novel way. He addressed a letter to the Frenchman as a spy in the Spanish camp, telling him to represent the Georgians as very weak in numbers and arms, and to advise the Spaniards to attack them at once; and if they would not do so, to try and persuade them to remain at St. Simon's three days longer; for within that time a British fleet, with 2,000 land troops, would arrive to attack St. Augustine. This letter was sent to the deserter by a Spanish prisoner, who, as it was expected he would, carried it to the Spanish commander. The Frenchman was put in irons, and afterwards hanged. A council of war was held, and while it was in session vessels from Carolina, seen at sea, were mistaken for the British fleet al-The Spaniards determined to attack Oglethorpe immediately, and then hasten to the defence of St. Augustine. They advanced on Frederica, along a narrow road flanked by a forest and a morass; and when within a mile of the fort Oglethorpe and his Highlanders, lying in ambush, fell upon them furiously. Nearly the whole of the advanced division were killed or captured, and a second, pressing forward, shared their fate. The Spaniards retreated in confusion, leaving about 200 dead on the field. They fled to their ships, and in them to St. Augustine, to find that they had been outgeneraled by Oglethorpe. The place of the slaughter is called "Bloody Marsh" to this day. This stratagem probably saved Georgia and South Carolina from utter destruction.

Sir James Wright was appointed royal governor of Georgia in 1764. He ruled wisely, but was a warm adherent of the royal cause. His influence kept down open resistance to the acts of Parliament for some time; but when that resistance became strong, it was suddenly overpower-In January, 1776, Joseph Habering. sham, a member of the Assembly, raised a party of volunteers and made Governor Wright a prisoner, but set him free on his parole not to leave his own house. This parole he violated. A sentinel was placed before his door, and all intercourse between Wright and friends of the crown was forbidden. One stormy night (Feb. 11, 1776), Governor Wright escaped from a back window of his house, with an attendant, fled to a boat at the river-side, and went down the Savannah 5 miles to Bonaventure, the residence of his companion; thence he was conveyed before daylight to the British armed ship Scarborough, in Tybee Sound. So ended the rule of the last royal governor in Georgia. Sir James was a native of Charleston, S. C.; the son of a chief-justice (Robert Wright) of that province; agent of the province in Great Britain; and attorneygeneral; and in 1760 was appointed chiefjustice and lieutenant-governor. he was created a baronet. After escape from Savannah he retired England, losing all his large estate in Georgia by confiscation. He died 1786.

Late in 1771 Noble Wimberley Jones was chosen speaker of the Georgia Assembly. He was a man of exemplary life, but the royal governor, Sir James Wright, who had reported him a strong opposer of government measures, would not consent to the choice. The Assembly voted this interference a breach of their privileges. Hillsborough, the secretary state for the colonies, censured the House for their "unwarrantable and inconsistent arrogance," and directed the governor to "put his negative upon any person whom they should next elect for speaker, and to dissolve the Assembly in case they should question the right of such negative." So the affections of the colonies, one after another, were alienated from the mother country by her unwise rulers.

Gerard, James Watson, lawyer; born in New York City in 1794; graduated at Columbia in 1811; practised law in New York till 1869; secured the incorporation of the House of Refuge for Juvenile Delinquents in New York, which was the first institution of this kind in the United States. He was also an ardent advocate for a uniformed police. He died in New York, Feb. 7, 1874.

Gerard de Rayneval, Conrad Alex-ANDRE, diplomatist; born in France. On the ratification of the treaty between France and the United States, of Feb. 6, 1778, diplomatic relations were fully established between the two governments by the French sending M. Gerard (who had been an active participator in the negotiations) as minister plenipotentiary to the young republic. He sailed for America in D'Estaing's flag-ship, in company with Silas Deane, and arrived at Philadelphia early in July. There being no traditionary rules of etiquette suitable for the occasion, the ceremonials which took place at his reception by Congress, on Aug. 6, were entirely new. Richard Henry Lee and Samuel Adams, delegates

The Indians plundered and burned Cobleskill, Springfield, German Flats, and Cherry Valley. In retaliation the Americans, led by Colonel Van Schaick and Colonel Willett, laid waste the Indian villages, seizing all provisions and weapons which they could find.

German Mercenaries. Soon after the opening of the British Parliament in the autumn of 1775, that body, stimulated by Lord North, the premier, and Lord George Germain, secretary for the colonies, and at the suggestion of Admiral Howe, promptly voted 25,000 men for service against the Americans. It was difficult to obtain enlistments in Great Britain, and mercenaries were sought in Germany. At the close of the year, and at the beginning of 1776, bargains were effected between representatives of the British government and the reigning princes of Hesse-Cassel, Hesse-Hanau, Brunswick, Anhalt, Anspach, and Waldeck. In the bargains, the fundamental law of trade-supply and demand-prevailed. The King of England had money, fall on the Americans. He complained but lacked troops; the German rulers had troops, but wanted money. imprisoned at Mount Vernon, Ala., but legislature proceeded to rearrange the later at Fort Sill, Oklahoma.

Houlton, Me., June 19, 1846; received tests and strong constitutional arguments an academic education; served in the Civil War, being wounded four times. In 1871-88 he was a Methodist Episcopal minister at various places in Maine. His publications include Reminiscences of the War; The Blue and the Gray, etc.

Gerry, Elbridge, signer of the Declaration of Independence; born in Marblehead, Mass., July 17, 1744; graduated at Harvard in 1762; took part in the early strife before the Revolution, and in 1772 represented his native town in the State legislature. Gerry was the first to propose, in the Provincial Congress of Massachusetts, a law for fitting out armed vessels and establishing a court of admiralty. He took a seat in the Continental Congress early in 1776, signed the Declaration of Independence, and remained in that body, with few intermissions, until 1785. He was an efficient member of finance committees in the Congress, and was president of the treasury board in 1780. A delegate in the convention that of the Federalists; and those of Essex framed the national Constitution, he was and Worcester were so divided as to form

one of those who refused to sign the instrument. He was a member of Congress pense of hundreds of lives. He was first from 1789 to 1793, and in 1797 was sent as one of the special envoys on a mission to France. He was elected governor of Massachusetts by the Democratic party in 1810, and in 1812 was chosen Vice-President of the United States. He died in Washington, D. C., while Vice-President, Nov. 23, 1814.

Gerrymandering, a political term employed in the United States since 1812. After a bitter contest for power in Massachusetts between the Federalists and Democrats, the latter succeeded, in 1811, in electing their candidate for governor, Elbridge Gerry, and a majority of both Houses of the legislature. In order to secure the election of United States Senators in the future, it was important to perpetuate this possession of power, and measures were taken to retain a Democratic majority in the State Senate in all future years. The senatorial districts had been formed without any division of counties. This arrangement, for the purpose alluded to, was now disturbed. The senatorial districts of the State. Ghent, TREATY OF, the treaty between the United States and Great Britain, which terminated the War of 1812. The American commissioners were Quincy Adams, James Bayard, Henry Clay, Jonathan Russell, and Albert Galla-British commissioners were the Lord Gambier, Henry Goulburn, and William Adams. The American commissioners assembled in the city of Ghent, Belgium, in July, 1814; the British commissioners early in the following month. The terms of the treaty were concluded Dec. 24, following, and the ratifications were exchanged Feb. 17, 1815. While the negotiations were in progress the leading citizens of Ghent took great interest in the matter. Their sympathies were with the Americans, and they mingled their rejoicings with the commissioners when the work was done. On Oct. 27 the Academy of Sciences and Fine Arts at Ghent invited the American commissioners to attend their exercises, when they were all elected honorary members of the academy. A sumptuous dinner was given, at which the intendant, or chief magistrate, of Ghent offered the following sentiment: "Our distinguished guests and fellow-members, the American ministers—may they succeed in making an honorable peace to secure the liberty and independence of their country." The band then played Hail, Columbia. The British commissioners were not present. After the treaty was concluded, the American commissioners dined the British commissioners, at which Count H. van note, nor long remember, what we say Steinhuyser, the intendant of the departhere, but it can never forget what they ment, was present. Sentiments of mutual did here. It is for us the living, rather, friendship were offered. A few days afterto be dedicated here to the unfinished wards the intendant gave an entertainment which they who fought here have to the commissioners of both nations.

The leading provisions of the treaty great were: (1) Restoration of all territory, task remaining before us, that from these places, and possessions taken by either honored dead we take increased devotion party from the other during the war, exto that cause for which they gave the last cept the islands mentioned in Article IV. full measure of devotion, that we here Public property remaining in such places highly resolve that these dead shall not at the time of ratifying the treaty was have died in vain, that this nation, under not to be destroyed or carried away, and God, shall have a new birth of freedom, the same engagement was made as to

Gibbes. ly Banner and the Daily South-Carolini- favor. died in Columbia, S. C., Oct. 15, 1866.

Gibbes, William Hasell, lawyer; born in Charleston, S. C., March 16, 1754; studied law in London, and was one of the thirty Americans living there who signed a petition to the King against the Parliamentary enactments which resulted in the Revolutionary War. He entered the Continental army as captain-lieutenant of artillery. In 1783-1825 he was master in chancery of South Carolina. He died in 1831.

Gibbon, Edward, historian; born in Putney, Surrey, England, April 27, 1737; was from infancy feeble in physical constitution. His first serious attempt at authorship was when he was only a youth—a treatise on the age of Sesostris. He was fond of Oriental research. Reading Bossuet's Variations of Protestantism and Exposition of Catholic Doctrine, he became a Roman Catholic, and at length a free-thinker. He was a student at Oxford when he abjured Protestantism, and was expelled. He read with avidity the Latin, Greek, and French classics, and became passionately fond of historical research. He also studied practically the military art, as a member of the Hampshire militia, with his father. In 1751 he published a defence of classical studies against the attacks of the French philosophers. In 1764 he went to Rome, and studied its antiquities with delight and seriousness, and there he conceived the idea of writing his great work, The De-

and he also induced the Indians to remain 15th of October, 1764, as I sat musing neutral. Judge Law says: "Next to Clark amid the ruins of the Capitol, while bareand Vigo, the United States are indebt- footed friars were singing vespers in the ed more to Father Gibault for the acces- Temple of Jupiter, that the idea of writsion of the States comprised in what was ing the decline and fall of the city first the original Northwest Territory than to started to my mind." But that work was not seriously begun until 1770, and ROBERT WILSON, historian; the first volume was completed in 1775. born in Charleston, S. C., July 8, 1809; In 1774 he became a member of the House graduated at the South Carolina Col- of Commons, and at first took sides with lege in 1827; was the editor of the Week- the Americans, writing much in their He finally became a firm supan, and was also twice elected mayor of porter of the British ministry in their Columbia. During the Civil War he was proceedings against the Americans, writsurgeon-general of South Carolina. Among ing in their defence a pamphlet in the his writings are A Documentary History French language, when he was provided of the American Revolution, consisting of by them with a lucrative sinecure office letters and papers relating to the contest worth \$4,000 a year. His mouth (or, for liberty, chiefly in South Carolina. He rather, pen) was thus stopped by the government favor. To this venality the following epigram alludes. It was written, it is said, by Charles James Fox:

> "King George, in a fright, lest Gibbon should write

The story of Britain's disgrace, Thought no means more sure his pen to Than to give the historian a place.

"But his caution is vain, 'tis the curse of his reign

That his projects should never succeed; Though he write not a line, yet a cause of decline

In the author's example we read."

Gmeiner, John, clergyman; born in Baernan, Bavaria, Dec. 5, 1847; came to the United States in 1849 with his parents, who settled in Milwaukee, Wis.; was ordained a Roman Catholic priest in 1870; became Professor of Ecclesiastical History and Homiletics in the Seminary of St. Francis of Sales, Milwaukee, in His publications include The Church and the Various Nationalities of the United States, etc.

Gobin, John P. S., lawyer; born in Sunbury, Pa., Jan. 26, 1837; attained the rank of brevet brigadier-general of volunteers in the Civil War; was elected commander-in-chief of the Grand Army of the Republic in 1897; commissioned a major-

general of volunteers in 1898.

Godfrey, THOMAS, inventor; born in Bristol, Pa., in 1704; was by trade a glazier, and became a self-taught mathematician. In 1730 he communicated to James Logan, who had befriended him, an improvement on Davis's quadrant. May, 1742, Logan addressed a letter to Dr. Edmund Hadley, in England, describing fully Godfrey's instrument. Hadley did not notice it, when Logan sent a copy of this letter to Hadley, together with Godfrey's account of his inventions, to a friend, to be placed before the Royal Society. Hadley, the vice-president, had presented a paper, a year before, describing a reflecting-quadrant like Godfrey's. They both seem to have hit upon the same invention; and the society, deciding that both were entitled to the honor, sent Godfrey household furniture of the value of \$1,000. He died in Philadelphia, Pa., in December, 1749.

Godkin, EDWIN LAWRENCE, journalist; born in Ireland, Oct. 2, 1831; graduated at Queen's College, Belfast, in 1851; was the first editor of the Nation, which was merged with the New York Evening Post in 1882, which he also edited till 1899. He is the author of Problems of Democ-

God Save the King (or Queen), posed to have been written early in the eighteenth century as a Jacobite song, and the air has been, by some, attributed to Handel. It was sung with as much unction in the English-American colonies as in England. The air did not originate with Handel in the reign of George I., for it existed in the reign of Louis XIV. of France. Even the words are almost a literal translation of a canticle which was sung by the maidens of St. Cyr whenever King Louis entered the chapel of that establishment to hear the morning prayer. The author of the words was De Brinon, and the music was by the eminent Lulli. The following is a copy of the words:

> "Grand Dieu sauve le Roi! Grand Dieu venge le Roi! Vive le Roi! Que toujours glorieux, Louis victorieux! Voye ses ennemis Toujours soumis! Grand Dieu sauve le Roi! Vive le Roi!"

Other authorities credit Henry Carey with the authorship of both words and music of the English hymn. The music of My Country, 'tis of Thee (words by REV. S. F. SMITH, D.D., q. v.), is the same as that of God Save the King.

Godwin, PARKE, author; born in Paterson, N. J., Feb. 25, 1816; graduated at Princeton in 1834; one of the editors of the New York Evening Post from 1836 to 1886. Among his works are Pacific and Constructive Democracy; Dictionary of Biography; Political Essays, etc.

Goff, NATHAN, statesman; born Clarksburg, W. Va., Oct. 9, 1843; enlisted in the National army in 1861; member of the State legislature in 1865; Secretary of the Navy in 1881; member of Congress, 1883-89.

Gold Standard Act. The bill in the fifty-sixth Congress, first session, entitled. "An act to define and fix the standard of value, to maintain the parity of all forms of money issued or coined by the United States, to refund the public debt, and for other purposes," as reported from the conference committee of the two Houses, passed the Senate March 6, 1900, by a party vote of 44 to 26 (one Democrat, Mr. Lindsay, of Kentucky, supporting the bill, and one Republican, Mr. Chandler, of New Hampshire, voting against it), and the House of Representatives March 13, by a vote of 166 yeas to 120 nays, ten members present and The President signed the not voting. bill March 14.

By this act the dollar consisting of twenty-five and eight-tenths grains of gold, nine-tenths fine, shall be the standard of value, and all forms of money issued or coined shall be maintained at a parity of value with this gold standard. The United States notes and treasury notes shall be redeemed in gold coin, and a redemption fund of \$150,000,000 of gold coin and bullion is set aside for that purpose only. The following is the text of the section carrying out this provision:

"Sec. 2. That United States notes, and Treasury notes issued under the act of July 14, 1890, when presented to the treasury for redemption, shall be redeemed in gold coin of the standard fixed in the first section of this act, and in order to secure the prompt and certain redemption of such notes as herein provided it shall be the duty of the Secretary of the Treasury to set apart in the treasury

a company of mounted volunteers, and also an armed steamer. Made commander in 1841, he took part in the Mexican War. From 1853 to 1857 he was superintendent of the Naval Academy at Annapolis. In the summer of 1861 he was placed in command of the North Atlantic blockading a reserve fund of \$150,000,000 in gold coin and bullion, which fund shall be used for such redemption purposes only, and whenever and as often as any of said notes shall be redemed from said fund it shall be the duty of the Secretary of the Treasury to use said notes so redeemed to restore and maintain such reserve fund in the manner following, to wit:

"First. By exchanging the notes so redeemed for any gold coin in the general fund

of the treasury.

"Second. By accepting deposits of gold coin at the treasury or at any sub-treasury in exchange for the United States notes so redeemed.

"Third. By procuring gold coin by the use of said notes, in accordance with the provisions of Section 3,700 of the Revised Stat-

utes of the United States.

"If the Secretary of the Treasury is unable to restore and maintain the gold coin in the reserve fund by the foregoing methods, and the amount of such gold coin and bullion in said fund shall at any time fall below \$100,000,000, then it shall be his duty to restore the same to the maximum sum of \$150,000,000 by borrowing money on the credit of the United States, and for the debt thus incurred to issue and sell coupon or registered bonds of the United States, in such form as he may prescribe, in denominations of \$50 or any multiple thereof, bearing interest at the rate of not exceeding 3 per centum per annum, payable quarterly, such bonds to be payable at the pleasure of the United States after one year from the date of their issue, and to be payable, principal and interest, in gold coin of the present standard value, and to be exempt from the payment of all taxes or duties of the United States, as well as from taxation in any form by or under State, mu-nicipal, or local authority; and the gold coin received from the sale of said bonds shall first be covered into the general fund of the treasury and then exchanged, in the manner hereinbefore provided, for an equal amount of the notes redeemed and held for exchange, and the Secretary of the Treasury may, in his discretion, use said notes in exchange for gold, or to purchase or redeem any bonds of the United States, or for any other lawful purpose the public interests may require, except that they shall not be used to meet deficiencies in the current revenues.

"That United States notes when redeemed in accordance with the provisions of this section shall be reissued, but shall be held in the reserve fund until exchanged for gold, as herein provided; and the gold coin and bullion in the reserve fund, together with the redeemed notes held for use as provided in this section, shall at no time exceed the max-

imum sum of \$150,000,000."

The legal tender quality of the silver dollar and other money coined or issued by the United States is not affected by the act.

The deposit of gold coin with the treas-

GOLD STANDARD ACT-GOMEZ

urer, and the issue of gold certificates therefor, and the coinage of silver bullion in the treasury into subsidiary silver coin are provided for.

The National Bank Law is amended to permit banks to be created with \$25,000 capital in places whose population does not exceed 3,000. Provision is made for the refunding of outstanding bonds at a low rate of interest, and under it bonds bearing 3, 4, and 5 per cent. interest have been refunded for bonds bearing 2 per cent. The following are the sections covering these amendments:

"SEC. 10. That Section 5,138 of the Revised Statutes is hereby amended so as to

read as follows:

"'Section 5,138. No association shall be organized with a less capital than \$100,000, except that banks with a capital of not less than \$50,000 may, with the approval of the Secretary of the Treasury, be organized in any place the population of which does not exceed 6,000 inhabitants, and except that banks with a capital of not less than \$25,000 may, with the sanction of the Secretary of the Treasury, be organized in any place the population of which does not exceed 3,000 inhabitants. No association shall be organized in a city the population of which exceeds 50,000 persons with a capital of less than \$200,000.

"SEC. 11. That the Secretary of the Treasury is hereby authorized to receive at the treasury any of the outstanding bonds of the United States bearing interest at 5 per centum per annum, payable February 1, 1904, and any bonds of the United States bearing interest at 4 per centum per annum, payable July 1, 1907, and any bonds of the United States bearing interest at 3 per centum per annum, payable August 1, 1908, and to issue in exchange therefor an equal amount of coupon or registered bonds of the United States in such form as he may prescribe, in denominations of \$50 or any multiple thereof, bearing interest at the rate of 2 per centum per annum, payable quarterly, such bonds to be payable at the pleasure of the United States after thirty years from the date of their issue, and said bonds to be payable, principal and interest, in gold coin of the present standard value, and to be exempt from the payment of all taxes or duties of the United States, as well as from taxation in any form by or under State, municipal, or

local authority.
"Provided, That such outstanding bonds may be received in exchange at a valuation not greater than their present worth to yield an income of 21/4 per centum per annum; and in consideration of the reduction of interest effected, the Secretary of the Treasury is authorized to pay to the holders of the outstanding bonds surrendered for exchange, out of any money in the treasury not otherwise appropriated, a sum not greater than the

difference between their present worth, computed as aforesaid, and their par value, and the payments to be made hereunder shall be held to be payable on account of the sinking-fund created by Section 3,694 of the Re-

vised Statutes.

'And provided further, That the 2 per centum bonds to be issued under the provisions of this act shall be issued at not less than par, and they shall be numbered consecutively in the order of their issue, and when payment is made the last numbers issued shall be first paid, and this order shall be followed until all the bonds are paid, and whenever any of the outstanding bonds are called for payment interest thereon shall cease three months after such call; and there is hereby appropriated out of any money in the treasury not otherwise appropriated, to effect the exchanges of bonds provided for in this act, a sum not exceeding one-fifteenth of 1 per centum of the face value of said bonds, to pay the expense of preparing and issuing the same and other expenses incident thereto."

Section 12 provides for the issue of circulating notes to banks on deposit of bonds, and for additional deposits when there is a depreciation in the value of bonds. The total amount of notes issued by any national banking association may equal at any time, but shall not exceed, the amount at any such time of its capital stock actually paid in.

Every national banking association shall pay a tax in January and July of one-fourth of 1 per cent. on the average amount of such of its notes in circulation as are based on its deposit of 2 per cent. bonds, and such taxes shall be in lieu of the taxes on its notes in circulation imposed by Section 5,214 of the Revised Statutes. Provision for international bimetallism is made in the final section of the act, which is as follows:

"SEC. 14. That the provisions of this act are not intended to preclude the accomplishment of international bimetallism whenever conditions shall make it expedient and practicable to secure the same by concurrent action of the leading commercial nations of the world and at a ratio which shall insure permanence of relative value between gold and silver.'

wrecked and robbed, but was kindly treated by the Pilgrims, who, nevertheless, regarded his misfortunes as judgments for his desertion of the company. See WESTON'S COLONY.

Gorham, NATHANIEL, statesman; born in Charlestown, Mass., May 27, 1738; took an active part in public affairs at the beginning of the Revolution, especially in the local affairs of Massachusetts; was a delegate to the Continental Congress (1782-83 and from 1785 to 1787); and was chosen its president in June, 1786. He was an influential member of the convention that framed the national Constitution, and exerted great power in procuring its ratification by Massachusetts. In conjunction with Oliver Phelps, he purchased an immense tract of land in the State of New York. He died in Charlestown, June 11, 1796. See Holland Land COMPANY.

Gorrie, Peter Douglas, clergyman; born in Glasgow, Scotland, April 21, 1813; came to the United States in 1820, and was ordained in the Methodist Episcopal Church. He was the author of The Churches and Sects in the United States; Black River Conference Memorial, etc. He died in Potsdam, N. Y., Sept. 12, 1884.

Gorringe, HENRY HONEYCHURCH, naval officer; born in Barbadoes, W. I., Aug. 11, 1841; came to the United States in early life; served through the Civil War with marked distinction; was promoted lieutenant-commander in December, 1868. He became widely known in 1880-81 through having charge of the transportation of the Egyptian obelisk (Cleopatra's Needle), presented to the United States 1881. The total cost of transportationderbilt. The iron vessel Dessoug was bought from the Egyptian government, and a hole was cut in her side, through which the obelisk was placed in the hold. Gorringe published a History of Egyptian Obelisks. He died in New York City, July 7, 1885.

who came over to look after his colony, London, and embarked for Boston in and took some proceedings against him as 1636, where he soon became entangled in an interloper. Weston had been ship- theological disputes and removed to Plymouth. There he preached such heterodox doctrines that he was banished as a heretic in the winter of 1637-38. With a few followers he went to Rhode Island, where he was publicly whipped for calling the magistrates "just-asses," and other rebellious acts. In 1641 he was compelled to leave the island. He took refuge with Roger Williams at Providence, but soon made himself so obnoxious there that he escaped public scorn by removing (1642) to a spot on the west side of Narraganset Bay, where he bought land of Miantonomoh and planted a settlement. The next year inferior sachems disputed his title to the land; and, calling upon Massachusetts to assist them, an armed force was sent to arrest Gorton and his followers, and a portion of them were taken to Boston and tried as "damnable heretics." For a while they endured confinement and hard labor, in irons, and in 1644 they were banished from the colony. went to England and obtained from the Earl of Warwick an order that the clergyman and his followers should have peace at the settlement they had chosen. He called the place Warwick when he returned to it in 1648. There he preached on Sunday and performed civil service during the week. He died in Rhode Island late in 1677.

Gosnold, BARTHOLOMEW, navigator; born in England; date unknown; became a stanch friend of Sir Walter Raleigh. Because of Raleigh's failure, he did not lose faith. The long routes of the vessels by way of the West Indies seemed to him unnecessary, and he advocated the feasibility of a more direct course across the by the Khedive of Egypt, and erected in Atlantic. He was offered the command of Central Park, New York City, Jan. 23, an expedition by the Earl of Southampton, to make a small settlement in the more \$100,000-was paid by William H. Van- northerly part of America; and on April 26, 1602, Gosnold sailed from Falmouth. England, in a small vessel, with twenty colonists and eight mariners. He took the proposed shorter route, and touched the continent near Nahant, Mass., it is supposed, eighteen days after his departure from England. Finding no good har-Gorton, Samuel, clergyman; born in bor there, he sailed southward, discovered England about 1600; was a clothier in and named Cape Cod, and landed there.

This was the first time the shorter (present) route from England to New York OF THE. EDWARD WINSLOW (q. v.), the and Boston had been traversed; and it was third governor of the Plymouth colony, the first time an Englishman set foot on England soil. passed Gosnold around the cape, and entered Buzzard's and when, in 1649, he went to England Bay, where he found an attractive group on account of the colony, he induced leadof Islands, and he named the westernmost Elizabeth, in honor of his Queen. The whole group bear that name. He and his followers landed on Elizabeth Island, and were charmed with the luxuriance of vegetation, the abundance of small fruits, and the general aspect of nature.

Gosnold determined to plant his colony there, and on a small rocky island, in the bosom of a great pond, he built a fort; and, had the courage of the colonists held out, Gosnold would have had the immortal honor of making the first perma-English settlement in America. Afraid of the Indians, fearing starvation, wondering what the winter would be, and disagreeing about the division of profits, they were seized with a depressing homesickness. So, loading the vessel with sassafras-root (then esteemed in Europe for its medicinal qualities), furs gathered from the natives, and other products, they abandoned the little paradise of beauty, and in less than four months after their departure from England they had returned; and, speaking in glowing terms of the land they had discovered, Raleigh advised the planting of settlements in that region, and British merchants afterwards undertook it. Elizabeth Island now bears its original name of Cottyunk. Gosnold soon afterwards organized a company for colonization in Virginia. charter was granted him and his associates by James I., dated April 10, 1606, the first under which the English were settled in America. He sailed Dec. 19, 1606, with three small vessels and 105 adventurers, of whom only twelve were laborers; and, passing between Capes Henry and Charles, went up the James River in April, 1607, and landed where they built Jamestown afterwards. The place was an unhealthful one, and Gosnold remonstrated against founding the settlement there, but in vain. Sickness and other causes destroyed nearly half the number before autumn. Among the victims was Gosnold, who died Aug. 22, 1607.

Gospel, Society for the Propagation became greatly interested in the spiritual concerns of the Indians of New England; ing men there to join in the formation of a society for the propagation of the Gospel among the natives in America. society soon afterwards began its work in America, and gradually extended its labors to other English colonies. In 1701 (June 16) it was incorporated under the title of the Society for the Propagation of the Gospel in Foreign Parts. William III. zealously promoted the operations of the society, for he perceived that in a community of religion there was security for political obedience. The society still exists, and its operations are widely extended over the East and West Indies. Southern Africa, Australia, and islands of the Southern Ocean.

cations include History of the American Banking System; Fiscal History of Texas, etc. He died in Trenton, N. J., July 14, 1863.

Gough, John Bartholomew, temperance lecturer; born in Sandgate, Kent, pression and imitation enabled him England, Aug. 22, 1817; was educated principally by his mother, and when twelve years old came to the United States. In 1831 he was employed in a publishing house in New York City, and there learned the bookbinding trade. In 1833 he lost his place and soon drifted into the worst habits of dissipation. For several years he spent his time in drinking resorts, making his meagre living by singing and by his wonderful powers of comic delineation. In 1842 he went to work in Worcester, Mass., where he was soon looked upon as a hopeless drunkard. In October of that year a little kindness extended to him by a Quaker led him to a temperance meeting, where he signed a pledge which he faithfully kept for several months, when some old companions

led him astray. He soon however, con- doba, in the Argentine Republic.

Department for thirty years. His publi- his life to the cause of temperance became irresistible. He left Worcester, and with a carpet-bag in hand travelled on foot through the New England States, lecturing wherever he could gain auditors. His intense earnestness and powers of exsway audiences in a manner attained by few speakers. For more than seventeen vears he lectured on temperance, speaking to more than 5,000 audiences. In 1854 ne went to England, intending to remain but a short time. His success, however, was so great that he stayed for two years. In 1857 he again went to England and lectured for three years. In 1859 he began to speak before lyceums on literary and social topics, though his chief subject was always temperance. He published a number of works, including Autobiography; Orations; Temperance Addresses; Temperance Lectures; and Sunlight and Shadow, or Gleanings from My Lifework. He died in Frankford, Pa., Feb. 18, 1886.

Gould, BENJAMIN APTHORP, astronomer; born in Boston, Mass., Sept. 1824; graduated at Harvard in 1844, and went abroad for further study in 1845. Returning to the United States in 1848 he settled in Cambridge, Mass., and early in 1849 started the Astronomical Journal, in which were published the results of many original investigations. In 1851 he took charge of the longitude operations of the United States Coast Survey. After the Atlantic cable was laid in 1866. he went to Valencia, Ireland, and founded a station where he could determine the difference in longitude between America and Europe. He also, by exact observations, connected the two These were the first determinations, by telegraph, of transatlantic longitude, and they resulted in founding a regular series of longitudinal measurements from Louisiana to the Ural Mountains. In 1856-59 Dr. Gould was director of the Dudley Observatory in Albany, N. Y. In this building the normal clock was first employed to give time throughout the observatory by telegraph. He later greatly improved this clock, which is now used in all parts of the world. In 1868 he organized and directed the national observatory at Corquered his appetite, and a desire to give there mapped out a large part of the

ordinances, and clauses in any law, statute or ordinance to the contrary of the aforesaid liberty, shall be esteemed as null and void.

XXXIX. That the Acts and Ordinances of Parliament made for the sale or other disposition of the lands, rents and hereditaments of the late King, Queen, and Prince, of Archbishops and Bishops, &c., Deans and Chapters, the lands of delinquents and forest-lands, or any of them, or of any other lands, tenements, rents and hereditaments belonging to the Commonwealth, shall nowise be impeached or made invalid, but shall remain good and firm; and that the securities given by any sum or sums of money, by any of the main firm and good, and not be made void and invalid upon any pretence whatsoever.

XL. That the Articles given to or made with the enemy, and afterwards confirmed by Parliament, shall be performed and made good to the persons concerned therein; and that such appeals as were depending in the last Parliament for relief concerning bills of sale of delinquent's estates, may be heard and determined the next Parliament, any thing in this writing or otherwise to the contrary notwithstanding.

XLI. That every successive Lord Protector over these nations shall take and subscribe a solemn oath, in the presence of the Council, and such others as they shall call to them, that he will seek the peace, quiet and welfare of these nations, cause law and justice to be equally administered; and that he will not violate or infringe the matters and things contained in this writing, and in all other things will, to his power and to the best of his understanding, govern these nations according to the laws, statutes and customs thereof.

XXXVIII. That all laws, statutes and ing to the best of their knowledge; and that in the election of every successive Lord Protector they shall proceed therein impartially, and do nothing therein for any promise, fear, favour or reward.

Government of the United States. See Calhoun, John Caldwell.

Grady, HENRY WOODFEN, journalist; born in Athens, Ga., in 1851; was educated in the universities of Georgia and Virginia, and entered journalism soon after the close of the Civil War. From the beginning he made a specialty of seeking the requirements of the South for its rehabilitation in prosperity. His early publications, relating to the resources and possibilities of the State of Georgia, were Act and Ordinance of Parliament for published in the Atlanta Constitution. The clearness and practical vein of these said lands, the exercise, or any other pub- letters attracted the attention of the editor lic revenue; and also the securities given of the New York Herald, who appointed by the public faith of the nation, and the Mr. Grady a correspondent for that paper. engagement of the public faith for satis- In 1872 he became interested in the Atfaction of debts and damages, shall re- lanta Herald, and in 1880 he bought a

In 1886 he ac- member the man whose wife sent him to cepted an invitation from the New Eng- a neighbor with a pitcher of milk, and land Society of New York to deliver the who, tripping on the top step, fell, with formal speech at its annual dinner (Dec. 22). He chose for his subject "The New South," and the speech in its composition and delivery gave him a sudden and wide fame as an orator. On Dec. 12, 1889, he delivered by invitation an address before the Merchants' Association in Boston on "The Future of the Negro," and this speech still farther increased his fame. He was ill at the time of its delivery, became worse before leaving Boston, and died in Athens, Ga., on the 23d of that month. The citizens of Atlanta, grateful frankness to judgment upon what I shall for what he had done for the city, State, and the South, testified their appreciation of his worth by erecting in that city the Grady Memorial Hospital, which was formally opened June 2, 1892.

The New South.—" There was a South of slavery and secession-that South is unto himself a wife, who was "-then There is a South of union and freedom-that South, thank God, is living, breathing, growing every hour." slaves to the South, the South was a slave tage he left me in his soldier's death. to the system. The old plantation, with the feet of that shaft I shall send my its simple police regulation and its feudal habit, was the only type possible under slavery. Thus was gathered in the hands of a splendid and chivalric oligarchy the substance that should have been diffused among the people, as the rich blood, under certain artificial conditions, is gathered at the heart, filling that with affluent rapture, but leaving the body chill and colorless.

The Old South rested everything on slavery and agriculture, unconscious that these neither give nor maintain healthy growth. The New South presents a perfect democracy, the oligarchs leading in the popular movement—a social system compact and closely knitted, less splendid on the surface but stronger at the core; a hundred farms for every plantation, fifty homes for every palace, and a diversified industry that meets the complex needs of this complex age.

The New South is enamored of her new work. Her soul is stirred with the breath of a new life. The light of a grander day is falling fair on her face. She is thrilling with the consciousness of a growing power and prosperity. As she stands upright, full-statured and equal among the people of the earth, breathing the keen air and looking out upon the expanding horizon, she understands that her emancipation came because, in the inscrutable wisdom of God, her honest purpose was crossed and her brave armies were beaten.

This is said in no spirit of time-serving or apology. The South has nothing for which to apologize. She believes that the late struggle between the States was war and not rebellion, revolution and not conspiracy, and that her convictions were as honest as yours. I should be unjust to the dauntless spirit of the South and to my own convictions if I did not make this plain in this presence. The South has nothing to take back. In my native town of Athens is a monument that crowns its central hills—a plain, white shaft. Deep cut into its shining side is a name dear to me above the names of men, that of a the grave-will she make this vision brave and simple man who died in brave on which the last sigh of his expiring and simple faith. Not for all the glories soul breathed a benediction, a cheat and of New England-from Plymouth Rock a delusion? If she does, the South, never all the way-would I exchange the heri- abject in asking for comradeship, must

children's children to reverence him who ennobled their name with his heroic blood. But, sir, speaking from the shadow of that memory, which I honor as I do nothing else on earth, I say that the cause in which he suffered and for which he gave his life was adjudged by higher and fuller wisdom than his or mine, and I am glad that the omniscient God held the balance of battle in His almighty hand, and that human slavery was swept forever from American soil—the American Union saved from the wreck of war.

This message, Mr. President, comes to you from consecrated ground. Every foot of the soil about the city in which I live is sacred as a battle-ground of the republic. Every hill that invests it is hallowed by the blood of your brothers who died for your victory, and doubly hallowed to us by the blood of those who died hopeless, but undaunted, in defeat sacred soil to all of us, rich with memories that make us purer and stronger and better, silent but stanch witnesses in its red desolation of the matchless valor of American hearts and the deathless glory of American arms—speaking an eloquent witness in its white peace and prosperity to the indissoluble union of American States and the unperishable brotherhood of the American people.

Now, what answer has New England to this message? Will she permit the prejudice of war to remain in the hearts of the conquerors, when it has died in the hearts of the conquered? Will she transmit this prejudice to the next generation, that in their hearts, which never felt the generous ardor of conflict, it may perpetuate itself? Will she withhold, save in strained courtesy, the hand which, straight from the soldier's heart, Grant offered to Lee at Appomattox? Will she make the vision of a restored and happy people, which gathered above the couch of your dying captain, filling his heart with grace, touching his lips with praise and glorifying his path to

GRAEBNER-GRAHAME

will and friendship, then will the prophecy of Webster, delivered in this very society forty years ago, amid tremendous applause, be verified in its fullest and final sense, when he said: "Standing hand to hand, and clasping hands, we should remain united as we have been for sixty years, citizens of the same country, members of the same government, united, all united now and united forever." There have been difficulties, contentions, and controversies, but I tell you that, in my judgment,

"Those opposed eyes, Which like the meteors of a troubled heaven, All of one nature, of one substance bred, Did lately meet in th' intestine shock, Shall now in mutual well beseeming ranks March all one way.'

Graebner, August L., theologian; born in Frankentrost, Mich., July 10, 1849; graduated at Concordia College, Fort Wayne, Ind., and at the Concordia Theological Seminary, St. Louis, where he became Professor of Theology in 1887. He is the author of History of the Lutheran Church in America; Half a Century of Sound Lutheranism in America, etc.

Graham, David, lawyer; born in London, England, Feb. 8, 1808; came to the United States with his father; was admitted to the bar and gained renown in his profession. He was the author of Practice of the Supreme Court of the State of New York; New Trials; Courts of Law and Equity in the State of New York, etc. He died in Nice, France, May 27, 1852.

Graham, George, lawyer; born in Dumfries, Va., about 1772; graduated at Columbia College in 1790; began the practice of law in Dumfries, but later settled in Fairfax county, where he recruited the "Fairfax Light-horse" which he led in the War of 1812. He was act-

accept with dignity its refusal; but if have been instrumental in saving the govshe does not-if she accepts with frank- ernment \$250,000 by successfully conness and sincerity this message of good-cluding the "Indian factorage" affairs. He died in Washington, D. C., in August, 1830.

Graham, JAMES DUNCAN, military officer; born in Prince William county, Va., April 4, 1799; graduated at the United States Military Academy in 1817; appointed a topographical engineer in 1829; made the survey of the northeast boundary of the United States; represented the United States under the treaty of Washington in determining the boundary between the United States and the British provinces, etc.; promoted colonel of engineers, June 1, 1863. He died in Boston, Mass., Dec. 28, 1865.

Graham, Joseph, military officer; born in Chester county, Pa., Oct. 13, 1759; removed to North Carolina at an early age. In 1778 he joined the Continental army and served through the remainder of the war with gallantry; in 1780 received three bullet wounds and six sabre-thrusts while guarding the retreat of Maj. W. R. Davie, near Charlotte; later, after his recovery, he defeated 600 Tories near Fayetteville with a force of 136 men. In 1814 he was commissioned major-general, when he led 1,000 men from North Carolina against the Creek Indians. He died in Lincoln county, N. C., Nov. 12, 1836.

Graham, WILLIAM ALEXANDER, Senator; born in Lincoln county, N. C., Sept. 5, 1804; graduated at the University of North Carolina in 1824; admitted to the bar; began practice in Hillsboro, N. C.; United States Senator in 1840-43; governor of North Carolina in 1844-48; and Secretary of the Navy in 1850-52. was a Senator in the Confederate Congress from 1864 until the close of the war. He died in Saratoga Springs, N. Y., Aug. 11, 1875.

Grahame, James, historian; born in Glasgow, Scotland, Dec. 21, 1790; graduated at Cambridge University; and ading Secretary of War in 1815-18; and was mitted to the Scottish bar in 1812. GRAND ARMY OF THE REPUBLIC

Grand Army of the Republic, THE. crease of membership followed, causing The order of the Grand Army of the Re- almost a total disruption of the order in public was organized in the State of Illi- the West. In May, 1869, a change in the nois, early in the year 1866. To Dr. B. F. ritual was made, providing for three Stephenson, of Springfield, Ill., belongs grades of membership, but this met with the honor of suggesting the formation little favor, and in 1871 all sections proof this union of veteran soldiers, and of viding for degrees or ranks among memlaunching the organization into exist- bers were stricken from the rules. At to afford assistance to disabled and un- hibiting the use of the organization for employed soldiers. Dr. Stephenson had any partisan purpose whatever, a prinbeen a surgeon in a volunteer regiment ciple which has ever since been strictly during the war, and was firmly convinced adhered to. Following is the record of that an organization of the returned the national encampments of the Grand volunteers, for mutual benefit, was imperatively needed. A ritual was drafted under his supervision, and the first post of the new order was formed at Decatur, Iil. Other posts were soon mustered throughout Illinois and contiguous States, and the first department (State) convention was held at Springfield, Ill., July 12, 1866. Gen. John M. Palmer was there elected department commander. Oct. 31, 1866, Dr. Stephenson, as provisional commander-in-chief, sent out an order to all the posts then formed, calling for the first national convention of the Grand Army of the Republic. This was held in Indianapolis, Ind., on Nov. 20 following, and representatives were present from the States of Illinois, Missouri, Kansas, Wisconsin, New York, Pennsylvania, Ohio, Iowa, Kentucky, Indiana, and the District of Columbia. Gen. S. A. Hurlbut was elected as commander-in-chief. During the year 1867 the order spread rapidly. The various States completed their work of department organization, and posts were formed in all the large cities and in many coun-The second national encampment, meeting in Philadelphia, Pa., Jan. 15, 1868, found the order in a most promising condition. In 1868, the first observance of May 30 as a memorial day by the Grand Army was ordered, and on May 11, 1870, May 30 was fixed upon for the annual observance by an article adopted as part of the rules and regulations of the order. Unfortunately, during the warmly contested political campaign of 1868, the idea that the Army was intended as a political organization gained currency, with the result of injuring the order greatly. A heavy de-

he had done at Vicksburg and Warrenton, while the army (on the west side of the river) should move down to Rodney, below, where it might cross without much opposition. At six o'clock in the evening, under cover of a heavy fire from the fleet, all the transports passed by in good condition.

Grand Remonstrance, THE. This remarkable document was a statement of the cause of the British Parliament against King Charles I., and was laid before the House of Commons by John Pym in November, 1641. It was adopted after a few days' debate, and was presented to the King on Dec. 1. As a reply, the King undertook the arrest and impeachment of Pym and four of his most Grand Gulf, BATTLE AT. On the morn- active associates on Jan. 3, 1642; withing of April 29, 1863, Admiral Porter at- drew from London in the following week. tacked the Confederate batteries at Grand On Aug. 9 the King issued a proclama-Gulf, on the Mississippi, and after a con-tion "for suppressing the present rebeltest of over five hours silenced the lower lion under the command of Robert, Earl batteries. The remonstrance and its introductory

Most Gracious Sovereign,-Your Majesty's most humble and faithful subjects the Commons in this present Parliament assembled, do with much thankfulness

* Died Feb. 5, 1899.

and favour of God, in giving your Maj- grievous affliction of your loyal subjects, esty a safe and peaceful return out of have so far prevailed as to corrupt divers Scotland into your kingdom of England, of your Bishops and others in prime where the pressing dangers and dis-places of the Church, and also to bring tempers of the State have caused us with divers of these instruments to be of your much earnestness to desire the comfort of Privy Council, and other employments of your gracious presence, and likewise the trust and nearness about your Majesty, unity and justice of your royal authority, to give more life and power to the dutiful and loyal counsels and endeavours of your Parliament, for the prevention of that eminent ruin and destruction wherein your kingdoms of England and Scotland are threatened. The duty which we owe to your Majesty and our country, cannot war betwixt your kingdoms of England but make us very sensible and apprehensive, that the multiplicity, sharpness and betwixt your Majesty and your most malignity of those evils under which we obedient subjects, the violent distraction have now many years suffered, are fo- and interruption of this Parliament, the mented and cherished by a corrupt and ill-affected party, who amongst other their mischievous devices for the alteration of religion and government, have sought by deavoured and attempted, but in a great many false scandals and imputations, dispersed insinuated and cunningly amongst the people, to blemish and dis- whereof, your poor subjects are enforced grace our proceedings in this Parliament, and to get themselves a party and faction amongst your subjects, for the better strengthening themselves in their wicked courses, and hindering those provisions and remedies which might, by the wisdom of your Majesty and counsel of your Parliament, be opposed against them.

For preventing whereof, and the better information of your Majesty, your Peers and all other your loyal subjects, we have been necessitated to make a declaration of the state of the kingdom, both before and since the assembly of this Parliament, unto this time, which we do humbly present to your Majesty, without the least intention to lay any blemish upon your royal person, but only to represent how your royal authority and trust have been abused, to the great prejudice and danger of your Majesty, and of all your good sub-

And because we have reason to believe that those malignant parties, whose proceedings evidently appear to be mainly for the advantage and increase of Popery, is composed, set up, and acted by the sub- moderate power usurped over the Clergy, tile practice of the Jesuits and other engi- and other your good subjects, which they neers and factors for Rome, and to the have perniciously abused to the hazard

and joy acknowledge the great mercy great danger of this kingdom, and most the Prince, and the rest of your royal children.

> And by this means have had such an operation in your counsel and the most important affairs and proceedings of your government, that a most dangerous division and chargeable preparation for and Scotland, the increase of jealousies insurrection of the Papists in your kingdom of Ireland, and bloody massacre of your people, have been not only enmeasure compassed and effected.

> For preventing the final accomplishment to engage their persons and estates to the maintaining of a very expensive and dangerous war, notwithstanding have already since the beginning of this Parliament undergone the charge of £150,-000 sterling, or thereabouts, for the necessary support and supply of your Majesty in these present and perilous designs. And because all our most faithful endeavours and engagements will be ineffectual for the peace, safety and preservation of your Majesty and your people, if some present, real and effectual course be not taken for suppressing this wicked and malignant party:-

We, your most humble and obedient subjects, do with all faithfulness and humility beseech your Majesty,-

1. That you will be graciously pleased to concur with the humble desires of your people in a parliamentary way, for the preserving the peace and safety of the kingdom from the malicious designs of the Popish party:-

For depriving the Bishops of their votes in Parliament, and abridging their im-

pression of the laws of the kingdom, and just liberty of your people:-

For the taking away such oppressions in religion, Church government and discipline, as have been brought in and foment-

ed by them:-

For uniting all such your loyal subjects together as join in the same fundamental truths against the Papists, by removing some oppressions and unnecessary ceremonies by which divers weak consciences have been scrupled, and seem to be divided from the rest, and for the due execution of those good laws which have been made for securing the liberty of your subjects.

2. That your Majesty will likewise be pleased to remove from your council all such as persist to favour and promote any of those pressures and corruptions wherein your people have been grieved, and that for the future your Majesty will vouchsafe to employ such persons in your great and public affairs, and to take such to be near you in places of trust, as your Parliament may have cause to confide in; that in your princely goodness to your people you will reject and refuse all mediation and solicitation to the contrary, how powerful and near soever.

3. That you will be pleased to forbear to alienate any of the forfeited and escheated lands in Ireland which shall accrue to your Crown by reason of this rebellion, that out of them the Crown may be the better supported, and some satisfaction made to your subjects of this kingdom for the great expenses they are like

to undergo [in] this war.

Which humble desires of ours being graciously fulfilled by your Majesty, we will, by the blessing and favour of God, most cheerfully undergo the hazard and expenses of this war, and apply ourselves to such other courses and counsels as may support your real estate with honour and plenty at home, with power and reputation abroad, and by our loyal affections, obedience and service, lay a sure and lasting foundation of the greatness and prosperity of your Majesty, and your royal prosperity in future times.

The Grand Remonstrance.—The Commons in this present Parliament assembled, having with much earnestness laws, as the obstacles of that change and

of religion, and great prejudice and op- and faithfulness of affection and zeal to the public good of this kingdom, and His Majesty's honour and service for the space of twelve months, wrestled with great dangers and fears, the pressing miseries and calamities, the various distempers and disorders which had not only assaulted, but even overwhelmed and extinguished the liberty, peace and prosperity of this kingdom, the comfort and hopes of all His Majesty's good subjects, and exceedingly weakened and undermined the foundation and strength of his own royal throne, do yet find an abounding malignity and opposition in those parties and factions who have been the cause of those evils, and do still labour to cast aspersions upon that which hath been done, and to raise many difficulties for the hindrance of that which remains yet undone, and to foment jealousies between the King and Parliament, that so they may deprive him and his people of the fruit of his own gracious intentions, and their humble desires of procuring the public peace, safety and happiness of this realm.

For the preventing of those miserable effects which such malicious endeavours may produce, we have thought good to declare the root and the growth of these mischievous designs: the maturity and ripeness to which they have attained before the beginning of the Parliament: the effectual means which have been used for the extirpation of those dangerous evils, and the progress which hath therein been made by His Majesty's goodness and the wisdom of the Parliament: the ways of obstruction and opposition by which that progress hath been interrupted: courses to be taken for the removing those obstacles, and for the accomplishing of our most dutiful and faithful intentions and endeavours of restoring and establishing the ancient honour, greatness and security of this Crown and nation.

The root of all this mischief we find to be a malignant and pernicious design of subverting the fundamental laws and principles of government, upon which the religion and justice of this kingdom are The actors and profirmly established. moters hereof have been:

1. The Jesuited Papists, who hate the

2. The Bishops, and the corrupt part of the Clergy, who cherish formality and As in all compounded bodies the oper-superstition as the natural effects and ations are qualified according to the pre-more probable supports of their own dominant element, so in this mixed party, ecclesiastical tyranny and usurpation.

private ends have engaged themselves to further the interests of some foreign princes or states to the prejudice of His Majesty and the State at home.

The common principles by which they moulded and governed all their particular

counsels and actions were these:

First, to maintain continual differences and discontents between the King and the King James, and by His Majesty's marpeople, upon questions of prerogative and riage with France; the interests and counliberty, that so they might have the ad- sels of that State being not so contrary to vantage of siding with him, and under the good of religion and the prosperity of the notions of men addicted to his service, gain to themselves and their parties the Papists of England, having been ever more places of greatest trust and power in the addicted to Spain than France, yet they kingdom.

A second, to suppress the purity and power of religion, and such persons as were best affected to it, as being contrary to their own ends, and the greatest impediment to that change which they

thought to introduce.

A third, to conjoin those parties of the kingdom which were most propitious to their own ends, and to divide those who were most opposite, which consisted in

many particular observations.

To cherish the Arminian part in those points wherein they agree with the help of our shipping, set forth and de-Papists, to multiply and enlarge the difference between the common Protestants and those whom they call Puritans, to introduce and countenance such opinions and ceremonies as are fittest for accommodation with Popery, to increase and all the strength and security of the Protmaintain ignorance, looseness and profaneness in the people; that of those three parties, Papists, Arminians and Liber- of wars from the West Indies, which was tines, they might compose a body fit to the most facile and hopeful way for this most conducible to their own ends.

liaments by slander and false imputations, ed as if it had rather been intended to and by putting him upon other ways of make us weary of war than to prosper supply, which in show and appearance in it. were fuller of advantage than the ordinary course of subsidies, though in truth they by taking their ships to a great value brought more loss than gain both to the without making recompense to the Eng-

subversion of religion which they so much King and people, and have caused the great distractions under which we both suffer.

the Jesuited counsels, being most active 3. Such Councillors and Courtiers as for and prevailing, may easily be discovered to have had the greatest sway in all their determinations, and if they be not prevented, are likely to devour the rest, or to turn them into their own nature.

In the beginning of His Majesty's reign the party began to revive and flourish again, having been somewhat damped by the breach with Spain in the last year of this kingdom as those of Spain; and the still retained a purpose and resolution to weaken the Protestant parties in all parts, and even in France, whereby to make way for the change of religion which they intended at home.

- 1. The first effect and evidence of their recovery and strength was the dissolution of the Parliament at Oxford, after there had been given two subsidies to His Majesty, and before they received relief in any one grievance many other more miserable effects followed.
- 2. The loss of the Rochel fleet, by the livered over to the French in opposition to the advice of Parliament, which left that town without defence by sea, and made way not only to the loss of that important place, but likewise to the loss of estant religion of France.
- 3. The diverting of His Majesty's course act such counsels and resolutions as were kingdom to prevail against the Span-most conducible to their own ends. iard, to an expenseful and successless A fourth, to disaffect the King to Par- attempt upon Cadiz, which was so order-
 - 4. The precipitate breach with France,

and confiscated in that kingdom.

- 5. The peace with Spain without consent of Parliament, contrary to the promise of King James to both Houses, whereby the Palatine's cause was deserted and left to chargeable and hopeless treaties, which for the most part were managed by those who might justly be suspected to be no friends to that cause.
- 6. The charging of the kingdom with billeted soldiers in all parts of it, and the concomitant design of German horse, that the land might either submit with fear or be enforced with rigour to such arbitrary contributions as should be required of
- 7. The dissolving of Parliament in the second year of His Majesty's reign, after a declaration of their intent to grant five subsidies.
- 8. The exacting of the like proportion of five subsidies, after the Parliament dissolved, by commission of loan, and divers gentlemen and others imprisoned for not yielding to pay that loan, whereby many of them contracted such sicknesses as cost them their lives.
- 9. Great sums of money required and raised by privy seals.
- 10. An unjust and pernicious attempt to extort great payments from the subject by way of excise, and a commission issued under the seal to that purpose.
- 11. The Petition of Right, which was granted in full Parliament, blasted, with an illegal declaration to make it destructive to itself, to the power of Parliament, to the liberty of the subject, and to that purpose printed with it, and the Petition made of no use but to show the bold and presumptuous injustice of such ministers as durst break the laws and suppress the liberties of the kingdom, after they had been so solemnly and evidently declared.
- 12. Another Parliament dissolved Car., the privilege of Parliament broken, by imprisoning divers members of the House, detaining them close prisoners for many months together, without the liberty of using books, pen, ink or paper; denying them all the comforts of life, all means of preservation of health, not permitting their wives to come unto them even in the time of their sickness.

lish, whose goods were thereupon imbarred cruelty, after years spent in such miserable durance, depriving them of the necessary means of spiritual consolation, not suffering them to go abroad to enjoy God's ordinances in God's House, or God's ministers to come to them to minister comfort to them in their private chambers.

- 14. And to keep them still in this oppressed condition, not admitting them to be bailed according to law, yet vexing them with informations in inferior courts, sentencing and fining some of them for matters done in Parliament; and extorting the payments of those fines from them, enforcing others to put in security of good behavior before they could be released.
- 15. The imprisonment of the rest, which refused to be bound, still continued, which might have been perpetual if necessity had not the last year brought another Parliament to relieve them, of whom one died by the cruelty and harshness of his imprisonment, which would admit of no relaxation, notwithstanding the imminent danger of his life did sufficiently appear by the declaration of his physician, and his release, or at least his refreshment, was sought by many humble petitions, and his blood still cries either vengeance or repentance of those Ministers of State, who have at once obstructed the course both of His Majesty's justice and mercy.
- 16. Upon the dissolution of both these Parliaments, untrue and scandalous declarations were published to asperse their proceedings, and some of their members unjustly; to make them odious, and colour the violence which was used against them: proclamations set out to the same purpose; and to the great dejecting of the hearts of the people, forbidding them even to speak of Parliaments.
- 17. After the breach of the Parliament in the fourth of His Majesty, injustice, oppression and violence broke in upon us without any restraint or moderation, and yet the first project was the great sums exacted thorough the whole kingdom for default of knighthood, which seemed to have some colour and shadow of a law, yet if it be rightly examined by that obsolete law which was pretended for it, it will be found to be against all the rules 13. And for the completing of that of justice, both in respect of the persons

charged, the proportion of the fines demanded, and the absurd and unreasonable

manner of their proceedings.

18. Tonnage and Poundage hath been received without colour or pretence of law; many other heavy impositions continued against law, and some so unreasonable that the sum of the charge exceeds the value of the goods.

19. The Book of Rates lately enhanced a high proportion, and such merchants that would not submit to their illegal and unreasonable payments, were vexed and oppressed above measure; and the ordinary course of justice, the common birthright of the subject of England,

wholly obstructed unto them.

- 20. And although all this was taken upon pretence of guarding the seas, yet a new unheard-of tax of ship-money was devised, and upon the same pretence, by both of which there was charged upon the subject near £700,000 some years, and yet the merchants have been left so naked to the violence of the Turkish pirates, that many great ships of value and thousands of His Majesty's subjects have been taken by them, and do still remain in miserable slavery.
- 21. The enlargements of forests, contrary to Carta de Foresta, and the composition thereupon.
- 22. The exactions of coat and conduct money and divers other military charges.
- 23. The taking away the arms trained bands of divers counties.
- 24. The desperate design of engrossing all the gunpowder into one hand, keeping it in the Tower of London, and setting so high a rate upon it that the poorer sort were not able to buy it, nor could any have it without license, thereby to leave the several parts of the kingdom destitute of their necessary defence, and by selling so dear that which was sold to make an unlawful advantage of it, to the great charge and detriment of the subject.
- 25. The general destruction of the King's timber, especially that in the Forest of Deane, sold to Papists, which was the best store-house of this kingdom for the maintenance of our shipping.
- 26. The taking away of men's right, under the colour of the King's title to but for divers other causes where there land, between high and low water marks. hath been no offence, or very small;

- 27. The monopolies of soap, salt, wine, leather, sea-coal, and in a manner of all things of most common and necessary
- 28. The restraint of the liberties of the subjects in their habitation, trades and other interests.
- 29. Their vexation and oppression by purveyors, clerks of the market and saltpetre men.
- 30. The sale of pretended nuisances, as building in and about London.
- 31. Conversion of arable into pasture, continuance of pasture, under the name of depopulation, have driven many millions out of the subjects' purses, without any considerable profit to His Maj-
- 32. Large quantities of common and several grounds hath been taken from the subject by colour of the Statute of Improvement, and by abuse of the Commission of Sewers, without their consent, and against it.
- 33. And not only private interest, but also public faith, have been broken in seizing of the money and bullion in the mint, and the whole kingdom like to be robbed at once in that abominable project of brass money.
- 34. Great numbers of His Majesty's subjects for refusing those unlawful charges, have been vexed with long and expensive suits, some fined and censured, others committed to long and hard imprisonments and confinements, to the loss of health in many, of life in some, and others have had their houses broken up, their goods seized, some have been restrained from their lawful callings.

35. Ships have been interrupted in their voyages, surprised at sea in a hostile manner by projectors, as by a common enemy.

36. Merchants prohibited to unlade their goods in such ports as were for their own advantage, and forced to bring them to those places which were much for the advantage of the monopolisers and projectors.

37. The Court of Star Chamber hath abounded in extravagant censures, not only for the maintenance and improvement of monopolies and other unlawful taxes,

whereby His Majesty's subjects have been oppressed by grievous fines, imprisonments, stigmatisings, mutilations, whippings, pillories, gags, confinements, banishments; after so rigid a manner as hath not only deprived men of the society of their friends, exercise of their professions, comfort of books, use of paper or ink, but even violated that near union which God hath established between men and their wives, by forced and constrained separation, whereby they have been bereaved of the comfort and conversation one of another for many years together, without hope of relief, if God had not by His overruling providence given some interruption to the prevailing power, and counsel of those who were the authors and promoters of such peremptory and heady courses.

38. Judges have been put out of their places for refusing to do against their oaths and consciences; others have been so awed that they durst not do their duties, and the better to hold a rod over them, the clause Quam diu se bene gesserit was left out of their patents, and a new clause, Durante bene placito, inserted.

39. Lawyers have been checked for being faithful to their clients; solicitors and attorneys have been threatened, and some punished, for following lawful suits. And by this means all the approaches to justice were interrupted and forecluded.

40. New oaths have been forced upon

the subject against law.

41. New judicatories erected without orders offered to bind the subjects in their freeholds, estates, suits and actions.

42. The pretended Court of the Earl Marshal was arbitrary and illegal in its

being and proceedings.

- 43. The Chancery, Exchequer Chamber, Court of Wards, and other English Courts, have been grievous in exceeding their jurisdiction.
- 44. The estate of many families weakened, and some ruined by excessive fines, exacted from them for compositions of wardships.
- 45. All leases of above a hundred years made to draw on wardship contrary to
- 46. Undue proceedings used in the findthe King.

47. The Common Law Courts, feeling all men more inclined to seek justice there, where it may be fitted to their own desire. are known frequently to forsake the rules of the Common Law, and straying beyond their bounds, under pretence of equity, to do injustice.

48. Titles of honour, judicial places, sergeantships at law, and other offices have been sold for great sums of money, whereby the common justice of the kingdom hath been much endangered, not only by opening a way of employment in places of great trust, and advantage to men of weak parts, but also by giving occasion to bribery, extortion, partiality, it seldom happening that places ill-gotten are well used.

49. Commissions have been granted for examining the excess of fees, and when great exactions have been discovered, compositions have been made with delinquents, not only for the time past, but likewise for immunity and security in offending for the time to come, which under colour of remedy hath but confirmed and increased the grievance to the subject.

50. The usual course of pricking Sheriffs not observed, but many times Sheriffs made in an extraordinary way, sometimes as a punishment and charge unto them; sometimes such were pricked out as would be instruments to execute whatsoever they would have to be done.

51. The Bishops and the rest of the The Council Table have by their Clergy did triumph in the suspensions, excommunications, deprivations, and degradations of divers painful, learned and pious ministers, in the vexation and grievous oppression of great numbers of His-Majesty's good subjects.

52. The High Commission grew to such

excess of sharpness and severity as was not much less than the Romish Inquisition, and yet in many cases by the Archbishop's power was made much more heavy, being assisted and strengthened by

authority of the Council Table.

53. The Bishops and their Courts were as eager in the country; although their jurisdiction could not reach so high in rigour and extremity of punishment, yet were they no less grievous in respect of ing of officers to make the jury find for the generality and multiplicity of vexations, which lighting upon the meaner

sort of tradesmen and artificers did impoverish many thousands.

54. And so afflict and trouble others, that great numbers to avoid their miseries departed out of the kingdom, some into New England and other parts of America, others into Holland.

55. Where they have transported their manufactures of cloth, which is not only a loss by diminishing the present stock of the kingdom, but a great mischief by impairing and endangering the loss of that particular trade of clothing, which hath thought necessary to reduce Scotland to been a plentiful fountain of wealth and honour to this nation.

56. Those were fittest for ecclesiastical preferment, and soonest obtained it, who were most officious in promoting superstition, most virulent in railing against godliness and honestv.

57. The most public and solemn sermons before His Majesty were either to advance prerogative above law, and decry the property of the subject, or full of such kind of invectives.

58. Whereby they might make those odious who sought to maintain the re- gether, and ready for a bloody encounter, ligion, laws and liberties of the kingdom, His Majesty's own gracious disposition, and such men were sure to be weeded out and the counsel of the English nobility of the commission of the peace, and out and dutiful submission of the Scots, did of all other employments of power in the so far prevail against the evil counsel of government of the country.

59. Many noble personages were coun- His Majesty returned with peace and cillors in name, but the power and author- much honour to London. ity remained in a few of such as were most addicted to this party, whose resolu- most acceptable to all the kingdom, extions and determinations were brought to cept to the malignant party; whereof the the table for countenance and execution, Archbishop and the Earl of Strafford and not for debate and deliberation, and being heads, they and their faction begun no man could offer to oppose them with- to inveigh against the peace, and to agout disgrace and hazard to himself.

61. This faction was grown to that height and entireness of power, that now Majesty to call a Parliament, not to seek they began to think of finishing their counsel and advice of them, but to draw work, which consisted of these three parts. countenance and supply from them, and

from all restraint of laws concerning our quarrel. persons and estates.

63. II. There must be a conjunction between Papists and Protestants in doctrine, discipline and ceremonies; only it must not yet be called Popery.

64. III. The Puritans. under name they include all those that desire to preserve the laws and liberties of the kingdom, and to maintain religion in the power of it, must be either rooted out of the kingdom with force, or driven out with fear.

65. For the effecting of this it was such Popish superstitions and innovations as might make them apt to join with England in that great change which was intended.

66. Whereupon new canons and a new liturgy were pressed upon them, and when they refused to admit of them, an army was raised to force them to it, towards which the Clergy and the Papists were very forward in their contribution.

67. The Scots likewise raised an army for their defence.

68. And when both armies were come toothers, that a pacification was made, and

69. The unexpected reconciliation was gravate the proceedings of the states, 60. Nay, all those that did not wholly which so increased His Majesty, that he

70. And such was their confidence, that to a right frame and temper again.

71. To which end they persuaded His 62. I. The government must be set free to engage the whole kingdom in their

72. And in the meantime continued all

their unjust levies of money, resolving either to make the Parliament pliant to the King to break off the Parliament and their will, and to establish mischief by a to return to the ways of confusion, in law, or else to break it, and with more colour to go on by violence to take what they could not obtain by consent. The ground alleged for the justification of this war was this,

73. That the undutiful demands of the Parliaments in Scotland was a sufficient reason for His Majesty to take arms against them, without hearing the reason of those demands, and thereupon a new army was prepared against them, their ships were seized in all ports both of England and Ireland, and at sea, their petitions rejected, their commissioners refused audience.

74. The whole kingdom most miserably distempered with levies of men and money, and imprisonments of those who denied to submit to those levies.

75. The Earl of Strafford passed into Ireland, caused the Parliament there to declare against the Scots, to give four subsidies towards that war, and to engage themselves, their lives and fortunes, for the prosecution of it, and gave directions for an army of eight thousand foot and one thousand horse to be levied there, which were for the most part Papists.

76. The Parliament met upon the 13th of April, 1640. The Earl of Strafford and Archbishop of Canterbury, with their party, so prevailed with His Majesty, that the House of Commons was pressed to yield a supply for maintenance of the war with Scotland, before they had provided any relief for the great and pressing grievances of the people, which being against the fundamental privilege and proceeding of Parliament, was yet in humble respect to His Majesty, so far admitted as that they agreed to take the two several days it was debated.

77. Twelve subsidies were demanded for day was appointed for conclusion, when ing them very much indisposed to give troduced without warrant of law. any countenance to that war.

78. Thereupon they wickedly advised which their own evil intentions were most likely to prosper and succeed.

79. After the Parliament ended 5th of May, 1640, this party grew so bold as to counsel the King to supply himself out of his subjects' estates by his own power, at his own will, without their consent.

80. The very next day some members of both Houses had their studies and cabinets, yea, their pockets searched: another of them not long after was committed close prisoner for not delivering some petitions which he received by authority of that House.

81. And if harsher courses were intended (as was reported) it is very probable that the sickness of the Earl of Strafford, and the tumultuous rising in Southwark and about Lambeth were the causes that such violent intentions were not brought to execution.

82. A false and scandalous Declaration against the House of Commons was published in His Majesty's name, which yet wrought little effect with the people, but only to manifest the impudence of those who were authors of it.

83. A forced loan of money was attempted in the City of London.

84. The Lord Mayor and Aldermen in their several wards, enjoined to bring in a list of the names of such persons as they judged fit to lend, and of the sums they should lend. And such Aldermen as refused to do so were committed to prison.

the 85. The Archbishop and Bishops and Clergy continued the Convocation, and by a new commission turned it into a provincial Synod, in which, by an unheard-of presumption, they made matter of supply into consideration, and canons that contain in them many matters contrary to the King's prerogative, to the fundamental laws and statutes of the the release of ship-money alone, a third realm, to the right of Parliaments, to the property and liberty of the subject, and the heads of that party begun to fear the matters tending to sedition and of danpeople might close with the King, in gerous consequence, thereby establishing falsifying his desires of money; but that their own usurpations, justifying their withal they were like to blast their altar-worship, and those other superstimalicious designs against Scotland, find- tious innovations which they formerly in-

86. They imposed a new oath upon

ecclesiastical and lay, for maintenance of them according to private instructions, their own tyranny, and laid a great tax which we doubt were framed for the adon the Clergy, for supply of His Majesty, and generally they showed themselves very affectionate to the war with Scotland, which was by some of them styled Bellum Episcopale, and a prayer composed and enjoined to be read in all churches, calling the Scots rebels, to put the two nations in blood and make them irreconcileable.

stitutions were armed with the several censures of suspension, excommunication, deprivation, by which they would have commitments; many of the Sheriffs sumthrust out all the good ministers, and moned into the Star Chamber, and some most of the well-affected people of the imprisoned for not being quick enough kingdom, and left an easy passage to their own design of reconciliation with Rome.

88. The Popish party enjoyed such exemptions from penal laws as amounted to a toleration, besides many other encour- their silence and patience, and sensible agements and Court favours.

Francis Windebanck, a powerful agent for ancient of them did petition His Majesty

speeding all their desires.

act and govern them according to such in- pect more hazard to themselves, than refluences as he received from Rome, and to dress of those public evils for which they intercede for them with the most powerful concurrence of the foreign Princes of that religion.

sorts, nobility, gentry, and clergy were the loss of many of their ships, bereaved

that secretly a commission was issued out, ber then following. or intended to be issued to some great 103. The Scots, the first day of the men of that profession, for the levying of Great Council, presented an humble Pe-

divers of His Majesty's subjects, both soldiers, and to command and employ vantage of those who were the contrivers of them.

> 95. His Majesty's treasure was consumed, his revenue anticipated.

> 96. His servants and officers compelled to lend great sums of money.

97. Multitudes were called Council Table, who were tired with long 87. All those pretended canons and con- attendances there for refusing illegal payments.

> 98. The prisons were filled with their in levying the ship-money; the people languished under grief and fear, no visible hope being left but in desperation.

99. The nobility began to weary of of the duty and trust which belongs to 89. They had a Secretary of State, Sir them: and thereupon some of the most at such a time, when evil counsels were 90. A Pope's Nuncio residing here, to so strong, that they had occasion to exinterceded.

100. Whilst the kingdom was in this agitation and distemper, the Scots, re-91. By his authority the Papists of all strained in their trades, impoverished by convocated after the manner of a Parlia- of all possibility of satisfying His Majesty by any naked supplication, entered 92. New jurisdictions were erected of with a powerful army into the kingdom,

101. But duty and reverence to His by the King had leisure to entertain bet-

102. Wherein God so blessed and dithe 24th of September, and there declared 94. And such power had they at Court, a Parliament to begin the 3d of Novem-

tition to His Majesty, whereupon the Treaty was appointed at Ripon.

104. A present cessation of arms agreed upon, and the full conclusion of all differences referred to the wisdom and care of the Parliament.

105. At our first meeting, all oppositions seemed to vanish, the mischiefs were so evident which those evil counsellors produced, that no man durst stand up to defend them: yet the work itself afforded difficulty enough.

106. The multiplied evils and corruption of fifteen years, strengthened by custom and authority, and the concurrent interest of many powerful delinquents, were now to be brought to judgment and

reformation.

107. The King's household was to be provided for:—they had brought him to that want, that he could not supply his ordinary and necessary expenses without the assistance of his people.

108. Two armies were to be paid, which amounted very near to eighty thousand

pounds a month.

109. The people were to be tenderly charged, having been formerly exhausted

with many burdensome projects.

110. The difficulties seemed to be insuperable, which by the Divine Providence we have overcome. The contrarieties incompatible, which yet in a great measure we have reconciled.

111. Six subsidies have been granted and a Bill of poll-money, which if it be duly levied, may equal six subsidies more, in all £600,000.

112. Besides we have contracted a debt to the Scots of £220,000, yet God hath so blessed the endeavours of this Parliament, that the kingdom is a great gainer by all these charges.

113. The ship-money is abolished, which cost the kingdom about £200,000 a year.

114. The coat and conduct-money, and other military charges are taken away, which in many countries amounted to little less than the ship-money.

115. The monopolies are all suppressed, whereof some few did prejudice the sub-

ject, above £1,000,000 yearly. 116. The soap £100,000.

117. The wine £300,000.

118. The leather must needs exceed both, and salt could be no less than that.

119. Besides the inferior monopolies, which, if they could be exactly computed, would make up a great sum.

120. That which is more beneficial than all this is, that the root of these evils is taken away, which was the arbitrary power pretended to be in His Majesty of taxing the subject, or charging their estates without consent in Parliament, which is now declared to be against law by the judgment of both Houses, and likewise by an Act of Parliament.

121. Another step of great advantage is this, the living grievances, the evil counsellors and actors of these mischiefs

have been so quelled.

122. By the justice done upon the Earl of Strafford, the flight of the Lord Finch and Secretary Windebanck.

123. The accusation and imprisonment of the Archbishop of Canterbury, of

Judge Berkeley; and

124. The impeachment of divers other Bishops and Judges, that it is like not only to be an ease to the present times, but a preservation to the future.

125. The discontinuance of Parliaments is prevented by the Bill for a triennial Parliament, and the abrupt dissolution of this Parliament by another Bill, by which it is provided it shall not be dissolved or adjourned without the consent of both Houses.

126. Which two laws well considered may be thought more advantageous than all the former, because they secure a full operation of the present remedy, and afford a perpetual spring of remedies for the future.

127. The Star Chamber.

128. The High Commission.

129. The Courts of the President and Council in the North were so many forges of misery, oppression and violence, and are all taken away, whereby men are more secured in their persons, liberties and estates, than they could be by any law or example for the regulation of those Courts or terror of the Judges.

130. The immoderate power of the Council Table, and the excessive abuse of that power is so ordered and restrained, that we may well hope that no such things as were frequently done by them, to the prejudice of the public liberty, will appear in future times but only in stories,

to give us and our posterity more occasion government of the kingdom, may be more to praise God for His Majesty's goodness, and the faithful endeavours of this Parliament.

131. The canons and power of canonmaking are blasted by the votes of both

132. The exorbitant power of Bishops and their courts are much abated, by some provisions in the Bill against the High Commission Court, the authors of the of our manufactures, and well balancing many innovations in doctrine and ceremonies.

dalous in their lives, have been so terri- it hath done for many years last past. fled in just complaints and accusations, that we may well hope they will be more our coasts, which will be of mighty use modest for the time to come; either inwardly convicted by the sight of their own folly, or outwardly restrained by the fear of punishment.

134. The forests are by a good law reduced to their right bounds.

135. The encroachments and oppressions of the Stannary Courts, the extortions of the clerk of the market.

136. And the compulsion of the subject to receive the Order of Knighthood against his will, paying of fines for not receiving it, and the vexatious proceedings thereupon for levying of those fines, are by other beneficial laws reformed and prevented.

137. Many excellent laws and provisions are in preparation for removing the inordinate power, vexation and usurpation of Bishops, for reforming the pride and idleness of many of the clergy, for easing the people of unnecessary ceremonies in religion, for censuring and removing unworthy and unprofitable ministers, and for maintaining godly and diligent preachers through the kingdom.

for the good of this kingdom are in relief of the Northern Counties; this proposition, though little could hith- was given to the King, for he was bound erto be done in regard of the many other to protect his subjects. more pressing businesses, which yet before the end of this Session we hope counsellors, and their ill instruments may receive some progress and perfection.

139. The establishing and ordering the King's revenue, that so the abuse of offi- those who were the authors of this war cers and superfluity of expenses may be to make satisfaction, as he might justly cut off, and the necessary disbursements and easily do, it seems very reasonable for His Majesty's honour, the defence and that the people might well be excused

certainly provided for.

140. The regulating of courts of justice. and abridging both the delays and charges of law-suits.

141. The settling of some good courses for preventing the exportation of gold and silver, and the inequality of exchanges between us and other nations, for the advancing of native commodities, increase of trade, whereby the stock of the kingdom may be increased, or at least kept 133. The ministers that have been scan- from impairing, as through neglect hereof

142. Improving the herring-fishing upon in the employment of the poor, and plentiful nursery of mariners for enabling the kingdom in any great action.

143. The oppositions, obstructions and other difficulties wherewith we have been encountered, and which still lie in our way with some strength and much obstinacy, are these: the malignant party whom we have formerly described to be the actors and promoters of all our misery, they have taken heart again.

144. They have been able to prefer some of their own factors and agents to degrees of honour, to places of trust and employment, even during the Parliament.

145. They have endeavoured to work in His Majesty ill impressions and opinions of our proceedings, as if we had altogether done our own work, and not his; and had obtained from him many things very prejudicial to the Crown, both in respect of prerogative and profit.

146. To wipe out this slander we think good only to say thus much: that all that we have done is for His Majesty, his greatness, honour and support, when we 138. Other things of main importance yield to give £25,000 a month for the

147. They were His Majesty's evil that were actors in those grievances which brought in the Scots.

148. And if His Majesty please to force

altogether innocent and free from being execution of it for this time and occasion any cause of it.

149. When we undertook the charge of the army, which cost above £50,000 a month, was not this given to the King? Was it not His Majesty's army? Were not all the commanders under contract with His Majesty, at higher rates and greater wages than ordinary?

150. And have not we taken upon us to discharge all the brotherly assistance of £300,000, which we gave the Scots? Was it not toward repair of those damages and losses which they received from the King's ships and from his ministers?

151. These three particulars amount to

above £1,100,000.

152. Besides, His Majesty hath received by impositions upon merchandise at least £400,000.

153. So that His Majesty hath had out of the subjects' purse since the Parliament began £1,500,000, and yet these men can be so impudent as to tell His Majesty that we have done nothing for him.

154. As to the second branch of this slander, we acknowledge with much thankfulness that His Majesty hath passed more good Bills to the advantage of the subjects than have been in many

155. But withal we cannot forget that these venomous councils did manifest themselves in some endeavours to hinder these good acts.

156. And for both Houses of Parliament we may with truth and modesty say thus much: that we have ever been careful not to desire anything that should weaken the Crown either in just profit or useful power.

157. The triennial Parliament for the matter of it, doth not extend to so much as by law we ought to have required (there being two statutes still in force for a Parliament to be once a year), and for the manner of it, it is in the King's power that it shall never take effect, if he by a timely summons shall prevent any other way of assembling.

158. In the Bill for continuance of this present Parliament, there seems to be

from taking upon them this burden, being out of the Crown, but to suspend the only: which was so necessary for the King's own security and the public peace, that without it we could not have undertaken any of these great charges, but must have left both the armies to disorder and confusion, and the whole kingdom to blood and rapine.

159. The Star Chamber was much more fruitful in oppression than in profit, the great fines being for the most part given away, and the rest stalled at long times.

160. The fines of the High Commissioner were in themselves unjust, and seldom or never came into the King's purse. These four Bills are particularly and more specially instanced.

161. In the rest there will not be found so much as a shadow of prejudice to the Crown.

162. They have sought to diminish our reputation with the people, and to bring them out of love with Parliaments.

163. The aspersions which they have attempted this way have been such as

164. That we have spent much time and done little, especially in those grievances which concern religion.

165. That the Parliament is a burden the kingdom by the abundance of protections which hinder justice trade; and by many subsidies granted much more heavy than any formerly endured.

166. To which there is a ready answer: if the time spent in this Parliament be considered in relation backward to the long growth and deep root of those grievances, which we have removed, to the powerful supports of those delinquents, which we have pursued, to the great necessities and other charges of commonwealth for which we have provided.

167. Or if it be considered in relation forward to many advantages, which not only the present but future ages are like to reap by the good laws and other proceedings in this Parliament, we doubt not but it will be thought by all indifferent judgments, that our time hath been much some restraint of the royal power in better employed than in a far greater dissolving of Parliaments, not to take it proportion of time in many former Parlia-

GRAND REMONSTRANCE, THE

ments put together; and the charges execute their malice to the subversion of which have been laid upon the subject, our religion and the dissolution of our and the other inconveniences which they have borne, will seem very light in respect of the benefit they have and may

168. And for the matter of protections, the Parliament is so sensible of it that therein they intended to give them whatsoever ease may stand with honour and justice, and are in a way of passing a Bill to give them satisfaction.

169. They have sought by many subtle practices to cause jealousies and divisions betwixt us and our brethren of Scotland, by slandering their proceedings and intentions towards us, and by secret endeavours to instigate and incense them and us one

against another.

Bishops and Popish lords in the House of Peers, as hath caused much opposition science of their duty to God, their King and delay in the prosecution of delinquents, hindered the proceedings of diverse good Bills passed in the Commons' House, concerning the reformation of sundry great abuses and corruptions both in Church and State.

171. They have laboured to seduce and corrupt some of the Commons' House to draw them into conspiracies and combina- parts of that kingdom broken out into tions against the liberty of the Parliament.

172. And by their instruments and agents they have attempted to disaffect and discontent His Majesty's army, and to engage it for the maintenance of their wicked and traitorous designs; the keeping up of Bishops in votes and functions, and by force to compel the Parliament to order, limit and dispose their proceedings in such manner as might best concur with the intentions of this dangerous and potent faction.

173. And when one mischievous design and attempt of theirs to bring on the army against the Parliament and the City of London, hath been discovered and prevented:

of the same damnable nature, with this subsistence and power of reformation is addition to it, to endeavour to make the under Him in the Parliament. Scottish army neutral, whilst the English army, which they had laboured to without the conjunction of the House of corrupt and envenous against us by their Lords, and what conjunction can we exfalse and slanderous suggestions, should pect there, when the Bishops and recu-

government.

175. Thus they have been continually practising to disturb the peace, and plotting the destruction even of all the King's dominions; and have employed emissaries and agents in them, all for promoting their devilish designs, the which the vigilancy of those who were well affected hath still discovered and defeated before they were ripe for execution in England and Scotland.

176. Only in Ireland, which was farther off, they have had time and opportunity to mould and prepare their work, and had brought it to that perfection that they had possessed themselves of that whole ainst another. kingdom, totally subverted the govern-170. They have had such a party of ment of it, routed out religion, and destroyed all the Protestants whom the conand country, would not have permitted to join with them, if by God's wonderful providence their main enterprise upon the city and castle of Dublin, had not been detected and prevented upon the very eve before it should have been executed.

> 177. Notwithstanding they have in other open rebellion, surprising towns castles, committed murders, rapes and other villainies, and shaken off all bonds of obedience to His Majesty and the laws of the realm.

> 178. And in general have kindled such a fire, as nothing but God's infinite blessing upon the wisdom and deavours of this State will be able to quench it.

> 179. And certainly had not God in His great mercy unto this land discovered and confounded their former designs, we had been the prologue to this tragedy in Ireland, and had by this been made the lamentable spectacle of misery and confusion.

180. And now what hope have we but 174. They presently undertook another in God, when as the only means of our

181. But what can we the Commons,

GRAND REMONSTRANCE, THE

our best endeavours for reformation, and by that means give advantage to this malignant party to traduce our proceed-

ings?

182. They infuse into the people that we mean to abolish all Church government, and leave every man to his own fancy for the service and worship of God, absolving him of that obedience which he owes under God unto His Majesty, whom we know to be entrusted with the ecclesiastical law as well as with the temporal, to regulate all the members of the Church is now subject, will be prevented. of England, by such rules of order and discipline as are established by Parliament, which is his great council, in all affairs both in Church and State.

183. We confess our intention is, and our endeavors have been, to reduce within bounds that exorbitant power which the prelates have assumed unto themselves, so contrary both to the Word of God and to the laws of the land, to which end we passed the Bill for the removing them from their temporal power and employments, that so the better they might with meekness apply themselves to the discharge of their functions, which Bill themselves opposed, and were the principal instruments of crossing it.

184. And we do here declare that it is far from our purpose or desire to let loose the golden reins of discipline and government in the Church, to leave private persons or particular congregations to take up what form of Divine Service they please, for we hold it requisite that there should be throughout the whole realm a conformity to that order which the laws enjoin according to the Word of God. And we desire to unburden the consciences of men of needless and superstitious ceremonies, suppress innovations, and take away the monuments of idolatry.

185. And the better to effect the intended reformation, we desire there may with us, who may consider of all things them. necessary for the peace and good govern-

sant lords are so numerous and prevalent liament, to be there allowed of and conthat they are able to cross and interrupt firmed, and receive the stamp of authority, thereby to find passage and obedience throughout the kingdom.

186. They have maliciously charged us that we intend to destroy and discourage learning, whereas it is our chiefest care and desire to advance it, and to provide a competent maintenance for conscionable and preaching ministers throughout the kingdom, which will be a great encouragement to scholars, and a certain means whereby the want, meanness and ignorance, to which a great part of the clergy

187. And we intended likewise to reform and purge the fountains of learning, the two Universities, that the streams flowing from thence may be clear and pure, and an honour and comfort to the

whole land.

188. They have strained to blast our proceedings in Parliament, by wresting the interpretations of our orders from their genuine intention.

189. They tell the people that our meddling with the power of episcopacy hath caused sectaries and conventicles, when idolatrous and Popish ceremonies, introduced into the Church by the command of the Bishops have not only debarred the people from thence, but expelled them from the kingdom.

190. Thus with Elijah, we are called by this malignant party the troublers of the State, and still, while we endeavour to reform their abuses, they make us the authors of those mischiefs we study to prevent.

191. For the perfecting of the work begun, and removing all future impediments, we conceive these courses will be very effectual, seeing the religion of the Papists hath such principles as do certainly tend to the destruction and extirpation of all Protestants, when they shall have opportunity to effect it.

192. It is necessary in the first place be a general synod of the most grave, to keep them in such condition as that pious, learned and judicious divines of they may not be able to do us any hurt, this island; assisted with some from for- and for avoiding of such connivance and eign parts, professing the same religion favour as hath heretofore been shown unto

193. That His Majesty be pleased to ment of the Church, and represent the re- grant a standing Commission to some sults of their consultations unto the Par- choice men named in Parliament, who

may take notice of their increase, their proceed against them in any legal way of counsels and proceedings, and use all due charge or impeachment. means by execution of the laws to prevent all mischievous designs against the be sworn to observe those laws which conpeace and safety of this kingdom.

discover the counterfeit and false conformity of Papists to the Church, by colour whereof persons very much disaffected to the true religion have been admitted into place of greatest authority and trust in the kingdom.

195. For the better preservation of the laws and liberties of the kingdom, that all illegal grievances and exactions be presented and punished at the sessions and

assizes.

196. And that Judges and Justices be very careful to give this in charge to the grand jury, and both the Sheriff and Justices to be sworn to the due execution of the Petition of Right and other laws.

197. That His Majesty be humbly petitioned by both Houses to employ such counsellors, ambassadors and other ministers, in managing his business at home and abroad as the Parliament may have cause to confide in, without which we cannot give His Majesty such supplies for support of his own estate, nor such assistance to the Protestant party beyond the sea, as is desired.

198. It may often fall out that the Commons may have just cause to take exceptions at some men for being councillors, and yet not charge those men with crimes, for there be grounds of diffidence

which lie not in proof.

199. There are others, which though they may be proved, yet are not legally

criminal.

200. To be a known favourer of Papists, or to have been very forward in defending or countenancing some great offenders questioned in Parliament; or to speak contemptuously of either Houses of Parliament or Parliamentary proceedings.

for any foreign prince of another religion; such are justly suspected to get council- Missionary Ridge, November, 1863, and lors' places, or any other of trust concern- was active in the military movements that ing public employment for money; for all led to the capture of Mobile in 1864. these and divers others we may have great was mustered out of the volunteer service reason to be earnest with His Majesty, in 1866; was promoted to colonel in the not to put his great affairs into such regular army the same year; and died in hands, though we may be unwilling to Santa Fé, N. M., Jan. 10, 1876.

202. That all Councillors of State may cern the subject in his liberty, that they 194. Thus some good course be taken to may likewise take an oath not to receive or give reward or pension from any foreign prince, but such as they shall within some reasonable time discover to the Lords of His Majesty's Council.

> 203. And although they should wickedly forswear themselves, yet it may herein do good to make them known to be false and perjured to those who employ them, and thereby bring them into as little

credit with them as with us.

204. That His Majesty may have cause to be in love with good counsel and good men, by shewing him in an humble and dutiful manner how full of advantage it would be to himself, to see his own estate settled in a plentiful condition to support his honour; to see his people united in ways of duty to him, and endeavours of the public good, etc.

Granger, Francis, statesman; born in Suffield, Conn., Dec. 1, 1792; graduated at Yale in 1811; Whig candidate for Vice-President in 1836; member of Congress, 1835-37 and 1839-41; Postmaster-General in 1841. He died in Canandaigua, N. Y.,

Aug. 28, 1868.

Granger, Gideon, statesman; born in Suffield, Conn., July 19, 1767; graduated at Yale College in 1787; became a lawyer; Postmaster-General in 1801-14. His publications include a Fourth of July oration and Political Essays. He died in Canandaigua, N. Y., Dec. 31, 1822.

Granger, Gordon, military officer; born in New York City, in 1821; graduated at West Point in 1845; served in the war with Mexico. He served under Halleck and Grant in the West, and was made major-general of volunteers, Sept. 17, 1862. He commanded the district of central Kentucky, was put in command of the 201. Or such as are factors or agents 4th Army Corps after the battle of Chickamauga, was engaged in the struggle on

He tised law at Zanesville from 1853 to 1861; was a police commissioner in New York served throughout the Civil War in the City through the administration of Mayor National army with much distinction, and Strong. In 1898, on the call for volunreceived the brevet of colonel. He is teers for the war with Spain, Colonel Grant offered his services to the President, and went to the front as colonel of the 14th New York regiment. On May 27 he was appointed a brigadier-general of volunteers; served in the Porto Rico campaign; and after the war was appointed commander of the military district of San Juan. While holding this post he organized an effective police force for the city similar in plan to that of New York City. Subsequently he was ordered to the Philippine Islands, where he rendered such valuable service in operations against the insurgents, and also as an administrative officer, that on the reorganization of the regular army in February, 1901, President McKinley appointed him one of the new brigadierrank of lieutenant-colonel in 1873; took generals, he being then the only officer not in the regular army appointed to that rank.

Grant, James, military officer; born in Ballendalloch, Scotland, in 1720; was major of the Montgomery Highlanders in 1757. He was in the expedition against Fort Duquesne in 1758, and in 1760 was governor of East Florida. He led an expedition against the Cherokees in May, 1761, was acting brigadier-general in the battle of Long Island in 1776, and was made major-general in 1777. He was with Howe in New Jersey and Pennsylvania in 1777. He fought the Americans at Monmouth in 1778, and in November sailed in command of troops sent against the French in the West Indies, taking St. Lucia in December. In 1791 he was made governor of Stirling Castle, and was several years in Parliament. It is said that he was such a notorious gourmand in his later life that he required his cook to sleep in the same room with him. He died April 13, 1806.

Grant, Robert, author; born in Boston, against the Indians; accompanied his Mass., Jan. 24, 1852; graduated at father on his trip around the world; and Harvard College in 1873; later began law resigned his commission in the army in practice in his native city. He is the 1881. In 1887 he was defeated as Repub- author of Yankee Doodle; The Oldest

Washington, D. C., May 29, 1868. To Gen. Joseph R. Hawley, President National Republican Convention:

In formally accepting the nomination of the "National Union Republican Convention" of the 21st of May last, it seems proper that some statement of views, beyond the mere acceptance of the nomination, should be expressed.

The proceedings of the convention were marked with wisdom, moderation, and patriotism, and, I believe, expressed the feelings of the great mass of those who sustained the country through its recent trials. I endorse their resolu-

Burdened by these great primal By refunding the 6 per cent. bonded works of necessity, which could not be delayed, we yet have done what this exhibition will show, in the direction of rivalling older and more advanced nations in law, medicine, and theology; in science, literature, philosophy and the fine arts. While proud of what we have done, we regret that we have not done more. Our achievements have been great enough, however, to make it easy for our people to acknowledge superior merit wherever found.

And now, fellow-citizens, I hope a careful examination of what is about to My Countrymen,-It has been thought be exhibited to you will not only inspire you with a profound respect for the skill and taste of our friends from other nations, but also satisfy you with the attainpast 100 years. I invoke your generous co-operation with the worthy commissioners to secure a brilliant success to this international exhibition, and to make the stay of our foreign visitors—to whom we extend a hearty welcome—both profitable and pleasant to them.

I declare the international exhibition

Vindication of Fitz-John Porter.-Gen-

of General Porter to the President:

NEW YORK, Dec. 22, 1881.

The President, Washington, D. C .:

Fitz-John Porter, I have recently reviewed his trial and the testimony furnished before the Schofield Court of Inthree full days of careful reading and consideration, and much thought in the intervening time. The reading of this record has thoroughly convinced me that for these nineteen years I have been doing a gallant and efficient soldier a very great injustice in thought and sometimes in speech. I feel it incumbent upon me now to do whatever lies in my power to remove from him and from his family the stain upon his good name. I feel this the more incumbent upon me than only, or occupying any other command in as general I had it, possibly, in my power to have obtained for him the hearing United States Senator from Pennsylvania: which he had only got at a later day, and as President I certainly had the power to have ordered that hearing. In Hon. J. D. Cameron, U. S. Senate, Washjustification for my injustice to General Porter, I can only state that shortly after afraid, possibly with some little prejudice such people. in the case, although General Porter was support of General Pope in his campaigns, punishment had been light for so hideous and that General Porter, while possibly an offence; but I tried to throw off all not more guilty than others, happened prejudice in the case, and to examine it

touchingly illustrated than in his efforts to be placed in a position where he could to secure justice for GEN. FITZ-JOHN be made responsible for his indifference, PORTER (q. v.). The story of his actions and that the punishment was not a sein this matter is most fittingly told in vere one for such an offence. I am now his own language. On Dec. 22, 1881, he convinced that he rendered faithful, addressed the following appeal in behalf efficient, and intelligent service, and the fact that he was retained in command of a corps for months after his offences were said to have been committed is in his favor. What I would ask in General Por-DEAR SIR, - At the request of Gen. ter's behalf, from you, is, if you can possibly give the time, that you give the subject the same study and thought that I have given it, and then act as your quiry held in 1879, giving to the subject judgment shall dictate. But, feeling that you will not have the time for such an investigation (for it would take several days' time), I would ask that the whole matter be laid before the Attorney-General for his examination and opinion. Hoping that you will be able to do this much for an officer who has suffered for nineteen years a punishment that never should be inflicted upon any but the most guilty, I am,

Very truly yours, U. S. GRANT.

On Feb. 4, 1882, in order to still fur-I should if I had been a corps commander ther impress his convictions of General Porter's innocence upon influential memthe army than the one which I did; but bers of Congress, he addressed the following detailed letter to J. Donald Cameron,

New York, Feb. 4, 1882.

ington, D. C.:

The modus operandi for getting cona member of this association to put in bids commencing at as low rates as the articles could be furnished for, and after they were opened all would retire up to the highest one who was below any outside person and let him take it. In many instances probably they could buy off this one for a low figure by assuring him that he could not possibly get the contract, for if he did not retire it would be held by the party below.

Grants for State Colleges. On July 8, 1901, the United States Treasury Department drew warrants aggregating \$1,200,000, or \$25,000 each, for the State and Territorial agricultural colleges, being the maximum amount provided for by Congress in the act of Aug. 30, 1890, for the endowment and maintenance of colleges for the benefit of agriculture and mechanic arts. This act provided a minup to \$25,000. The maximum was reached in 1901, and hereafter each of the States and Territories will receive annually this sum for its agricultural colleges. This money is the proceeds of the sale of public lands.

Grape Island, AFFAIR AT. In Boston Harbor was Grape Island, to which, on Sunday morning, May 21, 1775, some Britonly on the islands in and near the haror fresh meat. Three alarm-guns were fired; the drums beat to arms; the bells and the Americans burned the hay they troops were sent to join Lafayette. had gathered.

France, in 1723; entered the navy when fleet would

the latter to England in 1781, Graves became chief naval commander on the American station. He was defeated (Sept. 5) by De Grasse. In 1795 he was second in command under Lord Howe, and was raised to an Irish peerage and admiral of the white on June 1, the same year. He died Jan. 31, 1802.

Graveyard Insurance, the popular designation of a form of life insurance that at one time was extensively carried on in several of the Northern States, especially Pennsylvania. It was an outgrowth of what is known as industrial insurance, in which policies were issued for small amounts from childhood up to extreme old age, the premiums being paid in small and frequent instalments. For a time no medical examination nor personal identification was required from agents, and because of this they added largely to their income by presenting applications to their respective companies in the names of people, long dead, taken from headstones in cemeteries.

MAGNA CHARTA

John, by the grace of God, King of England, Lord of Ireland, Duke of Normandy and Aquitaine, and Count of Anjou; to all archbishops, bishops, abbots, priors, earls, barons, sheriffs, officers, and to all bailiffs and other his faithful subjects, greeting.

Know ye, that we, in the presence of God, and for the health of our soul, and the souls of our ancestors and heirs, and to the honour of God and the exaltation of Holy Church, and amendment of our About three years before this time the kingdom; by advice of our venerable fathers, Stephen archbishop of Canterbury, primate of all England, and cardinal of the Holy Roman Church; Henry archbishop of Dublin, William bishop of London, Peter of Winchester, Jocelin of Bath were English barons, and some of them and Glastonbury, Hugh of Lincoln, Walter of Worcester, William of Coventry, Benedict of Rochester, bishops; and Master As the barons found that every promise Pandulph the pope's sub-deacon and familthat had been made at his coronation had iar, Brother Aymerick master of the been broken, and that nothing but force Knights Templars in England, and the nohad any effect, they determined to bring ble persons, William the marshal, earl of the matter to a climax, and took up arms Pembroke, William earl of Salisbury, William earl of Warren, William earl The clergy, though John was the vassal of Arundel, Alan de Galloway, constable of the pope, and specially under his pro- of Scotland, Warin Fitzgerald, Peter Fitztection, ranged themselves mostly on the Herbert, and Hubert de Burgh, seneschal side of the barons, and the freemen, many of Poictou, Hugo de Nevil, Matthew Fitzof whom had had their goods seized ille- Herbert, Thomas Basset, Alan Basset,

free, and shall have her whole rights, and her liberties inviolable; and I will this to pear thence, that the freedom of elections, which is reckoned most necessary to the English Church, which we granted, and by our charter confirmed, and obtained the confirmation of it from Pope Innocent III before the discord between us and our barons, was of our own free will. Which charter we shall observe; and we will it to be observed faithfully by our heirs forever.

II. We have also granted to all the freemen of our kingdom, for us and our heirs forever, all the underwritten liberties, to be held and enjoyed by them and their heirs, of us and our heirs. If any of our earls or barons, or others who hold of us in chief by military service, shall die, and at his death his heir shall be of full age, and shall owe a relief, he shall have her inheritance, which her husband and his inheritance for the ancient relief, viz., the heir or heirs of an earl, a whole earl's estate for one hundred pounds; the heir or heirs of a baron, a whole barony, for one hundred pounds; the heir or heirs of a knight, a whole knight's fee, for one hundred shillings at most; and he who owes less, shall pay less, according to the ancient custom of fees.

III. But if the heir of any such be a minor, and shall be in ward, when he comes of age he shall have his inheritance without relief and without fine.

IV. The guardian of an heir who is a minor, shall not take of the lands of the heir any but reasonable issues, and reasonable customs, and reasonable services, and that without destruction and waste of the men or goods; and if we commit the marry herself so long as she has a mind custody of any such lands to a sheriff, or to live without a husband. But yet she to any other person who is bound to an- shall give security that she will not marry swer to us for the issues of them, and he without our assent, if she holds of us; or shall make destruction or waste on the without the consent of the lord of whom ward lands, we will take restitution from she holds, if she holds of another. him, and the lands shall be committed to two legal and discreet men of that fee, seize any land or rent for any debt, so who shall answer for the issues to us, or long as the chattels of the debtor are to him to whom we shall assign them; and sufficient to pay the debt, and the debtor

gal and discreet men of that fee, who shall I. That the Church of England shall be answer to us, in like manner as aforesaid.

V. Besides, the guardian, so long as he be observed in such a way that it may ap- hath the custody of the lands, shall keep in order the houses, parks, warrens, ponds, mills, and other things belonging to them, out of their issues; and shall deliver to the heir, when he is full age, his whole lands, provided with ploughs and other implements of husbandry, according to what the season requires, and the issues of the lands can reasonably bear.

> VI. Heirs shall be married without disparagement, and so that, before the marriage is contracted, notice shall be given to the relations of the heir by consanguin-

VII. A widow, after the death of her husband, shall immediately, and without difficulty, have her marriage goods and her inheritance; nor shall she give anything for her dower, or her marriage goods, or she held at the day of his death. And she may remain in the mansion house of her husband forty days after his death; within which time her dower shall be assigned, if it has not been assigned before, or unless the house shall be a castle, and if she leaves the castle, there shall forthwith be provided for her a suitable house, in which she may properly dwell, until her dower be to her assigned, as said above; and in the mean time she shall have her reasonable estover from the common income. And there shall be assigned to her for her dower the third part of all the lands, which were her husband's in his lifetime, unless a smaller amount was settled at the church door.

VIII. No widow shall be distrained to

IX. Neither we nor our bailiffs shall

and rents of the debtor, until they shall be satisfied for the debt which they paid for him; unless the principal debtor can said sureties.

X. If any one have borrowed anything of the Jews,* more or less, and dies before the debt is satisfied, there shall be no interest paid for that debt, so long as the heir is a minor, of whomsoever he may hold: and if the debt falls into our hands, we will take only the chattel mentioned in the deed.

XI. If any one shall die indebted to Jews, his wife shall have her dower, and pay nothing of that debt; and if the deceased left children under age, they shall have necessaries provided for them according to the tenement of the deceased, and out of the residue the debt shall be paid; saving however the service of the lords. In like manner the debts due to other persons than Jews shall be paid.

XII. No scutage or aid shall be imposed in our kingdom, unless by the common council of our kingdom, except to ransom our person, and to make our eldest son a knight, and once to marry our eldest daughter; and for these there shall only be paid a reasonable aid.

liberties and free customs, as well by land as by water. Furthermore we will and grant that all other cities and boroughs, and towns and ports shall have all their liberties and free customs.

XIV. And for holding the common council of the kingdom concerning the assessment of aids, otherwise than in the three aforesaid cases, and for the assessment of scutages, we will cause to be summoned

Christians in those days were forbidden by the canon law to lend on usury: whole of the money-lending was therefore in the hands of the Jews.

is prepared to give satisfaction. Nor shall the archbishops, bishops, earls, and greater the sureties of the debtor be distrained, barons, singly, by our letters; and besides, so long as the principal debtor be sufficient we will cause to be summoned generally by for the payment of the debt. And if the our sheriffs and bailiffs, all those who hold principal debtor fail in the payment of the of us in chief, for a certain day, that is to debt, not having wherewithal to discharge say, forty days before their meeting at it, or will not discharge it when he is able, least, and to a certain place; and in all then the sureties shall answer the debt, the letters of summons, we will declare and if they will they shall have the lands the cause of the summons; and the summons being thus made, the business shall go on at the day appointed, according to the advice of those who shall be present. show himself acquitted thereof against the although all who had been summoned have not come.

> XV. We will not authorize any one, for the future, to take an aid of his freemen, except to ransom his body, to make his eldest son a knight, and once to marry his eldest daughter; and for these only a reasonable aid.

> XVI. No one shall be distrained to do more service for a knight's fee, nor for any other free tenement, than what is due from thence.

> XVII. Common pleas shall not follow our court, but shall be held in some certain place.

> XVIII. Assizes upon the writs of Novel Disseisin, Mort d'Ancestre and Darrein presentment,* shall not be taken but in their proper counties, and in this manner. -We, or our chief justiciary when we are out of the kingdom, shall send two justiciaries into each county four times a year, who, with four knights chosen out of every shire by the people, shall hold the said assizes at a stated time and place, within the county.

XIX. And if any matters cannot be de-XIII. In like manner it shall be concern- termined on the day appointed for holding ing the aids of the City of London; the the assizes in each county, let as many City of London shall have all its ancient knights and freeholders of those who were present remain behind, as may be necessary to decide them, according as there is more or less business.

XX. A freeman shall not be amerced for a small offence, but only according to the degree of the offence; and for a great crime, according to the heinousness of it. saving to him his contenement; and after the same manner a merchant, saving to him his merchandise; and a villein shall be amerced after the same manner, saving to him his wainage, if he falls under our

* Last presentation to a benefice.—Sheldon Amos.

mercy; and none of the aforesaid amerciaments shall be assessed but by the oath of honest men in the neighbourhood.

XXI. Earls and barons shall not be amerced but by their peers, and according

to the degree of the offence.

XXII. No ecclesiastical person shall be amerced for his lay-tenement, but according to the proportion of the others aforesaid, and not according to the value of his ecclesiastical benefice.

XXIII. Neither a town nor any tenant shall be distrained to make bridges or banks, unless that anciently and of right they are bound to do it. No river for the future shall be imbanked but what was imbanked in the time of King Henry I., our grandfather.

XXIV. No sheriff, constable, coroner, or other our bailiffs, shall hold pleas of the

crown.

XXV. All counties, hundreds, wapentakes, and tithings shall stand at the old rents, without any increase, except in our demesne manors.

XXVI. If any one holding of us a layfee, dies, and the sheriff or our bailiff show our letters patent of summons for debt which the deceased did owe to us, it shall be lawful for the sheriff or our bailiff to attach and register the chattels of the deceased found upon his lay-fee, to the value of the debt, by the view of lawful men, so as nothing be removed until our whole debt be paid; and the rest shall be left to the executors to fulfil the will of the deceased; and if there be nothing due from him to us, all the chattels shall remain to the deceased, saving to his wife and children their reasonable shares.

XXVII. If any freeman dies intestate, his chattels shall be distributed by the hands of his nearest relations and friends by view of the church, saving to every one his debts, which the deceased owed.

XXVIII. No constable or bailiff of ours shall take the corn or other chattels of any man, without instantly paying money for them, unless he can obtain respite by the

good-will of the seller.

XXIX. No constable shall distrain any knight to give money for castle-guard, if he is willing to perform it in his own person, or by another able man if he cannot perform it himself through a reasonable cause. And if we have carried or sent

him into the army, he shall be excused from castle-guard for the time he shall be in the army at our command.

XXX. No sheriff or bailiff of ours or any other person shall take the horses or carts of any freeman to perform carriages, without the assent of the said freeman.

XXXI. Neither we, nor our bailiffs, shall take another man's timber for our castles or other uses, without the consent of the owner of the timber.

XXXII. We will not retain the lands of those who have been convicted of felony above one year and one day, and then they shall be given up to the lord of the fee.

XXXIII. All kydells* for the future shall be removed out of the Thames, the Medway, and throughout all England, except upon the sea-coast.

XXXIV. The writ which is called Præcipe, for the future, shall not be made out to any one concerning any tenement by which any freeman may lose his court.

XXXV. There shall be one measure of wine and one of ale through our whole realm; and one measure of corn, viz., the London quarter; also one breadth of dyed cloth and of russets, and of halberjects,** viz., two ells within the lists. It shall be the same with weights as with measures.

XXXVI. Nothing shall be given or taken for the future for the writ of inquisition of life or limb, but it shall be

granted freely, and not denied.

XXXVII. If any one hold of us by feefarm, or socage, or burgage, and holds lands of another by military service, we shall not have the custody of the heir, or of his land, which is held of the fee of another, through that fee-farm, or socage, or burgage; nor will we have the wardship of the fee-farm, socage, or burgage, unless the fee-farm is bound to perform knight's service to us. We will not have the custody of an heir, nor of any land which he holds of another by military service, by reason of any petit-sergeantry he holds of us, as by the service of paying a knife, an arrow, or such like.

XXXVIII. No bailiff from henceforth shall put any man to his law upon his

* A dam made across a river for diverting water to a mill or taking fish.

** A coarse kind of cloth.

own saying, without credible witnesses to prove it.

XXXIX. No freeman shall be taken, or imprisoned, or disseized, or outlawed, or banished, or any ways destroyed, nor will we pass upon him, nor will we send upon him, unless by the lawful judgment of his peers, or by the law of the land.

XL. We will sell to no man, we will not deny to any man, either justice or right.

XLI. All merchants shall have safe and secure conduct, to go out of, and to come into England, and to stay there, and to pass as well by land as by water, for buying and selling by the ancient and allowed customs, without any evil tolls; except in time of war, or when they are of any nation at war with us. And if there be found any such in our land in the beginning of the war, they shall be attached, without damage to their bodies or goods, until it be known unto us or our chief justiciary how our merchants be treated in the country at war with us; and if ours be safe there, the others shall be safe in our dominions.

XLII. It shall be lawful for the time to come for any one to go out of our kingdom, and return, safely and securely, by land or by water, saving his allegiance to us; unless in time of war, by some short space, for the common benefit of the realm, except prisoners and outlaws, according to the law of the land, and people in war with us, and merchants who shall be in such condition as is above mentioned.

XLIII. If any man hold of any escheat, as of the honour of Wallingford, Nottingham, Boulogne, Lancaster, or of other escheats which are in our hands, and are baronies, and shall die, his heir shall give no other relief, and perform no other service to us, than he should have done to the baron if it had been in the hands of the baron; and we will hold it in the same manner that the baron held it.

XLIV. Men who dwell without the forest shall not come, for the future, before our justiciary of the forest on a common summons, unless they be parties in a plea, or sureties for some person who is attached for something concerning the forest.

XLVI. All barons who have founded abbeys, which they hold by charters of the kings of England, or by ancient tenure, shall have the custody of them when they become vacant, as they ought to have.

XLVII. All forests which have been made in our time, shall be immediately disforested; and the same shall be done with water banks which have been made in our time.

XLVIII. All evil customs connected with forests and warrens, foresters and warreners, sheriffs and their officers, water-banks and their keepers, shall at once be inquired into in each county by twelve sworn knights of the county who shall be chosen by creditable men of the same county; and within forty days after the inquiry is made, they shall be utterly abolished by them, never to be restored; provided notice be given to us before it is done, or to our justiciary, if we are not in England.

XLIX. We will at once give up all hostages and writings that have been given to us by our English subjects, as securities for their keeping the peace, and faithfully performing their services to us.

L. We will remove absolutely from their bailiwicks the relations of Gerard de Athyes, that henceforth they shall have no bailiwick in England; we will also remove Engelard de Cygony, Andrew, Peter, and Gyon from the Chancery; Gyon de Cygony, Geoffrey de Martyn, and his brothers; Philip Mark, and his brothers; his nephew, Geoffrey, and all their followers.

LI. As soon as peace is restored we will send out of the kingdom all foreign soldiers, crossbow-men, and stipendiaries. who are come with horses and arms, to the injury of our people.

LII. If any one has been dispossessed or deprived by us, without the legal judgment of his peers, of his lands, castles, liberties, or right, we will forthwith restore them to him; and if any dispute arise upon this head, let the matter be decided by the five-and-twenty barons hereafter mentioned, for the preservation of the peace. As for all those things for which XLV. We will not make any justici- any person has, without the legal judgaries, constables, sheriffs, or bailiffs, but ment of his peers, been dispossessed or defrom those who understand the law of the prived, either by King Henry our father, realm, and are well-disposed to observe it. or our brother King Richard, and which

Until within a few States." This statement is fraught with years agricultural products and lumber

were the principal freights in the lake other sources of supply, Sweden, for excarrying traffic, but the discoveries of ample; but they are not easily accessible, iron-ore in the Lake Superior region and cheapness of transportation is essenbrought about an unparalleled commercial tial. The condition of affairs promises, and maritime growth. This latter industry therefore, to be very much the same, so must necessarily prove far-reaching in its far as materials go, as it was at that effects; for we are living in the age of period when England passed from the use steel, and whatever tends to place us of wood to that of metal in building ships. abreast of our rivals in the production of steel tends at the same time to increase the steel industry in the United States. our prosperity, and to make us great In 1892 there were put out 16,036,043 among the nations of the earth.

steel industry that is of the most importance to the navy-viz., ship-building, a in richness the ores from any other part brief historical retrospect will show that, of the country. New discoveries are bepoints to our again entering the contest are so easily accessible as to make it posfor commercial supremacy on the ocean. sible to supply any demand. Since 1888 In the transitory period from wood to there has been an enormous development metal in ship construction, a period in this new industry in the Lake Superior roughly estimated as extending from 1840 to 1880, the American flag practically disappeared from the high seas, while Eng- estimated land, who had held for over 200 years the growth of this industry justifies the prefirst place as a ship-building and ship-own- diction that with access to the ocean by ing power, still maintained her position. Finding her home supply of ship timber exhausted, she began to import it, and as this was necessarily incompatible with the maintenance of her supremacy, the next plants on the seaboard import foreign step was to take advantage of her increasof the iron ship and its successor, the steel ship, was the result. The period since 1863 has witnessed the production of the English steam fleet, until now British steamers carry the freight and passengers of the greater part of the world. The British ship-yards, too, can now undertake the construction of at least twenty battleships and more than twice this number of cruisers at the same time, a potential strength that adds immensely to the maintenance of her present sea power.

But England will in time be confronted with a new difficulty. The ores in that country are not suitable for steel making, and for some years past large quantities of ore have been imported from mines in the northern part of Spain. These mines are being rapidly exhausted. Fourfifths of the output goes to England, and it has been estimated that at the present The International Deep Water-ways Conrate ten years will exhaust the mines of vention met at Cleveland, O., Sept. 24, the Biscay region. Of course there are 1895, and among the delegates were many

Let us now look at the condition of tons of iron ore, of which the Lake Su-Turning to the particular branch of the perior region contributed 9,564,388 tons. The ore from the Great Lakes surpasses years of exclusion, everything ing constantly reported, and the deposits region, until the amount of capital invested in mining and transportation is at \$234,000,000. The rapid a practicable deep water-way we can not only balance our domestic iron and steel trade, but also compete in the foreign market. At present many iron and steel iron ores, as the low value of iron ore ing production of metals. The evolution in proportion to its weight shuts out transportation by rail from the West. But with a deep-water canal reaching from the Great Lakes to the ocean, the ores required by the manufacturers on the Atlantic seaboard could be supplied more cheaply than the foreign ores, thus increasing the field for capital and industry, while at the same time the iron and steel of the establishments on the Great Lakes could be shipped through by water without breaking bulk and seek the markets of the world.

This brings us to the subject of deepwater canals. For several years, while the national government has been busy with the projected Nicaraguan canal, the people of the West, through private endeavor and public discussion, have been agitating the question of deep water-ways, from the Great Lakes to the seaboard.

business men, noted capitalists, and civil is from 162 feet to 300 feet, and at the engineers from the Lake States, and also bottom from 160 feet to 200 feet. cerning deep water-ways between the ocean was incorporated in the sundry civil appropriation bill, and became a law on ed three commissioners, James B. The alternative has been to develop it is only necessary to point out that the efficiency of the naval reserve. But in a single summer the bureau of navihere the supporters of such a plan have gation established recruiting stations on met with the same difficulties that beset the Great Lakes, during the busiest part us-i. e., the merchant marine, which of the navigation season, and from more ought to be the source of supply of the than 500 applications enlisted 300 men, naval reserve, is becoming honeycombed seamen and mechanics. These men, acwith foreigners. Reliable calculations cording to the reports from the officers of show that the number of foreigners in ships to which they were assigned, were British ships increased 22 3-10 per cent. in all of very high standard. eight years. Poor wages and the natural discomforts of sea life caused men of British birth to seek employment as skilled workers ashore.

But the United States has one advantage over England. The latter, in inspecting the source of supply for the naval reserve, has turned to her widely scattered colonies, and reasonably expects that in time of war they will contribute their share of men. The peculiar system of federal government of the United States Until the national government takes up permits it to rely, in a measure, upon the naval reserve question the business the States to organize and maintain and professional men who, combining a volunteers for national defence, although patriotic spirit with aquatic tastes, enlist until recently the system was applied al- in the naval militia, will be very valuable most exclusively to recruiting the land aids in examining into and keeping inforces. In 1888 an unsuccessful attempt formed concerning the seafaring personnel was made in Congress to create a naval of their States. The energy and execureserve of officers and men from the tive ability of the men that have taken merchant marine. Several States border- hold of this movement in the West (many ing upon the sea-coast then made the mat- of them graduates of the Naval Acadter a local issue, and what were called emy) can be depended upon in case of "naval battalions to be attached to the sudden need to enroll a very desirable set volunteer militia" was the result. With of men, and thus relieve the regular navy the Great Lakes brought into deep-water of preliminary work which its scarcity of communication with the Mississippi and regular officers would otherwise make a the Atlantic seaboard, a cordon of coast- very difficult undertaking. line States will be formed whose similarity of interests will greatly increase the population. Recent investigation by the source from which the country can draw War College has developed the fact that for that second line of defence required during the Civil War a large number of in time of war to "dominate our chan-men-fishermen and local" nels, sounds, and bays." Barred by the along the North Atlantic coast did not en-Rocky Mountains, the Pacific coast stands list for service in the regular navy. The apart from any immediate benefits from long term of enlistment required, coupled interior waterway improvements, but the with the fact that the sea had no novelty building of an isthmian canal will bring for them, may have blunted their patriot-

To those who doubt the possibility of

They were self-respecting Americans. This in itself is a great gain. After recruiting the general service to three-quarters of its full war strength, which can be done as occasion demands, by the enlistment of seamen and mechanics, and by fostering the apprentice system, a naval reserve will have to be depended upon to supply the remaining fourth, and to make up the wastage of war. This is the English estimate, and it is apparently sound.

One word more about our seafaring

GREAT LAKES AND THE NAVY-GREELEY

ism. An inquiry among their successors confirms the opinion that they would much prefer to be utilized for local defence. Torpedo-boat flotillas, mosquito fleets, coast signal stations, and submarine mining squads would therefore be able to obtain among this class very valuable recruits, while the cruising navy, especially with its term of enlistment extended, as has frequently been recommended, from three to four years, would not succeed in attracting them.

The foregoing propositions and the conclusions to be drawn from them may be briefly summarized as follows:

- 1. The Great Lakes region has developed the iron and steel industry to a degree that enables it to surpass all the rest of the United States in the important industry of ship-building.
- 2. The improvements in canal building make it only a question of time when this region will have a deep-water outlet to the sea.
- 3. The result of this deep water-way will be the rehabilitation of our merchant marine and the creation of an exbottoms.
- 4. The expansion of our merchant marine will be followed necessarily by the expansion of the navy.
- 5. The Great Lakes region is debarred by existing treaty relations from contributing material for naval warfare, but, couragement to the naval-militia movethus developing a source of supply for the

armies then at war with the United This declaration was the grand object of the Confederates at Niagara, and they used it to "fire the Southern heart" and to sow the seeds of discontent among the loyal people of the land.

Accepting Presidential Nominations .-The Liberal Republican Convention, held in Cincinnati, gave him the nomination for the Presidency on May 1, 1872, and on the 3d the committee on notifications informed him of the convention's choice. On the day following the nomination Mr. Greeley retired from all connection with the editorial department of the Tribune, and on May 20 he accepted the nomination in the following letter to the committee:

New York, May 20, 1872.

Gentlemen,-I have chosen not to acknowledge your letter of the 3d inst. until I could learn how the work of your convention was received in all parts of our great country, and judge whether that work was approved and ratified by the mass of our fellow-citizens. Their response has from day to day reached me through telegrams, letters, and the comments of journalists independent of official patronage and indifferent to the smiles or frowns of power. The number and character of these unconstrained, unpurchased, unsolicited utterances satisfy me that the movement which found expression at Cincinnati has received the stamp of public approval, and been hailed by a majority of our countrymen as the harbinger of a better day for the repub-

I do not misinterpret this approval as especially complimentary to myself, nor even to the chivalrous and justly esteemed gentleman with whose name I thank your convention for associating mine. I receive and welcome it as a spontaneous and deserved tribute to that admirable platform of principles wherein your convention so tersely, so lucidly, so forcibly of to-day. Though thousands stand ready those who do not.

with the authority that could control the to condemn your every act, hardly a syllable of criticism or cavil has been aimed at your platform, of which the substance may be fairly epitomized as follows:

1. All the political rights and franchises which have been acquired through our late bloody convulsion must and shall be guaranteed, maintained, enjoyed, re-

spected evermore.

2. All the political rights and franchises which have been lost through that convulsion should and must be promptly restored and re-established, so that there shall be henceforth no proscribed class and no disfranchised caste within the limits of our Union, whose long-estranged people shall unite and fraternize upon the broad basis of universal amnesty with impartial suffrage.

3. That, subject to our solemn constitutional obligation to maintain the equal rights of all citizens, our policy should aim at local self-government and not at centralization; that the civil authority should be supreme over the military; that the writ of habeas corpus should be jealously upheld as the safeguard of personal freedom; that the individual citizen should enjoy the largest liberty consistent with public order, and that there shall be no federal subversion of the internal polity of the several States and municipalities, but that each shall be left free to enforce the rights and promote the well-being of its inhabitants by such means as the judgment of its own people shall prescribe.

4. There shall be a real and not merely a simulated reform in the civil service of the republic; to which end it is indispensable that the chief dispenser of its vast official patronage shall be shielded from the main temptation to use his power selfishly, by a rule inexorably forbidding and precluding his re-election.

5. That the raising of revenues, whether by tariff or otherwise, shall be recognized and treated as the people's immediate business, to be shaped and directed by set forth the convictions which impelled, them through their representatives in Conand the purposes which guided its course; gress, whose action thereon the President a platform which, casting behind it the must neither overrule by his veto, atwreck and rubbish of worn-out conten- tempt to dictate, nor presume to punish, tions and by-gone feuds, embodies in fit by bestowing office only on those who and few words the needs and aspirations agree with him or withdrawing it from

I remain, gentlemen, yours, HORACE GREELEY.

Greely, ADOLPHUS WASHINGTON, explorer; born in Newburyport, Mass., March 27, 1844; was liberally educated; and at the breaking out of the Civil War joined the volunteer army and served faithfully until the close of the strife, when he was commissioned a lieutenant in the regular army and assigned to the signal service. In 1881 he commanded an expedition sent into the arctic regions by the government to establish a series of circumpolar stations for scientific observations, in accordance with a plan of the International Geographical Congress held at Hamburg in 1879. He landed with his party of twenty-five at Discovery Harbor, in lat. 81° 44' N., on Aug. 12, 1881. They made their permanent camp at Cape fused Vance his seat proceeded to remove Sabine in October, 1883, where they suffered intensely for want of supplies which had failed to reach them. There all but six of the twenty-five died of starvation. The six, of whom Lieutenant Greely was one, were rescued by a relief party under CAPT. WINFIELD S. SCHLEY (q. v.) June 22, 1884. Had the rescuers been forty-eight hours later, not one of the party would have been found alive. The living, and the dead bodies, were brought home. Two officers of the party, Lieutenant Lockwood and Sergeant Brainerd, had penetrated to lat. 83° 24' N., and hoisted the American flag. It was the highest northerly point that had then been at-Gentlemen, your platform, which is tained. On the death of GEN. WILLIAM

I., Feb. 2, 1883.

Greene, NATHANAEL, military officer; born in Warwick, R. I., May 27, 1742; was the son of a member of the Society of Friends or Quakers. His education was confined to the English of the common school, and his youth was spent on the farm, in a mill, or in a blacksmith's shop. At the age of twenty years he studied law and afterwards military tactics. He was fond of books from his childhood. In 1770 he was elected a member of the Rhode Island legislature, wherein he held a seat until appointed to the command of the Southern army in 1780. His military proclivities caused him to be "disowned" general than Gates confronted him. He by Friends, and he became a member of a made a famous retreat through Carolina military company. Three regiments of into Virginia, and, turning back, fought militia were organized in Rhode Island the British army at Guildford Courtafter the affair at Lexington, as an "army house, N. Boston, Mass., Sept. 6, 1805; gradu-The settlers, disposed to be quiet, loyal subjects of New York, were converted into and talent for the cultivation of art in rebellious foes, determined and defiant.

A new and powerful opposition to the claims of New York was created, composed of the sinews and muskets and determined wills of the people of the "Grants," backed by New Hampshire, and, indeed, by all New England. New York had left them no alternative but the degrading one of leaving or repurchasing their possessions. The governor and council of New York summoned the people of the "Grants" to appear before them at Albany, with their deeds and other evidences of possession, within three months, failing in which it was declared that the claims of all delinquents would be rejected. No attention was paid to the summons. Meanwhile speculators had been purchasing from New York large tracts of these estates, and were preparing to take possession. The settlers sent an agent to England to lay their case before the King. his early youth; and soon after his the governor of New York to abstain from remained about a year. On his return to

He died in Brooklyn, N. Y., Oct. 4, 1866.

Grenville, George, statesman; born in England, Oct. 14, 1712. A graduate of Cambridge University, a fine mathematician, and a student of law, he gave promise of much usefulness. Entering Parliament in 1741, he represented Buckinghamshire for twenty-nine years, until his death, Nov. 13, 1770. In 1762 he was made secretary of state; chancellor of the exchequer and first lord of the treasury in 1763; and in 1764 he proposed the famous STAMP ACT (q. v.). He was the best business man in the House of Commons, but his statesmanship was narrow. Thomas Grenville, who was one of the agents employed in negotiating the treaty of peace in 1783, was his son.

Grenville, SIR RICHARD, born in England in 1540; was a cousin of Sir Walter Raleigh. When a mere youth he served in the imperial army of Germany against

the Turks, and on his return was appointed to a command in Ireland, and made sheriff of Cork. In 1571 he had a seat in Parliament and was knighted by Queen Elizabeth. The colonization schemes of his kinsman commanded his ardent approval, and on April 9, 1585, he sailed from Plymouth, England, in command of some ships fitted out by Raleigh, bearing 180 colonists and a full complement of seamen, for the coast of Virginia. Ralph Lane, a soldier of experience, accompanied him as governor of the colony. Thomas Harriott, a distinguished mathematician and astronomer, was with them as historian and naturalist (see HAR-RIOTT, THOMAS); also Thomas Cavendish, the eminent English navigator, who sailed around the earth. Grenville was more intent upon plunder and finding gold than planting a colony; the choice of him for commander was unfortunate. Sailing over the usual long southern

GEORGE GRENVILLE.

GRESHAM-GREY

wanton act kindled a flame of hatred in the bosoms of the natives that could not be quenched. Not observing this, the commander left the colony and returned to England with his ships. These all became piratical cruisers on the seas, and entered the harbor of Plymouth on Sept. 18, laden with plunder from Spanish galleons.

Governor Lane also treated the natives cruelly, and they became greatly exasperated in spite of the soothing influence of Harriott, their benefactor. In mortal fear of the Indians, their provisions exhausted, and no ship arriving from England, they hailed with joy the appearance of Sir Francis Drake, who, returning from the West Indies, touched at Roanoke Island (see Drake, Sir Francis). They gladly entered his ship and returned to England. About three weeks afterwards Grenville arrived there with three ships, laden with provisions. Leaving fifteen men on the deserted spot to keep possession of the country, Grenville again sailed for England. He afterwards, as vice-admiral, performed notable exploits against the Spaniards, but finally, in a battle with a large Spanish fleet off the Azores, in 1591, he was wounded, made prisoner, and soon afterwards died.

Gresham, WALTER QUINTON, jurist; born near Lanesville, Harrison co., Ind., March 17, 1832. He attended the State in the night.

> Grier, Robert Casper, jurist; born in Cumberland county, Pa., March 5, 1794; graduated at Dickinson in 1812; justice of the United States Supreme Court, 1846-70. He died in Philadelphia, Sept. 26, 1870.

Grierson, BENJAMIN HENRY, military officer; born in Pittsburg, Pa., July 8, 1826; went on the staff of General Prentiss when the Civil War broke out, and became an active cavalry officer. Some of Grant's cavalry, which he had left in Tennessee, were making extensive and destructive raids while he was operating against Vicksburg. On April 17 Colonel Grierson, then commanding the 6th Illinois Cavalry, left La Grange, Tenn., with his own and two other regiments, and, descending the Mississippi, swept rapidly ship. Just before the battle of Manila through the rich western portion of that

Porter to remain at Warrenton Station dawn. Before these movements could until Banks should arrive there to hold be executed, Longstreet and Jackson had then hasten to McDowell reached Gainesville without trance to Thoroughfare Gap, through interruption; but near Bristow Station, which Longstreet had marched, there was Hooker encountered General Ewell, and in the struggle that ensued each lost about 300 men.

The latter hastened towards Manassas, but Hooker's ammunition failing, he was unable to pursue. Pope now ordered a rapid movement upon the Confederates at the Junction, while General Kearny was directed to make his way to Bristow Station, where Jackson might mass his troops and attempt to turn the National right. This movement was made early on the morning of Aug. 28, 1862. Porter was ordered to move towards Bristow Station at one o'clock, but did not march before daylight, at which time Jackson had taken another direction. He destroyed an immense amount of captured stores, and hastened to join Longstreet, then approaching through Thoroughfare Gap. Some of Pope's troops failed to execute orders. The latter arrived at the Junction just after Jackson had left, and pushed all of his available forces upon Centreville in pursuit. Kearny drew Jackson's rear-guard out of Centreville late in the afternoon (Aug. 28), and the forces of the Confederates were turned towards Thoroughfare Gap, from which was coming their help. Towards evening ing (Aug. 29), Ricketts fled to Gainesthe troops under Ewell and Taliaferro en- ville, closely pursued. Pope's army was camped near the battle-ground of Bull now scattered and somewhat confused. Run nearly a year before. Habersham, ALEXANDER WYLLY, naval officer; born in New York City, March 24, 1826; joined the navy in 1841; promoted lieutenant in 1855; resigned in May, 1860; went to Japan as a tea merchant; and was the first to introduce that plant from Japan into the United States. At the beginning of the Civil War he returned home and was a prisoner at Fort Mc-Henry for six months. He was the author of a narrative of the United States North Pacific Exploring Expedition. He died in Baltimore, Md., March 26, 1883.

Habersham, James, statesman; born

ing the absence of Sir James Wright from 1769 to 1772. He was the first person to plant cotton in Georgia. He died in New Brunswick, N. J., Aug. 28, 1775.

Habersham, John, military officer; born in Savannah, Ga., in 1754; appointed major of the 1st Georgia Regiment of Continentals; served throughout the Revolutionary War in the army, and after peace was declared was appointed Indian agent; was elected to the Continental Congress from Georgia in 1785. He died in Savannah, Ga., Nov. 19, 1799.

Habersham, Joseph, statesman; born in Savannah, Ga., July 28, 1751. His father, James, who was born in England in 1712, and died at New Brunswick, N. J., in 1775, accompanied Whitefield to Georgia in 1738, and was secretary of the province in 1754; president of the council and acting governor in 1769-72. Joseph was a member of the first patriotic committee in Georgia in 1774, and ever afterwards took an active part in the defence of the liberties of his country. He helped to seize gunpowder in the arsenal

Hadley, ARTHUR TWINING, educator; born in New Haven, Conn., April 23, 1856; graduated at Yale University in 1876, and then studied in the Univer-

sity of Berlin. Returning to the United States he was a tutor at Yale in 1879-83, and university lecturer on railroad administration in 1883-86. In the latter year he was made Professor of Political Science in the graduate department, where he remained till 1899, when he was elected president of the university by a unanimous vote. The only public office he has ever held was of commissioner of labor of Connecticut in 1885-87. He is the author of Economics, an Account of the Relations Between Private Property and Public Welfare; Railroad Transportation, Its History and Laws; and Report on the System of Weekly Payments. He is a mem-

Hadley, ATTACK ON. At Hadley, on the Connecticut River, the Indians, in the absence of the little garrison, attempted young singer and actor in the Philathe destruction of life and property, Sept. delphia Theatre, was to have a benefit.

The inhabitants were in the selves almost powerless, a man with a long, flowing white beard and military air suddenly appeared, drew his sword, and, putting himself at the head of the armed men, filled them with courage and led them to victory. The Indians fell back and fled. when the mysterious leader as suddenly disappeared, none knowing whence he came or whither he went. It was Col. Will-IAM Goffe (q. v.), the "regicide," who was then concealed in the house of Mr. Russell, at Hadley.

Hague, PARTHENIA ANTOINETTE VAR-DAMAN, author; born in Harris county, Ga., Nov. 29, 1838; is the author of A Blockaded Family, or Life in Southern Alabama during the Civil War.

Hague, WILLIAM, clergyman; born in Pelham, N. Y., Jan. 4, 1808; graduated at Hamilton College in 1826, and at the Newton Theological Institution in 1829. He was the author of The Baptist Church Transplanted from the Old World to the New; Review of Drs. Fuller and Wayland on Slavery, etc. He died in Boston, Mass., Aug. 1, 1887.

Hahn, Michael, jurist; born in Bavaria, Germany, Nov. 24, 1830; graduated at the University of Louisiana in 1854. He was opposed to secession and did all in his power to keep Louisiana in the Union. When New Orleans was captured in April, 1862, he immediately took the oath of allegiance to the United States; was elected governor of the State in 1864; and United States Senator in 1865, but was unable to obtain his seat. He served in the legislature for several years and in 1879 was elected district judge, which office he held until his resignation on being elected to the national House of Representatives in 1885. He died in Washington, D. C., March 15, 1886.

Hale's Remarks in her Woman's Record to girls equally with boys, and, though for the period 1800-68: the latter have, in their endowed colleges,

In truth, when we look over the world, with the exception of two nations, it still bears that shadow of gloom which fell when the ground first drank human blood; and Man the Murderer, Woman the Mourner, is still the great distinction between the sexes!

Thank God there The is hope. Anglo-Saxon race in Europe numbers about 30,000,000, living on a little island in the stormy northern ocean. But there, for over 100 years, the sounds of battle have not been heard; the Salic law never shamed the honor of their royal race; the holy Bible has been for three centuries their household book, and a free press now disseminates truth among the people. Those 30,000,000 hold the mastery of mind over Europe and Asia; if we trace out the causes of this superiority they would centre in that moral influence which true religion confers on the woman.

Therefore, the Queen of Great Britain is the greatest and most honored sovereign now enthroned; feminine genius is the grace and glory of British literature; feminine piety the purest light of the Anglican Church: and this era is made brilliant by the distinguished women of the British island. There is still a more wonderful example of this uplifting power only ninety years since the Anglo-Saxons in the New World became a nation, then numbering about 3,000,000 souls. Now this people form the great American republic, with a population of 30,000,000; in their keeping. The Bible has been their "Book of books" since the first Puritan exile set his foot on Plymouth Rock. Religion is free; and the soul, which woman in the sacred cause of freedom and selfwoman ever been subjected to the hard in 1729 by the present Old South Church. labor imposed by God upon the man—that of "subduing the earth." The advantages thor; born in Windsor, Nova Scotia, in of primary education have been accorded 1797; studied law and was admitted to

enjoyed the special benefit of direct legislation, yet public sentiment has always been favorable to feminine education, and private liberality has supplied, in a good degree, the means of instruction to the daughters of the republic. The result is before the world—a miracle of national advancement. American mothers their sons to be men!

The old Saxon stock is yet superior to the new in that brilliancy of feminine genius the artificial state of social life in England now fosters and elicits, surpassing every nation in its list of learned ladies; yet in all that contributes to popular education and pure religious sentiment among the masses, the women of America are in advance of all others on the globe. To prove this, we need only examine the list of American missionary women, the teachers and authoresses of works instructive and educational, contained in this Record.

Hale, WILLIAM BAYARD, clergyman; born in Richmond, Ind., April 6, 1869; graduated at Boston University; ordained in the Protestant Episcopal Church in 1894. His publications include The Making of the American Constitution; The Genesis of Nationality, etc.

Half-breeds, the name applied by the "Stalwarts" under Conkling to those Reof the educated mind of woman. It is publicans who opposed the third nomination of Grant, the course of President Hayes in reconciling the South, and who favored the policy of Blaine.

Half-way Covenant. In 1657 a council was held in Boston, and in 1662 a and the destiny of the world will soon be synod of all the clergy in Massachusetts was convened to reconsider the decision of the council that all Baptist persons of upright and decorous lives ought to be considered for practical purposes as memalways influences where God is worshipped bers of the Church, and therefore entitled in spirit and truth, is untrammelled by to the exercise of political rights, even code, or creed, or caste. No blood has though unqualified for participation in the been shed on the soil of this nation, save Lord's Supper. In 1669 the advocates of the "Half-way Covenant" seceded from the defence; therefore, the blasting evils of old Church, forming a new society, and war have seldom been felt; nor has the built a meeting-house, which was succeeded

He claimed by the public creditors, but by every the plan of confederation then before Congress to be defective, and urged "It is neither fit for war," he said, "nor for peace. The idea of an will defeat the powers given to Congress, and make our union feeble and precarious." He recommended the appointment of joint officers of state—for foreign affairs, for war, for the navy, and for the treasury—to supersede the "committees" and "boards" hitherto employed; but he neither favored a chief magistrate with two executive power, nor branches in the national legislature. The whole tone of Hamilton's letter was hopeful of the future, though written in his tent, in the midst of a suffering army.

Hamilton was afraid of democracy. He wished to secure for the United States a strong government; and in the convention at Philadelphia in 1787 he presented a plan, the chief features of which were an assembly, to be elected by the people for three years; a senate, to be chosen office during good behavior; and a gov-

He said that "some of the the best model; nor did he conceal his lines of the army, but for the influence theoretical preference for monarchy, while of Washington, would obey their States he admitted that, in the existing state of in opposition to Congress. . . . Con- public sentiment, it was necessary to adgress should have complete sovereignty in here to republican forms, but with all the all that relates to war, peace, trade, strength possible. He desired a general finance, foreign affairs, armies, fleets, government strong enough to counterfortifications, coining money, establishing balance the strength of the State governbanks, imposing a land-tax, poll-tax, ments and reduce them to subordinate importance.

The first report to the national Conwaited for with great anxiety not only thoughtful patriot. It was presented to the House of Representatives Jan. 15, 1790. It embodied a financial scheme, which was generally adopted, and reuncontrollable sovereignty in each State mained the line of financial policy of the new government for more than twenty years. On his recommendation, the national government assumed not only the foreign and domestic debts of the old government, incurred in carrying on the Revolutionary War, as its own, but also the debts contracted by the several States during that period for the general welfare. The foreign debt, with accrued interest, amounting to almost \$12,000,000, was due chiefly to France and private lenders in Holland. The domestic debt, including outstanding Continental money and interest, amounted to over \$42,000,000, nearly one-third of which was accumulated accrued interest. The State debts assumed amounted in the aggregate to \$21,000,000, distributed as follows: New Hampshire, \$300,000; Massachusetts, \$4,000,000; Island, \$200,000: Connecticut, Rhode by electors voted for by the people, to hold \$1,600,000; New York, \$1,200,000; New Jersey, \$800,000; Pennsylvania, \$2,200,ernor, also chosen to rule during good be- 000; Delaware, \$200,000; Maryland, \$800,havior by a similar but more complicated 000; Virginia, \$3,000,000; North Carolina, process. them which embarrass the circulation of some of the States, and the dissimilarity inconveniences which, if not to be ascribed at least be most effectually remedied by the establishment of one,—a measure that will at the same time give additional security against impositions by counterfeit as well as by base currencies.

It was with great reason, therefore, that the attention of Congress, under the late Confederation, was repeatedly drawn to the establishment of a mint; and it is with equal reason that the subject has been resumed, now that the favorable change which has taken place in the situation of public affairs admits of its being carried into execution.

But, though the difficulty of devising a proper establishment ought not to deter from undertaking so necessary a work, yet it cannot but inspire diffidence in one whose duty it is made to propose a plan for the purpose, and may perhaps be permitted to be relied upon as some excuse for any errors which may be chargeable upon it, or for any deviations from sounder principles which may have been suggested by others or even in part acted upon by the former government of the United States.

In order to form a right judgment of what ought to be done, the following particulars require to be discussed:-

1st. What ought to be the nature of the money unit of the United States?

2d. What the proportion between gold and silver, if coins of both metals are to be established?

3d. What the proportion and composition of alloy in each kind?

4th. Whether the expense of coinage shall be defrayed by the government or out of the material itself?

5th. What shall be the number, denominations, sizes, and devices of the coins?

6th. Whether foreign coins shall be permitted to be current or not; if the former, at what rate, and for what period?

A prerequisite to determining with propriety what ought to be the money unit of the United States is to endeavor to the case will admit of what it actually is. quantity of fine silver.

intrinsic worth, the defective species of The pound, though of various value, is the unit in the money account of all the States. But it is not equally easy to in their several moneys of account, are pronounce what is to be considered as the unit in the coins. There being no to the want of a national coinage, will formal regulation on the point (the resolutions of Congress of the 6th of July, 1785, and 8th of August, 1786, having never yet been carried into operation), it can only be inferred from usage or practice. The manner of adjusting foreign exchanges would seem to indicate the dollar as best entitled to that character. In these the old piaster of Spain or old Seville piece of eight reals, of the value of four shillings and sixpence sterling, is evidently contemplated. The computed par between Great Britain and Pennsylvania will serve as an example. According to that, one hundred pounds sterling is equal to one hundred and sixty-six pounds and two-thirds of a pound, Pennwhich corresponds sylvania currency; with the proportion between 4s. 6d. sterling and 7s. 6d., the current value of the dollar in that State by invariable usage. And, as far as the information of the Secretary goes, the same comparison holds in the other States.

But this circumstance in favor of the dollar loses much of its weight from two considerations. That species of coin has never had any settled or standard value, according to weight or fineness, but has been permitted to circulate by tale, without regard to either, very much as a mere money of convenience, while gold has had a fixed price by weight, and with an eye This greater stability of to its fineness. value of the gold coins is an argument of force for regarding the money unit as having been hitherto virtually attached to gold rather than to silver.

Twenty-four grains and six-eighths of a grain of fine gold have corresponded with the nominal value of the dollar in the several States, without regard to the successive diminutions of its intrinsic worth.

But if the dollar should, notwithstanding, be supposed to have the best title to being considered as the present unit in the coins, it would remain to determine what kind of dollar ought to be underform as accurate an idea as the nature of stood; or, in other words, what precise

to have regulated our foreign exchanges, number of contracts still in operation weighed 17 dwt. 12 grains, and contained concerning that kind of property and all 386 grains and 15 mites of fine silver, those of a merely personal nature now in But this piece has been long since out of force must be referred to a dollar of a circulation. Their fine- degradation of the standard. And even in ness is less precisely ascertained, the re- regard to the more ancient contracts, no sults of various assays, made by different person has ever had any idea of a scruple persons, under the direction of the late about receiving the dollar of the day as a superintendent of the finances and of the full equivalent for the nominal sum which Secretary, being as various as the assays the dollar originally imported. themselves. The difference between their is too much for any probable difference in innovation in respect to opinion. casioned by the want of proper apparatus garded as the actual money unit. and, in general, of practice. The experiver.

Secretary places reliance, the standard of Spain for its silver coin, in the year 1761, was 261 parts fine and 27 parts allov, at which proportion a dollar of 17 considerable innovation upon the real dwt. 8 grains would consist of 377 grains present state of things, which it will cerof fine silver and 39 grains of alloy. But there is no question that this standard has been since altered considerably for the worse,—to what precise point wished; but, from a computation of the value of dollars in the markets both of Amsterdam and London (a criterion which cannot materially mislead) the new dollar appears to contain about 368 grains of fine silver, and that which immediately preceded it about 374 grains.

In this state of things there is some difficulty in defining the dollar which is the United States between coined gold and ent money unit, on the supposition of its occasion to be nearly as 1 to 15.6. This, being most applicable to that species of if truly the case, would imply that gold and 15 mites fine comports best with the States; for the highest actual proportion computations of foreign exchanges, and in any part of Europe very little, if at all,

The old piaster of Spain, which appears ing landed property; but far the greater

A recurrence, therefore, to the ancient extremes is not less than 24 grains in a dollar would be in the greatest number of dollar of the same weight and age, which cases an innovation in fact, and in all an the pieces. It is rather to be presumed actual dollar in common circulation has that a degree of inaccuracy had been oc- evidently a much better claim to be re-

The mean intrinsic value of the different ment which appears to have the best pre- kinds of known dollars has been intimated tensions to exactness would make the new as affording the proper criterion. But, dollar to contain 370 grains and 933 when it is recollected that the more anthousandth parts of a grain of pure sil- cient, and more valuable ones are not now to be met with at all in circulation, and According to an authority on which the that the mass of those generally current is composed of the newest and most inferior kinds, it will be perceived that even an equation of that nature would be a tainly be prudent to approach, as far as may be consistent with the permanent order designed to be introduced.

An additional reason for considering is not as well ascertained as could be the prevailing dollar as the standard of the present money unit rather than the ancient one is that it will not only be conformable to the true existing proportion between the two metals in this country, but will be more conformable to that which obtains in the commercial world generally.

The difference established by custom in to be understood as constituting the pres- coined silver has been stated upon another The old Seville piece of 386 grains was extremely overvalued in the United with the more ancient contracts respect- exceeds I to 15, and the average propor-

tion throughout Europe is probably not parts of a grain of pure gold, equal to ten currency. To determine this, the quanford the rule. Taking the rate of the late dollar of 374 grains, the proportion would be as 1 to 14.87. the coins of Great Britain, which is as actual or market proportion, which is not quite 1 to 15.

The preceding view of the subject does not indeed afford a precise or certain definition of the present unit in the coins, but it furnishes data which will serve as guides in the progress of the investigation. It ascertains, at least, that the sum in the money of account of each State, corresponding with the nominal value of the dollar in such State, corresponds also with 24 grains and 6/8 of a grain of fine gold, and with something between 368 and 374 grains of fine silver.

The next inquiry towards a right determination of what ought to be the future metals in preference to the other or not; certain sense, of all other property. and, if to either, to which of them?

grains and 64 hundredths of a grain of two. fine silver. The same resolution, however,

more than about 1 to 144/5. But that dollars, and the other of half that quanstatement has proceeded upon the idea of tity of pure gold, equal to five dollars. the ancient dollar. One pennyweight of And it is not explained whether either of gold of twenty-two carats fine at 6s. 8d. the two species of coins, of gold, or silver, and the old Seville piece of 386 grains and shall have any greater legality in pay-15 mites of pure silver at 7s. 6d. furnish ments than the other. Yet it would seem the exact ratio of 1 to 15.6262. But this that a preference in this particular is does not coincide with the real difference necessary to execute the idea of attaching between the metals in our market or, the unit exclusively to one kind. If each which is with us the same thing, in our of them be as valid as the other in payments to any amount, it is not obvious in tity of fine silver in the general mass of what effectual sense either of them can be the dollars now in circulation must af- deemed the money unit rather than the other.

If the general declaration, that the dolbe as 1 to 15.11. Taking the rate of the lar shall be the money unit of the United newest dollar, the proportion would then States, could be understood to give it a The mean of the two superior legality in payments, the instituwould give the proportion of 1 to 15 very tion of coins of gold and the declaration nearly: less than the legal proportions in that each of them shall be equal to a certain number of dollars, would appear to 1 to 15.2; but somewhat more than the destroy that inference. And the circumstance of making the dollar the unit in the money of account seems to be rather matter of form than of substance.

Contrary to the ideas which have heretofore prevailed in the suggestions concerning a coinage for the United States, though not without much hesitation, arising from a deference for those ideas, the Secretary is, upon the whole, strongly inclined to the opinion that a preference ought to be given to neither of the metals for the money unit. Perhaps, if either were to be preferred, it ought to be gold rather than silver.

The reasons are these:

The inducement to such a preference is money unit of the United States turns to render the unit as little variable as upon these questions: Whether it ought possible, because on this depends the to be peculiarly attached to either of the steady value of all contracts and, in a it is truly observed that, if the unit be-The suggestions and proceedings, hith- long indiscriminately to both the metals, erto, have had for object the annexing it is subject to all the fluctuations that of it emphatically to the silver dollar. happen in the relative value which they A resolution of Congress of the 6th of bear to each other. pronounce with certainty that the possession of a less quantity of specie is a consequence of overvaluing either of the metals, there is enough of probability in the considerations which seem to indicate it to form an argument of weight against such overvaluation.

A third ill consequence resulting from it is a greater and more frequent disturbance of the state of the money unit by a greater and more frequent diversity between the legal and market proportions of the metals. This has not hitherto been experienced in the United States, but it has been experienced elsewhere; and from its not having been felt by us hitherto it does not follow that this will not be the case hereafter, when our commerce shall have attained a maturity which will place it under the influence of more fixed principles.

In establishing a proportion between the metals, there seems to be an option

of one or two things:-

To approach as nearly as can be ascertained the mean or average proportion in what may be called the commercial world; or

To retain that which now exists in the United States.

As far as these happen to coincide, they will render the course to be pursued more plain and more certain.

To ascertain the first with precision would require better materials than are possessed or than could be obtained without an inconvenient delay.

to the treasury of Great Britain, in the of disorder in the national coinage. year 1717, after stating the particular proportions in the different countries of terest hereafter to be made to Holland Europe, concludes thus: "By the course of trade and exchange between nation and nation in all Europe fine gold is to fine silver as $14^4/_5$ or 15 to 1."

But however accurate and decisive this authority may be deemed in relation to the period to which it applies, it cannot be taken at the distance of more than any country, for the legal than the marseventy years as a rule for determining ket proportion, if this can be supposed to

fluence upon the market values. Never-But, however impossible it may be to theless, there is reason to believe that the state of the matter as represented by Sir Isaac Newton is not very remote from its actual state.

> In Holland, the greatest money market of Europe, gold was to silver, in December, 1789, as 1 to 14.88; and in that of London it has been for some time past but little different, approaching, perhaps, something nearer 1 to 15.

> It has been seen that the existing proportion between the two metals in this country is about as 1 to 15.

> It is fortunate, in this respect, that the innovations of the Spanish mint have imperceptibly introduced a proportion so analogous as this is to that which prevails among the principal commercial nations, as it greatly facilitates a proper regulation of the matter.

This proportion of 1 to 15 is recommended by the particular situation of our trade, as being very nearly that which obtains in the market of Great Britain, to which nation our specie is principally exported. A lower rate for either of the metals, in our market than in hers, might not only afford a motive the more, in certain cases, to remit in specie rather than in commodities; but it might, in some others, cause us to pay a greater quantity of it for a given sum than we should otherwise do. If the effect should rather be to occasion a premium to be given for the metal which was underrated, this would obviate those disadvantages; but it would involve another—a customary difference between the market and legal pro-Sir Isaac Newton, in a representation portions which would amount to a species

Looking forward to the payments of inthe same proportion does not appear ineligible. The present legal proportion in the coins of Holland is stated to be 1 to 149/10. That of the market varies somewhat at different times, but seldom very widely from this point.

There can hardly be a better rule, in

metal finds its true level, according to its formity is favorable to order. intrinsic utility in the general system of money operations.

pecuniary transactions portion, however produced, coincides so nearly with what may be deemed the commercial average, it may be supposed to furnish as good a rule as can be pursued.

The only question seems to be whether the value of gold ought not to be a little lowered to bring it to a more exact level with the two markets which have been mentioned. But, as the ratio of 1 to 15 is so nearly conformable to the state of those own, it will probably be found the most eligible. If the market of Spain continues to give a higher value to gold (as it has done in time past) than that which is recommended, there may be some advantage in a middle station.

A further preliminary to the adjusttermine what shall be the proportion and composition of alloy in each species of the coins.

But the difference seems the metals merely by the successive degra- to be that there it is merely an ocdations of the dollar in consequence of casional indemnity within a certain the mutability of a foreign mint. The limit for real and unavoidable errors and value of gold to silver appears to have imperfections, whereas, in the practice of declined wholly from this cause from 156/10 the mints of France and Spain, it appears to about 15 to 1. Yet, as this last pro- to amount to a stated and regular deviation from the nominal standard. Accordingly, the real standards of France and Spain are something worse than 22 carats, or 11 parts in 12 fine.

The principal gold coins in Germany, Holland, Sweden, Denmark, Poland, and Italy, are finer than those of England and Portugal, in different degrees, from 1 carat and 1/4 to I carat and 7/8, which last is within 1/8 of a carat of pure gold.

There are similar diversities in the markets and best agrees with that of our standards of the silver coins of the different countries of Europe. Great Britain is 222 parts fine to alloy: those of the other European nations vary from that of Great Britain as widely as from about 17 of the same parts better to 75 worse.

The principal reasons assigned for the ment of the future money unit is to de- use of alloy are the saving of expense in the refining of the metals (which in their natural state are usually mixed with a portion of the coarser kinds) and the rendering of them harder as a security of August, 1786, before referred to, is against too great waste by friction or regulated at one-twelfth, or, in other wearing. The first reason drawn from words, at 1 part alloy to 11 parts fine, the original composition of the metals is whether gold or silver, which appears to strengthened at present by the practice of be a convenient rule, unless there should alloying their coins, which has obtained be some collateral consideration which among so many nations. has been appealed to as proving that the similar in this particular. In England more alloyed coins wear faster than the comage is said to be entirely free, the purer. The true state of this matter may mint price of the metals in bullion being be worthy of future investigation, though the same with the value of them in coin. first appearances are in favor of alloy. In In France there is a duty which has been, the mean time the saving of trouble and if it is not now, 8 per cent. In Holexpense are sufficient inducements to following those examples which suppose its expediency. And the same considerations lead to taking as our models those nations thing less than 1 per cent. upon gold, with whom we have most intercourse and whose coins are most prevalent in our circulation. These are Spain, Portugal, England, and France. The relation which the proposed proportion bears to their gold coins has been explained. In respect to their silver coins, it will not be very remote from the mean of their several standards.

The component ingredients of the alloy in each metal will also require to be regulated. In silver, copper is the only kind in use, and it is doubtless the only proper one. In gold there is a mixture of silver and copper, in the English coins consisting of equal parts, in the coins of some other countries varying from 1/3 to ²/₃ silver.

The reason of this union of silver with copper is this: the silver counteracts the tendency of the copper to injure the color or beauty of the coin by giving it too much redness, or rather a coppery hue, which a small quantity will produce; and the copper prevents the too great whiteness which silver alone would confer. It is apprehended that there are considerations which may render it prudent to establish by law that the proportion of silver to copper in the gold coins of the United States, shall not be more than 1/2 nor less than 1/3 vesting direction in some proper place to regulate the matter within those limits, as experience in the execution may recommend.

A third point remains to be discussed as a prerequisite to the determination of the money unit, which is whether the expense of coining shall be defrayed by the public or out of the material itself, or, as it is sometimes stated, whether coinage shall be free or shall be subject to a duty or imposition. This forms, perhaps, one of the nicest questions in the doctrine might, in fact, be represented by a less of money.

land there is a difference between the mint price and the value in the coins, which has been computed at .96 or someat 1.48 or something less than 11/2 per cent. upon silver. The resolution of the 8th of August, 1786, proceeds upon the idea of a deduction of 1/2 per cent. from gold and of 2 per cent. from silver as an indemnification for the expense of coining. This is inferred from a report of the late Board of Treasury, upon which that resolution appears to have been founded.

Upon the supposition that the expense of coinage ought to be defrayed out of the metals, there are two ways in which it may be effected—one by a reduction of the quantity of fine gold and silver in the coins, the other by establishing a difference between the value of those metals in the coins and the mint price of them in bullion.

The first method appears to the Secretary inadmissible. He is unable to distinguish an operation of this sort from that of raising the denomination of the coin—a measure which has been disapproved by the wisest men of the nations in which it has been practised and condemned by the rest of the world. To declare that a less weight of gold or silver shall pass for the same sum which before represented a greater weight or to ordain that the same weight shall pass for a greater sum are things substantially of one nature. The consequence of either of them, if the change can be realized, is to degrade the money unit, obliging creditors to receive less than their just dues and depreciating property of every kind. For it is manifest that everything would in this case be represented by less quantity of gold and silver than be-

It is sometimes observed, on this head, that, though any article of property actual quantity of pure metal, it would, The practice of different nations is dis-nevertheless, be represented by something

of the same intrinsic value. pense of fabrication—a truth not less applicable to a piece of coin than to a yard

This position, well founded in itself, is here misapplied. It supposes that the coins now in circulation are to be considered as bullion, or, in other words, as raw material. But the fact is that the adoption of them as money has caused them to become the fabric: it has invested them with the character and office of coins, and has given them a sanction and efficacy equivalent to that of the stamp of the sovereign. The prices of all our commodities at home and abroad, and of all foreign commodities in our markets, have found their level in conformity to this principle. The foreign coins may be divested of the privilege they have hitherto been permitted to enjoy, and may of course be left to find their value in the market as a raw material. But the quantity of gold and silver in the national coins corresponding with a given sum cannot be made less than heretofore without disturbing the balance of intrinsic value, and making every acre of land as well as every bushel of wheat of less actual worth than in time If the United States were isolated and cut off from all intercourse with the rest of mankind, this reasoning would not be equally conclusive. But it appears decisive when considered with a view to the relations which commerce has created between us and other countries.

It is, however, not improbable that the effect meditated would be defeated by a tion of the intrinsic value of the coins. This might be looked for in every enlightened commercial country, but, perto be the dupes of sounds, in none has authority so little resource for substituting names for things.

only nominally and in appearance, could of merchandise. not fail to distract the ideas of the community, and would be apt to breed dis- of this kind are: content as well among all those who live on the income of their money as among of extra expense.

Every fab- the necessaries of life would seem to have ric, it is remarked, is worth intrinsically become dearer. In the confusion of such the price of the raw material and the ex- a state of things ideas of value would not improbably adhere to the old coins, which, from that circumstance, instead of feeling the effect of the loss of their privilege as money, would, perhaps, bear a price in the market relatively to the new ones in exact proportion to weight. frequency of the demand for the metals to pay foreign balances would contribute to this effect.

Among the evils attendant on such an operation are these: creditors both of the public and of individuals would lose a part of their property, public and private credit would receive a wound, the effective revenues of the government would be diminished. There is scarcely any point in the economy of national affairs of greater moment than the uniform preservation of the intrinsic value of the money unit. On this the security and steady value of property essentially depend.

The second method, therefore, of defraying the expense of the coinage out of the metals is greatly to be preferred to the other. This is to let the same sum of money continue to represent in the new coins exactly the same quantity of gold and silver as it does in those now current; to allow at the mint such a price only for those metals as will admit of profit just sufficient to satisfy the expense of coinage; to abolish the legal currency of the foreign coins, both in public and private payments; and of course to leave the superior utility of the national coins for domestic purposes, to operate the difference of market value, which is necessary to inrise of prices proportioned to the diminu- duce the bringing of bullion to the mint. In this case all property and labor will still be represented by the same quantity of gold and silver as formerly; and the haps, in none with greater certainty than only change which will be wrought will this, because in none are men less liable consist in annexing the office of money exclusively to the national coins, consequently withdrawing it from those of foreign countries, and suffering them to be-A general revolution in prices, though come, as they ought to be, mere articles

The arguments in favor of a regulation

Secondly. That the existence of such a regulation promotes a favorable course of exchange and benefits trade not only by that circumstance, but by obliging foreigners in certain cases to pay dearer for domestic commodities and to sell their own cheaper.

As far as relates to the tendency of a free coinage to produce an increase of expense in the different ways that have been stated, the argument must be allowed to have foundation both in reason and in experience. It describes what has been ex-

emplified in Great Britain.

The effect of giving an artificial value to bullion is not at first sight obvious; but it actually happened at the period immediately preceding the late reformation in the gold coin of the country just named. A pound troy in gold bullion of standard fineness was then from 19s. 6d. to 25s. sterling dearer than an equal weight of guineas as delivered at the mint. The phenomenon is thus accounted for: The old guineas were more than 2 per cent. lighter than their standard weight. This weight, therefore, in bullion, was truly worth 2 per cent. more than those guineas. It consequently had in respect to them a correspondent rise in the market.

And, as guineas were then current by tale, the new ones, as they issued from the mint, were confounded in circulation with the old ones, and by the association were depreciated below the intrinsic value recompense for the trouble and risk. And, in comparison with bullion. It became, as the amount of one hundred louis d'ors of course, a profitable traffic to sell bullion in England might be afforded for ninetyfor coin, to select the light pieces and re- six in France with a profit of more than issue them in currency, and to melt down 11/2 per cent., bills upon England might the heavy ones and sell them again as fall in France to 4 per cent. below par, bullion. This practice, besides other in- 1 per cent. being a sufficient profit to the

But the remainder of the argument infinite latitude for fallacy and error.

The most plausible part of it is that Experience in France has shown that the and coin, sometimes to the full extent of ital of the nation, is materially augmented. the difference; and it would seem to be a clear inference that, whenever that difference materially exceeded the charges of remitting bullion from the country where it existed to another in which coinage is free, exchange would be in favor of the former.

If, for instance, the balance of trade between France and England were at any time equal, their merchants would naturally have reciprocal payments to make to an equal amount, which, as usual, would be liquidated by means of bills of exchange. If in this situation the difference between coin and bullion should be in the market as at the mint of France 8 per cent., if also the charges of transporting money from France to England should not be above 2 per cent., and if exchange should be at par, it is evident that a profit of 6 per cent. might be made by sending bullion from France to England and drawing bills for the amount. One hundred louis d'ors in coin would purchase the weight of one hundred and eight in bullion, one hundred of which remitted to England would suffice to pay a debt of an equal amount; and, two being paid for the charges of insurance and transportation, there would remain six for the benefit of the person who should manage the negotiation. But, as so large a profit could not fail to produce competition, the bills in consequence of this would decrease in price till the profit was reduced to the minimum of an adequate

other advantages supposed, of domestic commodities and to sell their which includes a favorable balance of It is understood in this sense the prices of domestic commodities (such at least as are peculiar to the country) remain attached to the denominations of the ccins. When a favorable balance of trade realizes in the market the mint difference between coin and bullion, foreigners who must pay in the latter are obliged to give more of it for such commodities than they otherwise would do. Again, the bullion, in the home market, will procure the same quantity of goods in the foreign market as before, which is said to render foreign commodities cheaper. In this reasoning much fallacy is to be suspected. If it be true that foreigners pay more for domestic commodities, it must be equally true that they get more for their own when they bring them themselves to the market. If peculiar or other domestic commodities adhere to the denominations of the coins, no reason occurs why foreign commodities of a like character should not do the same thing; and in this case the foreigner, though he receive only the same value in coin for his merchandise as formerly, can convert it into a greater quantity of bull-Whence the nation is liable to lose more of its gold and silver than if their intrinsic value in relation to the coins were preserved. And whether the gain or the loss will, on the whole, preponderate, would appear to depend on the comparative proportion of active commerce of the one country with the other.

It is evident, also, that the nation must pay as much gold and silver as before for the commodities which it procures abroad; and whether it obtains this gold and silver cheaper or not turns upon the solution of the question just intimated, respecting the relative proportion of active commerce between the two countries.

mitted in the reasoning that the advan- stances concur in securing to France so tages supposed, which depend on a favor- uniform and so considerable a balance able balance of trade, have a tendency of trade as in a great measure to counter-

seek some other vent for their commodities and some other market where they obliging foreigners to pay dearer for can supply their wants at an easier rate. A tendency of this kind, if real, would be own cheaper, are applied to a situation a sufficient objection to the regulation. Nothing which contributes to change a beneficial current of trade can well compensate by particular advantages for so injurious an effect. It is far more easy to transfer trade from a less to a more favorable channel than, when once transferred, to bring it back to its old one. Every source of artificial interruption to an advantageous current is, therefore, cautiously to be avoided.

It merits attention that the able minwhich is now obtained at a cheaper rate ister who lately and so long presided over the finances of France does not attribute to the duty on coinage in that country any particular advantages in relation to exchange and trade. Though he rather appears an advocate for it, it is on the sole ground of the revenue it affords, which he represents as in the nature of a very moderate duty on the general mass of exportation.

And it is not improbable that to the singular felicity of situation of that kingdom is to be attributed its not having been sensible of the evils which seem incident to the regulation. There is, perhaps, no part of Europe which has so little need of other countries as France. Comprehending a variety of soils and climates, an immense population, its agriculture in a state of mature improvement, it possesses within its own bosom most, if not all, the productions of the earth which any of its most favored neighbors can boast. The variety, abundance, and excellence of its wines constitute a peculiar advantage in its favor. Arts and manufactures are there also in a very advanced state, some of them of considerable importance and in higher perfection than elsewhere. the coin and give it a base countenance. Its beauty would indeed be injured, though in a less degree, even if the usual proportions of silver and copper should be maintained in the increased quantity of alloy.

And, however inconsiderable an additional expenditure of copper in the coinage of a year may be deemed, in a series of years it would become of consequence. In regulations which contemplate the lapse and operation of ages a very small item of expense acquires importance.

The actual depreciation of the coin by an increase of alloy results from the very circumstance which is the motive to itthe greater difficulty of refining. In England it is customary for those concerned tion in the price of fourpence sterling per ounce of fine gold for every carat which the mass containing it is below the legal standard. Taking this as a rule, an inferiority of a single carat, or one twentyfourth part, in the gold coins of the of Great Britain. felt in the market of the United States.

public opinion would be apprehended ion of the English or any other standard. from the apparent debasement of the coin. cannot safely be disregarded in anything that relates to money. If the beauty of the coin be impaired, it may be found difficult to satisfy the generality of the community that what appears worse is not really less valuable, and it is not altogether certain that an impression of its being so may not occasion an unnatural augmentation of prices.

Greater danger of imposition by couninjury which will be done to the appearance of the coin. It is a just observation that "the perfection of the coins is a

coins particularly, is a matter of moment. as the excellence of the workmanship is It has been noted that the alloy in them an ingredient in that perfection. The inconsists partly of silver. If, to avoid ex- termixture of too much alloy, particularpense, the addition should be of copper ly of copper, in the gold coins at least, only, this would spoil the appearance of must materially lessen the facility of distinguishing by the eye the purer from the baser kind, the genuine from the counterfeit.

The inefficacy of the arrangement to the purpose intended to be answered by it is rendered probable by different considerations. If the standard of plate in the United States should be regulated according to that of the national coins, it is to be expected that the goldsmith would prefer these to the foreign coins, because he would find them prepared to his hand in the state which he desires, whereas he would have to expend an additional quantity of alloy to bring the foreign coins to that state. If the standard of plate by law or usage should be superior in manufactures of gold to make a deduc- to that of the national coins, there would be a possibility of the foreign coins bearing a higher price in the market; and this would not only obstruct their being brought to the mint, but might occasion the exportation of the national coin in preference. It is not understood that the United States, compared with the English practice of making an abatement of price standard, would cause the same quantity for the inferiority of standard is appliof pure gold in them to be worth nearly cable to the English mint; and, if it be 4/10 per cent. less than in the coins not, this would also contribute to frus-This circumstance trating the expected effect from the inwould be likely in process of time to be crease of alloy. For, in this case, a given quantity of pure metal in our standard still greater depreciation in the would be worth as much there as in bull-

Considering, therefore, the uncertainty The effects of imagination and prejudice of the success of the expedient and the inconveniences which seem incident to it, it would appear preferable to submit to those of a free coinage. It is observable that additional expense, which is one of the principal of these, is also applicable to the proposed remedy.

It is now proper to resume and finish the answer to the first question, in order to do which the three succeeding ones have necessarily been anticipated. The conterfeits is also to be apprehended from the clusion to be drawn from the observations which have been made on the subject is this: That the unit in the coins of the United States ought to correspond with great safeguard against counterfeits." 24 grains and 3/4 of a grain of pure gold, And it is evident that the color as well and with 371 grains and 1/4 of a grain of

The denominations of the silver coins contained in the resolution of the 8th One silver piece, which shall also be a of August, 1786, are conceived to be significant and proper. The dollar is recom-

present coin of that name for which it is designed to be a substitute, which will facilitate its ready adoption as such in the minds of the citizens. The dime, or tenth, the cent, or hundredth, the mill, or thousandth, are proper because they express the proportions which they are intended to designate. It is only to be regretted that the meaning of these terms will not be familiar to those who are not acquainted with the language from which they are borrowed. It were to be wished that the length and, in some degree, the clumsiness of some of the corresponding terms in English did not discourage from preferring them. It is useful to have names which signify the things to which they belong, and, in respect to objects of general use, in a manner intelligible to all. Perhaps it might be an improvement to let the dollar have the appellation either of dollar or unit (which latter will be the more significant), and to substitute "tenth" for dime. In time the unit may succeed to the dollar. The word cent being in use in various transactions and instruments will without much difficulty be understood as the hundredth, and the half-cent, of course, as the two-hundredth part.

The eagle is not a very expressive or apt appellation for the larger gold piece, but nothing better occurs. The smaller of the two gold coins may be called the dollar, or unit, in common with the silver piece with which it coincides.

The volume or size of each piece is a matter of more consequence than its denomination. It is evident that, the more superficies or surface, the more the piece will be liable to be injured by friction, or, in other words, the faster it will wear. For this reason it is desirable to render the thickness as great, in proportion to the breadth, as may consist with neatness and good appearance. Hence the form of the double guinea, or double louis d'or, is preferable to that of the half johannes, for the large gold piece. The small one cannot well be of any other size than the Portuguese piece of eight, of the same

mended by its correspondency with the one, as far as the quantity of matter (the alloy being less) permits, agree with the form and size of the present. The diameter may be the same.

The tenths may be in a mean between the Spanish 1-8 and 1-16 of a dollar.

The copper coins may be formed merely with a view to good appearance, as any difference in the wearing that can result from difference of form can be of little consequence in reference to that metal.

It is conceived that the weight of the cent may be eleven pennyweights, which will about correspond with the value of the copper and the expense of coinage. This will be to conform to the rule of intrinsic value, as far as regard to the convenient size of the coins will permit; and the deduction of the expense of coinage in this case will be the more proper, as the copper coins which have been current hitherto have passed till lately for much more than their intrinsic value. Taking the weight, as has been suggested, the size of the cent may be nearly that of the piece herewith transmitted, which weighs 10 dwt. 11 grs. 10 m. Two-thirds of the diameter of the cent will suffice for the diameter of the half-cent.

It may, perhaps, be thought expedient, according to general practice, to make the copper coinage an object of profit; but, where this is done to any considerable extent, it is hardly possible to have effectual security against counterfeits. sideration, concurring with the soundness of the principle of preserving the intrinsic value of the money of a country, seems to outweigh the consideration of profit.

The foregoing suggestions respecting the sizes of the several coins are made on the supposition that the legislature may think fit to regulate this matter. Perhaps, however, it may be judged not unadvisable to leave it to executive discretion.

With regard to the proposed size of the cent it is to be confessed that it is rather greater than might be wished, if it could, with propriety and safety, be made less; and, should the value of copper continue to decline as it has done for some time past, it is very questionable whether it will long remain alone a fit metal for money. This As it is of consequence to fortify the has led to a consideration of the expeidea of the identity of the dollar, it may diency of uniting a small proportion of be best to let the form and size of the new silver with copper, in order to be able to

this there are precedents in several parts will materially extend the substitute in of Europe. In France the composition the course of that year, and its extension which is called billon has consisted of one will be so far increased during the third part silver and four parts copper, accord- year by the facility of procuring the reing to which proportion a cent might con- maining species to be recoined, which will tain seventeen grains, defraying out of the arise from the diminution of their curmaterial the expense of coinage. The conveniency of size is a recommendation of such a species of coin, but the Secretary is deterred from proposing it by the apprehension of counterfeits. The effect of so small a quantity of silver in comparatively so large a quantity of copper could easily be imitated by a mixture of other metals of little value, and the temptation to doing sudden stagnation of circulation, will it would not be inconsiderable.

The devices of the coins are far from being matters of indifference, as they may be made the vehicles of useful impressions. They ought, therefore, to be emblematical, but without losing sight of simplicity. The fewer sharp points and angles there are, the less will be the loss by wearing. The Secretary thinks it best on this head to confine himself to these concise and general remarks.

The last point to be discussed respects the currency of foreign coins.

The abolition of this in proper season is a necessary part of the system contemplated for the national coinage. But this it will be expedient to defer till some considerable progress has been made in preparing substitutes for them. A gradation found expedient; and it may tend to obmay therefore be found most convenient.

The foreign coins may be suffered to circulate precisely upon their present footing be exerted when the period shall arrive. for one year after the mint shall have commenced its operations. The privilege may then be continued for another year to the current for one year more at the rates correspond with the unit of weight. tion of all foreign coins to cease.

coined before they are issued anew, will by the resolution of the 8th of August, afford a partial substitute before any 1786, fixing the dollar at 375 grains and interruption is given to the pre-existing supplies of circulation. lessen the bulk of the inferior coins. For of the discontinuance of their currency rent values, as probably to enable the dispensing wholly with the circulation of foreign coins after that period. The progress which the currency of bank-bills will be likely to have made during the same time will also afford a substitute of another kind.

This arrangement, besides avoiding a cause a considerable proportion of whatever loss may be incident to the establishment in the first instance to fall as it ought to do upon the government, and will probably tend to distribute the remainder of it more equally among the community.

It may, nevertheless, be advisable in addition to the precautions here suggested to repose a discretionary authority in the President of the United States to continue the currency of the Spanish dollar, at a value corresponding with the quantity of fine silver contained in it, beyond the period above mentioned for the cessation of the circulation of the foreign coins. It is possible that an exception in favor of this particular species of coin may be viate inconveniences, if there be a power to make the exception, in a capacity to

in your souls? in the gay morn of manhood from all the from whom nothing can be hid. I would joys which sweeten life, doomed to drag not dwell too long upon the horrid effects on a pitiful existence, without even a hope which have already followed from quarto taste the pleasures of returning health! tering regular troops in this town; let Yet, Monk, thou livest a warning to thy our misfortunes teach posterity to guard country, which sympathizes with thee in thy sufferings; thou livest an affecting, an ing armies are sometimes (I would by alarming instance of the unbounded violence which lust of power, assisted by a versally) composed of persons who have standing army, can lead a traitor to com-

For us he bled, and now languishes. The wounds by which he is tortured to a lingering death were aimed at our coun-Surely the meek-eyed Charity can never behold such sufferings with indifference. Nor can her lenient hand forbear to put oil and wine into these wounds, and to assuage at least what it cannot heal.

Patriotism is ever united with humanity and compassion. This noble affection which impels us to sacrifice everything dear, even life itself, to our country, involves in it a common sympathy and tenderness for every citizen, and must ever have a particular feeling for one who suffers in a Thoroughly persuaded of public cause. this, I need not add a word to engage your compassion and bounty towards a fellowcitizen who, with long-protracted anguish, • falls a victim to the relentless rage of our common enemies.

Ye dark designing knaves, ye murderers, parricides! how dare you tread upon the earth, which has drank in the blood of slaughtered innocents, shed by your wicked hands? How dare you breathe that air which wafted to the ear of Heaven the groans of those who fell a sacrifice to your accursed ambition? But if the laboring earth doth not expand her jaws; if the air you breathe is not commissioned to be the minister of death, yet hear it and tremble! The eye of Heaven penetrates the darkest chambers of the soul, traces the leading clew through all the labyrinths which your industrious folly had devised; and you, however you may have screened yourselves from human eyes, must be arraigned, must lift your hands, red with the blood of those whose death you have procured, at the tremendous bar of God.

But I gladly quit the gloomy theme of ample security against foreign foes? death, and leave you to improve the want not courage; it is discipline alone thought of that important day, when our in which we are exceeded by the most

Unhappy Monk; cut off naked souls must stand before that Being against such evils for the future. Standno means say generally, much less unirendered themselves unfit to live in civil society; who have no other motives of conduct than those which a desire of the present gratification of their passions suggests; who have no property in any country; men who have given up their own liberties, and envy those who enjoy liberty; who are equally indifferent to the glory of a George or a Louis; who for the addition of one penny a day to their wages would desert from the Christian cross to fight under the crescent of the Turkish sultan. From such men as these what has not a state to fear? With such as these, usurping Casar passed the Rubicon; with such as these he humbled mighty Rome, and forced the mistress of the world to own a master in a traitor. These are the men whom sceptred robbers now employ to frustrate the designs of God, and render vain the bounties which His gracious hand pours indiscriminately upon His creatures. By these the miserable slaves in Turkey, Persia, and many other extensive countries, are rendered truly wretched, though their air is salubrious, and their soil luxuriously fertile. By these France and Spain, though blessed by nature with all that administers to the convenience of life, have been reduced to that contemptible state in which they now appear; and by these Britain—but if I were possessed of the gift of prophecy, I dare not, except by divine command, unfold the leaves on which the destiny of that once powerful kingdom is inscribed.

But, since standing armies are so hurtful to a state, perhaps my countrymen may demand some substitute, some other means of rendering us secure against the incursions of a foreign enemy. you be one moment at a loss? a well-disciplined militia afford

He was in comus joyfully leave our concerns in the mand of different military departments hands of Him who raiseth up and putteth after the war; and was the unsuccessful down the empires and kingdoms of the Democratic candidate for the Presidency of the United States in 1880, when he received 4,444,952 votes, against 4,454,416 for James A. Garfield, the successful Republican candidate. Of him General Grant said: "Hancock stands the most conspicuous figure of all the general officers who did not exercise a separate command. He commanded a corps longer than any other one, and his name was never mentioned as having committed in battle a blunder for which he was responsible." To an adverse critic bluff General Sherman said: "If you will sit down and write the best thing that can be put into language about General Hancock as an officer and a gentleman, I will sign it without hesitation." General Hancock died on Governor's Island, New York, Feb. 9. 1886.

Hancock, Fort, one of the most important protective works on the Atlantic coast, established on Sandy Hook, N. J., about 20 miles from New York City, and named in honor of Gen. Winfield Scott Hancock. The locality was first used by the government as a proving-ground for heavy ordnance. The main ship - channel lies directly across the end of the Hook, and through this is the entrance to the lower bay of New York. This consideration suggested the advisability of making the Hook a strong fortified post, and the work was carried on so thoroughly that when war was declared against Spain (1898) Generals Miles and Merritt pronounced Fort Hancock impregnable. that time four batteries were sent there. quartermaster of his regiment. Hanson, ALEXANDER CONTEE, editor; born in Maryland, Feb. 27, 1786. While editor of the Federal Republican, in Baltimore, he denounced the administration, and a mob destroyed his printing-office, June 22, 1812. The journal was re-established, and a second mob attacked the building, July 28. One of the mob was killed and several were wounded. As the result of a parley Hanson and his party, including Gen. Henry Lee, Gen. James M. Lingan, and some twenty-five others, surrendered on condition that the property was to be protected, and that they be sent to jail as a precaution against further attacks of the mob. Faith was not kept with Hanson, and the mob attacked the jail, killed General Lingan, seriously wounded General Lee, and left Hanson and others for dead in front of the building. In 1813 Hanson was elected to Congress, securing the nomination and election of and in 1817 to the United States Senate.

When the secession movement began, at the close of 1860, measures were taken for the security of this post. A small body of United States dragoons, under the command of Lieut. Roger Jones, was sent there as a precautionary meas-After the attack on Fort Sumter, rumors reached Harper's Ferry that the government property there would be speedily seized by the Virginians. The rumors were true. On the morning of April 18 the military commanders at Winchester and Charlestown received orders from Richmond to seize the armory and arsenal that night. They were further ordered to march into Maryland, where, it was expected, they would be joined by the min-ute-men of that State in an immediate attack on Washington. About 3,000 men were ordered out, but only about 250 were at the designated rendezvous, 4 miles from the Ferry, at the appointed hour-eight o'clock in the evening-but others were on the march. As a surprise was important,

HARRISON, BENJAMIN

and the manufacturer discovered and disclosed to our statesmen and to the people that commercial emancipation must be added to the political freedom which had been so bravely won. The commercial policy of the mother-country had not relaxed any of its hard and oppressive features. To hold in check the development of our commercial marine, to prevent or retard the establishment and growth of manufactures in the States, and so to secure the American market for their shops and the carrying trade for their ships, was the policy of European statesmen, and was pursued with the most selfish vigor.

Petitions poured in upon Congress urging the imposition of discriminating duties that should encourage the production of needed things at home. The patriotism of the people, which no longer found a field of exercise in war, was energetically directed to the duty of equipping the young republic for the defence of its independence by making its people self-Societies for the promotion dependent. of home manufactures and for encouraging the use of domestics in the dress of the people were organized in many of the States. The revival at the end of the century of the same patriotic interest in the preservation and development of domestic industries and the defence of our working people against injurious foreign competition is an incident worthy of attention. It is not a departure but a return that we have witnessed. The protective policy had then its opponents. The

or at any time sectional, it was only be-

the depths of the earth as well as in the sky; men were made free, and material things became our better servants.

The sectional element has happily been eliminated from tariff discussion. have no longer States that are necessarily only planting States. None are excluded from achieving that diversification of pursuits among the people which brings wealth and contentment. The cotton plantation will not be less valuable when the product is spun in the country town by operatives whose necessities call for diversified crops and create a home demand for garden and agricultural products. Every new mine, furnace, and factory is an extension of the productive capacity of the State more real and valuable than added territory.

Shall the prejudices and paralysis of slavery continue to hang upon the skirts of progress? How long will those who rejoice that slavery no longer exists cherish or tolerate the incapacities it put upon their communities? I look hopefully to the continuance of our protective system and to the consequent development of manufacturing and mining enterprises in the States hitherto wholly given to agriculture as a potent influence in the perfect unification of our people. The men who have invested their capital in these enterprises, the farmers who have felt the benefit of their neighborhood, and the men who work in shop or field will not fail to find and to defend a community of interest.

Is it not quite possible that the farmers argument was made, as now, that its bene- and promoters of the great mining and fits inured to particular classes or sections. manufacturing enterprises which have re-If the question became in any sense cently been established in the South may yet find that the free ballot of the workcause slavery existed in some of the ingman, without distinction of race, is States. But for this there was no reason needed for their defence as well as for his why the cotton-producing States should own? offices of kindness and education have been community either practise or connive at fairly tried the contrary conclusion cannot be plausibly urged.

I have altogether rejected the suggestion of a special executive policy for any section of our country. It is the duty of the executive to administer and enforce in the methods and by the instrumentalities pointed out and provided by the Constitution all the laws enacted by Congress. These laws are general and their administration should be uniform and equal. As a citizen may not elect what laws he amended as to make the inquiry into the will obey, neither may the executive elect which he will enforce. The duty to obey and to execute embraces the Constitution in its entirety and the whole code of laws enacted under it. The evil example of permitting individuals, corporations, or communities to nullify the laws because they cross some selfish or local interest or prejudices is full of danger, not only to the nation at large, but much more to those who use this pernicious expedient to escape their just obligations or to obtain an unjust advantage over others. They person applying for citizenship and a good will presently themselves be compelled to knowledge by him of our institutions. appeal to the law for protection, and those We should not cease to be hospitable to who would use the law as a defence must immigration, but we should cease to be not deny that use of it to others.

holding Fort Meigs and minor posts—were on the borders of the lake, at a point now called Port Clinton. General McArthur, Fort Meigs, was ordered to embark artillery, provisions, and stores from that place, and on the 20th the embarkation of the army upon Perry's vessels began. The weather was delightful, and the whole army were in high spirits. They rendezvoused first at Put-in-Bay Island, on the Middle Sister Island. The Kentuckians had left their horses on the peninsula between Sandusky Bay and Portage River, and were organized as infantry. In sixteen armed vessels and about 100 boats the armament started from the Detroit River. On the way a stirring address by which concluded as follows: "The genpretensions of a master. remember the River Raisin! but remember shall be called upon to perform. it only while victory is suspended. The revenge of a soldier cannot be gratified upon a fallen enemy." Expecting to be attacked at their landing-place, the troops debarked, Sept. 28, in perfect battle order, on Hartley's Point, nearly 4 miles below Amherstburg. No enemy was there. Proctor, who was in command at Fort Malden, taking counsel of prudence and fear, and in opposition to the earnest entreaties and indignant protests of his officers and Tecumseh, had fled northward with his army and all he could take with him, leaving Fort Malden, the navy buildings, and the storehouses smoking ruins. As the Americans approached the town, they met, instead of brave Britons and

The flotilla Lake Erie, and thus reinforced and en- arrived at Detroit on the 29th, and the couraged, Harrison moved immediately, same day Colonel Johnson arrived with and on Sept. 15-16, 1813, the whole army his troop of cavalry. Harrison had enof the Northwest-excepting some troops camped at Sandwich, and all started in pursuit. The enemy was overtaken at the Moravian Towns, on the Thames, and defeated in battle (see THAMES, BATTLE who had succeeded Clay in command of OF THE). Detroit and all Michigan were recovered. All that Hull had lost was regained. Col. Lewis Cass was at Detroit, with a strong garrison, as military governor of the territory. Soon after his victory General Harrison resigned his commission.

Inaugural Address.—On March 4, 1841, 24th, and the next day were upon the the President for a single month only delivered the following address:

Called from a retirement which I had supposed was to continue for the residue of my life to fill the chief executive office of this great and free nation, I appear before you, fellow-citizens, to take the General Harrison was read to the troops, oath which the Constitution prescribes as necessary qualification for the pereral entreats his brave troops to remember formance of its duties; and in obedience that they are sons of sires whose fame to a custom coeval with our 'government is immortal; that they are to fight for and what I believe to be your expectations, the rights of their insulted country, while I proceed to present to you a summary their opponents combat for the unjust of the principles which will govern me Kentuckians, in the discharge of the duties which I

> It was the remark of a Roman consul in an early period of that celebrated republic that a most striking contrast was observable in the conduct of candidates for offices of power and trust before and after obtaining them, they seldom carrying out in the latter case the pledges and promises made in the former. However much the world may have improved in many respects in the lapse of upward of 2,000 years since the remark was made by the virtuous and indignant Roman, I fear that a strict examination of the annals of some of the modern elective governments would develop similar instances of violated confidence.

Although the fiat of the people has painted savages, a troop of modest women gone forth proclaiming me the chief who came to implore mercy and protec- magistrate of this glorious Union, nothtion. earliest university, Western Reserve, founded at Hudson, Ohio, to be a Western Yale, was for many years a small school, and in the class of 1840 there were but five graduates. But just as great and beautiful cities have sprung from the prairies and in the midst of the forests, so out of these troublesome and ignorant conditions came a master of English style like Abraham Lincoln.

concerned, the great West grew very slowly and from small beginnings. James Hall, in 1835, attempted to gather some of the traditions of the past into his Sketches of the West, and edited a magazine - The Western Souvenir-and about the same time Timothy Flint began to publish his Western Monthly Review. Newspapers there were in plenty. About 1830, in the little city of Cincinnati, regularly appeared the semi-weekly Liberty Hall and the Cincinnati Gazette, the National Republican and Cincinnati Advertiser, the weekly Emporium and Independent Press, and one daily, the Commercial Advertiser. To this day many parts of remote regions like Arkansas and the Mississippi lowlands are less civilized than the Ohio of seventy years ago. In reformatory and charitable institutions the Mississippi Valley

has learned slowly. Our frontier great-slavery contest set North against South, grandfathers were frankly cruel—cruel and this obscured the normal coherence to their children, cruel to their apand weight of the central Western States. prentices, cruel to the insane, cruel Perhaps the first evidence of the political to the paupers, cruel to convicts, and influence of the valley was the intense cruel to slaves. The border fights and desire of the people of the United States gougings of the West shocked foreign to occupy it; Rogers Clark in 1778 was a and Eastern travellers, and Fearon has herald of national interest in the West. preserved a handbill of 1818 describing The earliest settlers on the head-waters an "extraordinary fight of furious ani- of the Tennessee and the Cumberland inmals" in New Orleans:

special laws for their management and disposition:

"Provided, that all revenues or proceeds of the same, except as regards such part thereof as may be used or occupied for the civil, military, or naval purposes of the United States, or may be assigned to the use of the local government, shall be used solely for the benefit of the inhabitants of the Hawaiian Islands for educational and

other public purposes.

"Art. 3. Until Congress shall otherwise provide, the existing government and laws of the Hawaiian Islands are hereby continued, subject to the paramount authority of the United States. The President, by and with the advice and consent of the Senate, shall appoint a commissioner to reside in the said islands, who shall have the power to veto any act of said government, and an act disapproved by him shall thereupon be void and of no effect unless approved by the President.

"Congress shall within one year from the exchange of the ratifications of this treaty enact the necessary legislation to extend to the Hawaiian Islands the laws of the United States respecting duties upon imnavigation; but until Congress shall otherwise provide, the existing commercial relations of the Hawaiian Islands, both with the United States and foreign countries, shall continue as regards the commerce of said islands with the rest of the United States and foreign countries. But this shall not be construed as giving the said islands the power to enter into any new to have diplomatic intercourse with any foreign government. The consular reprethe United States.

Congress of the United States shall enact the United States, and, if so coming, shall be subject to the same penalties as if entering from a foreign country.

> "Art. 5. The public debt of the Hawaiian Islands lawfully existing at the date of the exchange of the ratifications of this treaty, including the amounts due to depositors in the Hawaiian postal savingsbanks, is hereby assumed by the government of the United States, but the liability of the United States in this regard shall in no case exceed \$3,250,000. long, however, as the existing government and the present commercial relations of the Hawaiian Islands are continued as hereinbefore provided, said government shall continue to pay the interest on said debt.

> "Art. 6. The government of the United States agrees to pay Liliuokalani, the late queen, within one year from the date of the exchange of ratifications of this treaty the sum of \$20,000, and annually thereafter a like sum of \$20,000 during the term of her natural life, provided she in good faith submits to the authority of the goverument of the United States and the local government of the islands.

"And the government of the United ports, the internal revenue, commerce, and States further agrees to pay to the Princess Kaiaulani within one year from the date of the exchange of the ratifications of this treaty the gross sum of \$150,000. provided she in good faith submits to the authority of the government of the United States and the local government of the islands.

"Art. 7. The present treaty shall be ratified by the President of the United States, stipulation or agreement whatsoever, or by and with the advice and consent of the Senate, on the one part, and by the provisional government of the Hawaiian sentatives of foreign powers now resident Islands on the other, and the ratifications in the Hawaiian Islands shall be permitted thereof shall be exchanged at Honolulu to continue in the exercise of their con- as soon as possible. The first important act of Mr. Cleveland after his inauguration was to withdraw the treaty from the Senate and send JAMES H. BLOUNT (q, v) as a special commissioner to Hawaii, with "paramount" authority, to report upon the course of events. He withdrew the protectorate established by Mr. Stevens, who had been recalled in May, and remained in being robbed of its independence and its Hawaii until August. In September Albert S. Willis, of Kentucky, was appointed minister to the islands. Public attention, which had been somewhat diverted from Hawaiian affairs, was recalled to them make all possible reparation. by the publication, Nov. 10, of Secretary Gresham's report, in which he dwelt upon case with irresistible force, when the the proof of a conspiracy which had overturned the queen's government in January. This report was followed, Nov. 21, rendered not to the provisional govern-1893, by Commissioner Blount's report, ment, but to the United States. She surwhich displayed the results of his investigations in Hawaii, and had served as the basis for President Cleveland's policy. This policy was announced by message to Congress on Dec. 18 in the following lan-

"By an act of war, committed with the participation of a diplomatic representative of the United States and without authority of Congress, the government of a feeble but friendly and confiding people A substantial overthrown. been wrong has thus been done, which a due regard for our national character, as well as the rights of the injured people, requires we should endeavor to repair. The provisional government has not assumed a republican or other constitutional form, but has remained a mere executive council, or oligarchy, set up without the assent of the people. It has not sought to find a permanent basis of popular support, and but failed. A few weeks later he suchas given no evidence of an intention to ceeded, and on Dec. 19 laid before the prodo so. Indeed, the representatives of that visional government President Cleveland's

"In witness whereof the respective plen- waii are unfit for popular government, ruled by arbitrary or despotic power.

"The United States, in aiming to maintain itself as one of the most enlightened of nations, would do its citizens gross injustice if it applied to its international relations any other than a high standard of honor and morality. On that ground the United States cannot properly be put in the position of countenancing a wrong after its commission any more than in that of consenting to it in advance. On that ground it cannot allow itself to refuse to redress an injury inflicted through an abuse of power, by officers clothed with its authority and wearing its uniform; and on the same ground, if a feeble but friendly state is in danger of sovereignty by a misuse of the power of the United States, the United States cannot fail to vindicate its honor and its sense of justice by an earnest effort to

"These principles apply to the present special conditions of the queen's surrender of her sovereignty are recalled. She surrendered not absolutely and permanently, but temporarily and conditionally, until such time as the facts could be considered by the United States. Furthermore, the provisional government acquiesced in her surrender in that manner and on those terms, not only by tacit consent, but through the positive acts of some members of the government, who urged her peaceable submission not merely to avoid bloodshed, but because she could place implicit reliance upon the justice of the United States, and that the whole subject would be finally considered at Washing-

The restoration programme was variously received throughout the country. Meanwhile, in Honolulu, Minister Willis had in November attempted to extract from the queen a promise of amnesty for members of the provisional government, government assert that the people of Ha- desire for its abdication and restoration

of the monarchy, coupled with the queen's offer of pardon. This proposal was a few days later rejected by Mr. Dole for the provisional government. These proceedings became known in the middle of January, 1894, and on Jan. 13 President Cleveland transmitted the documents to Congress. Mr. Dole was not interfered with, and affairs in the islands quieted down at once. On Jan. 8, 1896, however, the following resolution relating to the Hawaiian Islands, offered by Representative Spalding (Republican, of Michigan), was read in the House and referred to the committee on foreign affairs:

"That Congress doth consent that the territory properly included within and rightfully belonging to the government of Hawaii, and commonly known as the Sandwich Islands, may be erected into a new State, to be called the State of Hawaii, with a republican form of government, to be adopted by the people of said government of Hawaii by deputies in convention assembled, with the consent of the existing government, in order that the same may be admitted as one of the States of this Union.

"Further, that the foregoing consent of Congress is given upon the following conditions and with the following guarantees, to wit:

"1. Said State to be formed subject to the adjustment by this government of all questions of boundary or jurisdiction that may arise with other governments or former governments of Hawaii; and the constitution thereof, with the proper evidence of its adoption by the people of the government of Hawaii, shall be transmitted to the President of the United States, to be laid before Congress for its final action on or before Jan. 1, 1898.

"2. Said State when admitted into the Union, after ceding to the United States all public property and means belonging to the government of Hawaii, shall retain all public funds of every kind which may belong to or be due said government, and also all the vacant and unappropriated land lying within its limits, to be applied to the payment of the debts and liabilities of said government of Hawaii, the residue of said lands to be disposed of as said State may direct; but in no case are said

of the monarchy, coupled with the queen's debts and liabilities to become a charge offer of pardon. This proposal was a few upon the United States.

"Further, that if the President of the United States shall in his judgment deem it most advisable, instead of proceeding to submit the foregoing resolution to the government of Hawaii as an overture on the part of the United States for admission, to negotiate with that government, then

"Resolved, that a State to be formed out of the present government of Hawaii, with one representative in Congress, shall be admitted into the Union by virtue of this act, as soon as the terms and conditions of such admission shall be agreed upon by the governments of Hawaii and the United States, and that \$100,000 be appropriated to defray the expenses of missions and negotiations, either by treaty or articles, as the President may direct."

In 1897, when President Cleveland's term expired, commissioners from Hawaii arrived in Washington to again urge a treaty of annexation. President McKinley was favorable to the plan, and on June 16, 1897, the following treaty of annexation was signed by Secretary of State Sherman for the United States, and Commissioners Hatch, Thurston, and Kinney for the republic of Hawaii:

TREATY OF 1897.

"The United States of America and the republic of Hawaii, in view of the natural dependence of the Hawaiian Islands upon the United States, of their geographical proximity thereto, of the preponderant share acquired by the United States and its citizens in the industries and trade of said islands, and of the expressed desire of the government of the republic of Hawaii that those islands should be incorporated into the United States as an integral part thereof, and under its sovereignty, have determined to accomplish by treaty an object so important to their mutual and permanent welfare.

"To this end the high contracting parties have conferred full powers and authority upon their respectively appointed plenipotentiaries—to wit:

of said government of Hawaii, the residue "The President of the United States, of said lands to be disposed of as said John Sherman, Secretary of State of the State may direct; but in no case are said United States; the President of the re-

"Article 1. The republic of Hawaii hereby cedes absolutely and without reserve to the United States of America all rights of sovereignty of whatsoever kind in and over the Hawaiian Islands and their dependencies; and it is agreed that all the territory of and appertaining to the republic of Hawaii is hereby annexed to the United States of America under the name of the Territory of Hawaii.

"Art. 2. The republic of Hawaii also cedes and hereby transfers to the United States the absolute fee and ownership of all public, government, or crown lands, public buildings or edifices, ports, harbors, property of every kind and description belonging to the government of the Haand appurtenance thereunto appertaining.

"The existing laws of the United States relative to public lands shall not apply to such lands in the Hawaiian Islands, but the Congress of the United States shall enact special laws for their management and disposition; provided, that all revenue from or proceeds of the same, except as regards such part thereof as may be used or occupied for the civil, military, or naval purposes of the United States, or may be assigned for the use of the local government, shall be used solely for the benefit of the inhabitants of the Hawaiian Islands, for educational and other public purposes.

"Art. 3. Until Congress shall provide for the government of such islands, all exercised by the officers of the existing government in said islands shall be vested exercised in such manner as the President of the United States shall direct, and the President shall have power to remove said officers and fill the vacancies so occa-

sioned.

Islands with foreign nations shall forth- the Senate, on the one part, and by the with cease and determine, being replaced President of the republic of Hawaii, by by such treaties as may exist or as may and with the advice and consent of the be hereafter concluded between the United Senate in accordance with the constitu-States and such foreign nations. Hayes, ISAAC ISRAEL, explorer; born in Chester county, Pa., March 5, 1832; graduated in medicine at the University of Pennsylvania in 1853. He was surgeon of the second Grinnell expedition to the polar seas under Dr. Elisha Kent Kane (q. v.). Satisfied of the existence of an open polar sea, he wrote and lectured on the subject on his return. He excited such interest in the subject that, with the aid of subscriptions in Europe and the United States, he was enabled to fit out the steamer United States, of 133 tons, in which he sailed from Boston, July 9, 1860, with thirteen other persons, for the Arctic regions. They anchored, after a perilous voyage, in Port Foulke, on the west coast of Greenland, in lat. 78° 17', on Sept. 9, where they wintered. In April, 1861, with twelve men and fourteen dogs, he pushed northward over the ice in a boat; but finally the vessel was sent back, and Dr. Hayes, with three companions and two dog-sledges, pressed on to land in lat. 81° 37′, beyond which they discovered open water. The expedition returned to Boston in October. Dr. Hayes found his country in civil war, and he served in it as a surgeon. In 1867 he published an account of his expedition, under the title born in Catonsville, Md., Feb. 18, 1837; of The Open Polar Sea; and the Royal served in the Confederate army in 1861- Geographical Society of London and the 65. that the sentiments declared in accepting and not otherwise. In furtherance of such the nomination for the Presidency will be obedience to the letter and the spirit of the standard of my conduct in the path the Constitution, and in behalf of all that before me, charged, as I am now, with the its attainment implies, all so-called party grave and difficult task of carrying them interests lose their apparent importance, out in the practical administration of and party lines may well be permitted to the government so far as depends, under fade into insignificance. The question we the Constitution and laws, on the chief have to consider for the immediate welexecutive of the nation.

The permanent pacification of the country upon such principles and by such of social order and all the peaceful inmeasures as will secure the complete protection of all its citizens in the free enjoyment of all their constitutional rights question in which every citizen of the is now the one subject in our public affairs nation is deeply interested, and with which all thoughtful and patriotic citi- respect to which we ought not to be, in zens regard as of supreme importance.

Many of the calamitous effects of the tremendous revolution which has passed over the Southern States still remain. immeasurable benefits which will surely follow, sooner or later, the hearty and generous acceptance of the legitimate results of that revolution have not yet been realized. Difficult and embarrassing questions meet us at the threshold of this subject. The people of those States are still impoverished, and the inestimable blessing of wise, honest, and peaceful local self-government is not fully enjoyed. Whatever difference of opinion may exist as to the cause of this condition of things, the fact is clear that in the progress of events the time has come when such government is the imperative necessity required by all the varied interests, public and private, of those States. But it must not be forgotten that only a local government which recognizes and maintains inviolate the rights of all is a true self-

With respect to the two distinct races whose peculiar relations to each other have brought upon us the deplorable complications and perplexities which exist in those States, it must be a government which guards the interests of both races carefully and equally. It must be a government which submits loyally and heartily to the Constitution and the laws am sincerely anxious to use every legitof the nation and the laws of the States imate influence in favor of honest and themselves-accepting and obeying faith- efficient local self-government as the true fully the whole Constitution as it is.

icent local governments can be built up, accomplish this purpose I ask the cordial

fare of those States of the Union is the question of government or no government; dustries and the happiness that belongs to it, or a return to barbarism. It is a a partisan sense, either Republicans or Democrats, but fellow-citizens and fellowmen, to whom the interests of a common country and a common humanity are dear.

The sweeping revolution of the entire labor system of a large portion of our country and the advance of 4,000,000 people from a condition of servitude to that of citizenship, upon an equal footing with their former masters, could not occur without presenting problems of the gravest moment, to be dealt with by the emancipated race, by their former masters, and by the general government, the author of the act of emancipation. That it was a wise, just, and providential act, fraught with good for all concerned, is now generally conceded throughout the country. That a moral obligation rests upon the national government to employ its constitutional power and influence to establish the rights of the people it has emancipated, and to protect them in the enjoyment of those rights when they are infringed or assailed, is also generally admitted.

The evils which afflict the Southern States can only be removed or remedied by the united and harmonious efforts of both races, actuated by motives of mutual sympathy and regard; and while in duty bound and fully determined to protect the rights of all by every constitutional means at the disposal of my administration, I resource of those States for the promotion Resting upon this sure and substantial of the contentment and prosperity of their foundation, the superstructure of benef- citizens. In the effort I shall make to

interest in the welfare of the country, trusting that party ties and the prejudice of race will be freely surrendered in behalf of the great purpose to be accomplished. In the important work of restoring the South it is not the political situation alone that merits attention. The material development of that section of the country has been arrested by the social and political revolution through which it has passed, and now needs and deserves the considerate care of the national government Constitution and wise public economy.

But at the basis of all prosperity for that, as well as for every other part of the country, lies the improvement of the intellectual and moral condition of the Universal suffrage should rest upon universal education. To this end, liberal and permanent provision should be made for the support of free schools by the State governments, and, if need be, supplemented by legitimate aid from national authority.

Let me assure my countrymen of the Southern States that it is my earnest desire to regard and promote their truest interests—the interest of the white and of the colored people both and equallyand to put forth my best efforts in behalf of a civil policy which will forever wipe out in our political affairs the color line and the distinction between North and South, to the end that we may have not merely a united North or a united South, but a united country.

I ask the attention of the public to the paramount necessity of reform in our civil service—a reform not merely as to certain abuses and practices of so-called official patronage which have come to have the sanction of usage in the several departments of our government, but a change in the system of appointment itself; a reform that shall be thorough, radical, and complete; a return to the principles and practices of the founders of the government. They neither expected nor desired from public officers any change to prosperous times. partisan service. They meant that public

co-operation of all who may cherish an character remained untarnished and the performance of his duties satisfactory. They held that appointments to office were not to be made nor expected merely as rewards for partisan services, nor merely on the nomination of members of Congress, as being entitled in any respect to the control of such appointments.

The fact that both the great political parties of the country, in declaring their principles prior to the election, gave a prominent place to the subject of reform of our civil service, recognizing and strongwithin the just limits prescribed by the ly urging its necessity, in terms almost identical in their specific import with those I have here employed, must be accepted as a conclusive argument in behalf of these measures. It must be regarded as the expression of the united voice and will of the whole country upon this subject, and both political parties are virtually pledged to give it their unreserved support.

> The President of the United States of necessity owes his election to office to the suffrage and zealous labors of a political party, the members of which cherish with ardor and regard as essential importance the principles their party organization; but he should strive to be always mindful of the fact that he serves his party best who serves

the country best.

In furtherance of the reform we seek, and in other important respects a change of great importance, I recommend an amendment to the Constitution prescribing a term of six years for the Presidential office, and forbidding a re-election.

With respect to the financial condition of the country, I shall not attempt an extended history of the embarrassment and prostration which we have suffered during the past three years. The depression in all our varied commercial and manufacturing interests throughout the country, which began in September, 1873, still continues. It is very gratifying, however, to be able to say that there are indications all around us of a coming

Upon the currency question, intimately officers should owe their whole service connected, as it is, with this topic, I may to the government and to the people. be permitted to repeat here the statement They meant that the officer should be se- made in my letter of acceptance, that, in cure in his tenure as long as his personal my judgment, the feeling of uncertainty

inseparable from an irredeemable paper that the objections and questions in discurrency, with its fluctuation of values, is one of the greatest obstacles to a return to prosperous times. The only safe paper currency is one which rests upon a coin basis and is at all times and promptly convertible into coin.

I adhere to the views heretofore expressed by me in favor of congressional legislation in behalf of an early resumption of specie payments, and I am satisfied not only that this is wise, but that the interests, as well as the public sentiment, of the country imperatively demand

Passing from these remarks upon the condition of our own country to consider our relations with other lands, we are reminded by the international complications abroad, threatening the peace of Europe, that our traditional rule of non-interference in the affairs of foreign nations has proved of great value in past times and ought to be strictly observed.

The policy inaugurated by my honored predecessor, President Grant, of submitting to arbitration grave questions in dispute between ourselves and foreign powers, points to a new, and incomparably the best, instrumentality for the preservation of peace, and will, as I believe, become a beneficent example of the course to be pursued in similar emergencies by other nations.

If, unhappily, questions of difference should at any time during the period of my administration arise between the United States and any foreign government, it will certainly be my disposition and my hope to aid in their settlement in the same peaceful and honorable way, thus securing to our country the great blessings of peace and mutual good offices with all the nations of the world.

Fellow-citizens, we have reached the close of a political contest marked by the excitement which usually attends the contests between great political parties whose members espouse and advocate with earnest faith their respective creeds. The circumstances were, perhaps, in no respect Hand by which the destinies of nations extraordinary save in the closeness and and individuals are shaped, I call upon the consequent uncertainty of the result.

country it has been deemed best, in view with me in an earnest effort to secure to of the peculiar circumstances of the case, our country the blessings, not only of

pute with reference to the counting of the electoral votes should be referred to the decision of a tribunal appointed for this purpose.

That tribunal-established by law for this sole purpose; its members, all of them, men of long-established reputation for integrity and intelligence, and, with the exception of those who are also members of the supreme judiciary, chosen equally from both political parties; its deliberations enlightened by the research and the arguments of able counsel-was entitled to the fullest confidence of the American people. Its decisions have been patiently waited for, and accepted as legally conclusive by the general judgment of the people. For the present, opinion will widely vary as to the wisdom of the several conclusions announced by that tribunal. This is to be anticipated in every instance where matters of dispute are made the subject of arbitration under the forms of law. Human judgment is never unerring, and is rarely regarded as otherwise than wrong by the unsuccessful party in the contest.

The fact that two great political parties have in this way settled a dispute in regard to which good men differ as to the facts and the law no less than to the proper course to be pursued in solving the question in controversy is an occasion for general rejoicing.

Upon one point there is entire unanimity in public sentiment—that conflicting claims to the Presidency must be amicably and peaceably adjusted, and that when so adjusted the general acquiescence of the nation ought surely to follow.

It has been reserved for a government of the people, where the right of suffrage is universal, to give to the world the first example in history of a great nation, in the midst of the struggle of opposing parties for power, hushing its party tumults to yield the issue of the contest to adjustment according to the forms of law.

Looking for the guidance of that Divine you, Senators, Representatives, judges, fel-For the first time in the history of the low-citizens, here and everywhere, to unite

following veto message to the Congress:

To the House of Representatives,—After a careful consideration of the bill entitled "An act to prohibit military interference at elections," I return it to the House of Representatives, in which it originated, with the following objections to its approval:

In the communication sent to the House of Representatives on the 29th of last month, returning to the House without my approval the bill entitled "An act making appropriations for the support of the army for the fiscal year ending June 30, 1880, and for other purposes," I engard to recent elections in the several of the United States. States, that no additional legislation was necessary to prevent interference with the of the United States. The fact was pretime of the passage of the act of June State, and municipal elections have been held throughout the Union, and that in at the polls.

and union—a union depending not upon am forced to the conclusion that the bill the constraint of force, but upon the lov- before me is not only unnecessary to prevent such interference, but is a dangerous all things may be so ordered and settled departure from long-settled and important

The true rule as to the employment of religion and piety, may be established military force at the elections is not doubtful. No intimidation or coercion should Military Interference at Elections. -On be allowed to control or influence citizens May 12, 1879, President Hayes sent the in the exercise of their right to vote, whether it appears in the shape of combinations of evil-disposed persons, or of armed bodies of the militia of a State, or of the military force of the United States.

The elections should be free from all forcible interference, and, as far as practicable, from all apprehensions of such interference. No soldiers, either of the Union or of the State militia, should be present at the polls to take the place or to perform the duties of the ordinary civil police force. There has been and will be no violation of this rule under orders from me during this administration; but there should be no denial of the right of the national government to employ deavored to show, by quotations from the its military force on any day and at any statutes of the United States now in force, place in case such employment is necesand by a brief statement of facts in re- sary to enforce the Constitution and laws

The bill before me is as follows:

"Be it enacted, etc., that it shall not elections by the military or naval forces be lawful to bring to or employ at any place where a general or special election sented in that communication that at the is being held in a State any part of the army or navy of the United States, un-18, 1878, in relation to the employment of less such force be necessary to repel the the army as a posse comitatus or other- armed enemies of the United States or to wise, it was maintained by its friends that enforce section 4, article iv., of the Conit would establish a vital and fundament- stitution of the United States and the al principle which would secure to the laws made in pursuance thereof, on appeople protection against a standing army. plication of the legislature or executive The fact was also referred to that, since of the State where such force is to be the passage of this act, congressional, used; and so much of all laws as is inconsistent herewith is hereby repealed."

It will be observed that the bill exempts no instance has complaint been made of from the general prohibition against the the presence of United States soldiers employment of military force at the polls two specified cases. These exceptions rec-Holding, as I do, the opinion that any ognize and concede the soundness of the military interference whatever at the polls principle that military force may properis contrary to the spirit of our institu- ly and constitutionally be used at the place tions and would tend to destroy the free- of elections when such use is necessary dom of elections, and sincerely desiring to enforce the Constitution and the laws; to concur with Congress in all of its meas- but the excepted cases leave the prohibi-

When I took occasion, Mr. President, In a State convention he drew up the two days ago, to throw out some ideas

dulgence of the Senate. Little did I exargument as was yesterday urged by the ing before his heated imagination? ions, I impeached no man's motives, I ventured, I thought in a becoming spirit, lation to a great national question of forced into a conflict not its own. gentleman from Missouri [Mr. Benton], States an early and continued hostility towards the West, and referred to a number of historical facts and documents in support of that charge. Now, sir, how have these different arguments been met? The honorable gentleman from Massachusetts, after deliberating a whole night upon his course, comes into this chamber to vindicate New England; and, instead of making up his issue with the gentleman from Missouri on the charges which he had preferred, chooses to consider me as the author of these charges, and, losing sight entirely of that gentleman, selects me as his adversary and pours out all the vials of his mighty wrath upon my devoted head. Nor is he willing to stop there. He goes on to assail the institutions and policy of the South, and calls in question the principles and conduct of the State which I have the honor to represent. When I find a gentleman of mature age and experience, of acknowledged talents and profound sagacity, pursuing a course like this, declining the contest from the West and making war upon the unoffending South, I must believe, I am bound to believe, he has some object in view that he has not ventured to disclose. Mr. President, why is this? Has the gentleman found in former controversies with the gentleman from Missouri that he is overmatched by that Senator? And does he hope for an easy victory over a more feeble adversary? Has the gentleman's distempered fancy

ment in relation to the public lands, noth- hinted? Has the ghost of the murdered ing certainly could have been further from coalition come back, like the ghost of my thoughts than that I should be com- Banquo, to "sear the eyeballs" of the pelled again to throw myself upon the in- gentleman, and will it not "down at his bidding?" Are dark visions of broken pect to be called upon to meet such an hopes and honors lost forever still floatgentleman from Massachusetts (Mr. Web- if it be his object to thrust me between ster). Sir, I questioned no man's opin- the gentleman from Missouri and himself, in order to rescue the East from the concharged no party, or State, or section of test it has provoked with the West, he country with hostility to any other; but shall not be gratified. Sir, I will not be dragged into the defence of my friend to put forth my own sentiments in re- from Missouri. The South shall not be public policy. Such was my course. The gentleman from Missouri is able to fight his own battles. The gallant West needs it is true, had charged upon the Eastern no aid from the South to repel any attack which may be made on them from any quarter. Let the gentleman from Massachusetts controvert the facts and arguments of the gentleman from Missouri if he can; and if he win the victory, let him wear its honors; I shall not deprive him of his laurels.

The gentleman from Massachusetts, in reply to my remarks on the injurious operations of our land system on the prosperity of the West, pronounced an extravagant eulogium on the paternal care which the government had extended towards the West, to which he attributed all that was great and excellent in the present condition of the new States. The language of the gentleman on this topic fell upon my ears like the almost forgotten tones of the Tory leaders of the British Parliament at the commencement of the American Revolution. They, too, discovered that the colonies had grown great under the fostering care of the mother country; and I must confess, while listening to the gentleman, I thought the appropriate reply to his argument was to be found in the remark of a celebrated orator, made on that occasion: "They have grown great in spite of your protection."

The gentleman, in commenting on the policy of the government in relation to the new States, has introduced to our notice a certain Nathan Dane, of Massachusetts, to whom he attributes the celebrated ordinance of '87, by which he tells us "slavery was forever excluded from the new States been disturbed by gloomy forebodings of north of the Ohio." After eulogizing the "new alliances to be formed," at which he wisdom of this provision in terms of the

most extravagant praise, he breaks forth what, sir, was that policy, and what is in admiration of the greatness of Nathan the difference between that gentleman and Dane; and great indeed he must be, if it myself on this subject? I threw out the be true, as stated by the Senator from idea that the public lands ought not to Massachusetts, that "he was greater than be reserved forever as "a great fund for Solon and Lycurgus, Minos, Numa Pom- revenue"; that they ought not to be pilius, and all the legislators and philoso- treated "as a great treasure"; but that phers of the world," ancient and modern. the course of our policy should rather be Sir, to such high authority it is certainly directed towards the creation of new my duty, in a becoming spirit of humility, States, and building up great and flourishto submit. When the gentleman have contended.

thought proper to present, in strong conopposite character displayed by the South in relation to appropriations for internal improvement. Now, sir, let it be recollected that the South have made no professions (I have certainly made none in their behalf) of regard for the West. It has been reserved to the gentleman from Massachusetts, while he vaunts his own personal devotion to Western interests, to claim for the entire section of country to which he belongs an ardent friendship for the West, as manifested by their support of the system of internal improvement, while he casts in our teeth the reproach that the South has manifested hostility to Western interests in opposing appropriations for such objects. gentleman, at the same time, acknowledged that the South entertaius constitutional scruples on this subject. Are we, then, sir, to understand that the gentleman considers it a just subject of reproach that we respect our oaths by which we are bound "to preserve, protect, and defend the Constitution of the United States"? Would the gentleman have us manifest our love to the West by trampling under foot our constitutional scruples? Does he not perceive, if the South is to be reproached with unkindness to the West in voting against appropriations which the gentleman admits they could not vote for without doing violence to their constitutional opinions, that he exposes himself to the question whether, if he were in our situation, he could vote for these appropriations, regardless of his scruples? No, sir, I will not do the gentleman so great injustice. He has fallen into this error and effect of the reproach which he was West in their support of the system of anxiety to that legislative hall where the

much money in the treasury, to be ap-internal improvement, the gentleman will tells us that the appropriations for in-The Senator from Massachusetts has ternal improvements in the West would, in almost every instance, have failed but trast, the friendly feelings of the East for the New England votes, he has fortowards the West, with sentiments of an gotten to tell us the when, the how, and the wherefore of this new-born zeal for the West sprung up in the bosoms of New England. If we look back only a few years, we will find in both Houses of Congress a uniform and steady opposition on the part of the members from the Eastern States generally to all appropriations of this character. At the time I became a member of this House, and for some time afterwards, a decided majority of the New England Senators were opposed to the very measures which the Senator from Massachusetts tells us they now cordially support. Sir, the Journals are before me, and an examination of them will satisfy every gentleman of that fact.

It must be well known to every one whose experience dates back as far as 1825 that, up to a certain period, New England was generally opposed to preparations for internal improvements in the West. The gentleman from Massachusetts may be himself an exception, but if he went for the system before 1825 it is certain that his colleagues did not go with him. In the session of 1824 and 1825, however (a memorable era in the history of this country), a wonderful change took place in New England in relation to Western interests. Sir, an extraordinary union of sympathies and of interest was then effected, which brought the East and the West into close alliance. The book from which I have before read contains the first public annunciation of that happy reconciliation of conflicting interests, personal and political, which brought the East and West together, and locked in a fraternal embrace the two great orators from not having duly weighed the force of the East and the West. Sir, it was on Jan. 18, 1825, while the result of the endeavoring to cast upon the South. In Presidential election, in the House of Reprelation to the other point, the friendship resentatives, was still doubtful, while the manifested by New England towards the whole country was looking with intense

terests. It was on that memorable occasion that the Senator from Massachusetts held out the white flag to the West, and uttered those liberal sentiments which he yesterday so indignantly repudiated. Then it was that that happy union between the members of the celebrated coalition was consummated, whose immediate issue was a President from one quarwas supposed) secured to another. The "American system," before a rude, disjointed, and misshapened mass, now assumed form and consistency. Then it was that it became "the settled policy of the government" that this system should be so administered as to create a reciprocity of interests and a reciprocal distribution of government favors, East and West (the tariff and internal improvements), while the South-yes, sir, the impracticable South-was to be "out of your protection." The gentleman may boast as much as he pleases of the friendship of New England for the West, as displayed in their support of internal improvement; but when he next introduces that topic I trust that he will tell us when that friendship commenced, how it was brought about, and why it was established. Before I leave this topic I must be permitted to say that the true character of the policy now pursued by the gentleman from Massachusetts and his friends, in relation to appropriations of land and money for the benefit of the West, is, in my estimation, very similar to that pursued by Jacob of old towards his brother Esau: "It robs them of their birthright for a mess of pottage."

The gentleman from Massachusetts, in alluding to a remark of mine that, before any disposition could be made of the public lands, the national debt, for which they stand pledged, must be first paid, took occasion to intimate "that the extraordinary fervor which seems to exist in a certain quarter (meaning the South,

mighty drama was so soon to be acted, the gentleman deals us this blow, he prothat we saw the leaders of two great fesses an ardent desire to see the debt parties in the House and in the nation speedily extinguished. He must excuse "taking sweet counsel together," and in me, however, for feeling some distrust on a celebrated debate on the Cumberland that subject until I find this disposition Road fighting side by side for Western in- manifested by something stronger than professions. I shall look for acts, decided and unequivocal acts, for the performance of which an opportunity will very soon (if I am not greatly mistaken) be afforded. Sir, if I were at liberty to judge of the course which that gentleman would pursue, from the principles which he has laid down in relation to this matter, I should be bound to conclude that he will be found ter of the Union, with a succession (as it acting with those with whom it is a darling object to prevent the payment of the public debt. He tells us he is desirous of paying the debt, "because we are under an obligation to discharge it." Now, sir, suppese it should happen that the public creditors, with whom we have contracted the obligation, should release us from it, so far as to declare their willingness to wait for payment for fifty years to come, provided only the interest shall be punctually discharged. The gentleman from Massachusetts will then be released from the obligation which now makes him desirous of paying the debt; and, let me tell the gentleman, the holders of the stock will not only release us from this obligation, but they will implore, nay, they will even pay us not to pay them. "But," adds the gentleman, "so far as the debt may have an effect in binding the debtors to the country, and thereby serving as a link to hold the States together, he would be glad that it should exist forever." Surely then, sir, on the gentleman's own principles, he must be opposed to the payment of the debt.

Sir, let me tell that gentleman that the South repudiates the idea that a pecuniary dependence on the federal government is one of the legitimate means of holding the States together. A moneyed interest in the government is essentially a base interest; and just so far as it operates to bind the feelings of those who are subjected to it to the government-just so far as it operates in creating sympathies and interests that would not otherwise exist—is it opposed to all the principles of free govsir) for the payment of the debt arises ernment, and at war with virtue and patrifrom a disposition to weaken the ties otism. in December, 1828, and published by their amined, and the objections urged against authority—is the good old republican the Virginia doctrines carefully considdoctrine of '98; the doctrine of the cele- ered. The result was that the legislature brated "Virginia Resolutions" of that of Virginia reaffirmed all the principles year, and of "Madison's Report" of '99. laid down in the resolutions of 1798, and It will be recollected that the legislature issued to the world that admirable report of Virginia, in December, '98, took into which has stamped the character of Mr. consideration the alien and sedition laws, Madison as the preserver of that Constituen considered by all republicans as tution which he had contributed so largely a gross violation of the Constitution of to create and establish. I will here quote the United States, and on that day passed, from Mr. Madison's report one or two

plicitly and peremptorily declare that it views the powers of the federal govern- federal compact, proceeds to infer 'that in ment, as resulting from the compact to which the States were parties, as limited by the plain sense and intention of the instrument constituting that compact; as no further valid than they are authorized by the grants enumerated in that compact; and that, in case of a deliberate, palpable, and dangerous exercise of other powers not granted by the said compact, the States who are parties thereto have the right, and are in duty bound, to interpose for arresting the progress of the evil and for maintaining, within their respective limits, the authorities, rights, and liberties appertaining to them."

In addition to the above resolution, the General Assembly of Virginia "appealed to the other States, in the confidence that they would concur with that commonwealth that the acts aforesaid (the alien and sedition laws) are unconstitutional, and that the necessary and proper measures would be taken by each for co-operating with Virginia in maintaining unimpaired the authorities, rights, and liberties reserved to the States re-

spectively, or to the people."

The legislatures of several of the New England States, having, contrary to the expectation of the legislature of Virginia, expressed their dissent from these doctrines, the subject came up again for consideration during the session of 1799- last resort such questions as may be of committee, by whom was made that celebrated report which is familiarly known as "Madison's Report," and which de- any misapprehension of its object by exserves to last as long as the Constitution pressly requiring for such an interposition itself. In that report, which was subse- 'the case of a deliberate, palpable, and quently adopted by the legislature, the dangerous breach of the Constitution by

ported by a committee of the legislature whole subject was deliberately re-examong others, the following resolutions: passages which bear more immediately "The General Assembly . . . doth ex- on the point in controversy. "The resolution, having taken this view of the case of a deliberate, palpable, and dangerous exercise of other powers, not granted by the said compact, the States who are parties thereto have the right, and are in duty bound, to interpose for arresting the progress of the evil, and for maintaining, within their respective limits, the authorities, rights, and liberties appertaining to them.'

"It appears to your committee to be a plain principle, founded in common-sense, illustrated by common practice, and essential to the nature of compacts, that, where resort can be had to no tribunal superior to the authority of the parties, the parties themselves must be the rightful judges in the last resort whether the bargain made has been pursued or violated. The Constitution of the United States was formed by the sanction of the States, given by each in its sovereign capacity. It adds to the stability and dignity, as well as to the authority, of the Constitution, that it rests upon this legitimate and solid foundation. The States, then, being the parties to the constitutional compact, and in their sovereign capacity, it follows of necessity that there can be no tribunal above their authority to decide, in the last resort, whether the compact made by them be violated, and consequently that, as the parties to it, they must themselves decide in the 1800, when it was referred to a select sufficient magnitude to require their interposition.

"The resolution has guarded against

HAYNE, ROBERT YOUNG

the exercise of powers not granted by it.' Constitution was established.

"But the resolution has done more than to the Constitution.

would seem inconceivable that it can incur laying aside all momentary impressions, and recollecting the genuine source and object of the federal Constitution, shall candidly and accurately interpret the deliberate exercise of dangerous powers, palpably withheld by the Constitution, could not justify the parties to it in interposing even so far as to arrest the progthe Constitution itself, as well as to provide for the safety of the parties to it, there would be an end to all relief from usurped power, and a direct subversion of the rights specified or recognized under all the State constitutions, as well as a plain denial of the fundamental principles on which our independence itself was declared."

But, sir, our authorities do not stop known to have been penned by the author of the Declaration of American Indegovernment created by this compact was not made the exclusive or final judge of the extent of the powers delegated to itself, since that would have made its discretion, and not the Constitution, the all other cases of compact among parties having no common judge, each party has an equal right to judge for itself, as well of infractions as of the mode and measure of redress."

ure the subject was re-examined, and on It must be a case, not of a light and Nov. 14, 1799, the resolutions of the pretransient nature, but of a nature danger- ceding year were deliberately re-affirmed, ous to the great purposes for which the and it was, among other things, solemnly declared:

"That if those who administer the genguard against misconstruction, by ex- eral government be permitted to transpressly referring to cases of a deliberate, gress the limits fixed by that compact, by palpable, and dangerous nature. It speci- a total disregard to the special delegafies the object of the interposition which tions of power therein contained, an anit contemplates to be solely that of main- nihilation of the State governments, and taining the authorities, rights, and liber- the erection upon their ruins of the genties appertaining to the States as parties eral consolidated government, will be the inevitable consequence. That the prin-"From this view of the resolution it ciple and construction contended for by sundry of the State legislatures, that the any just disapprobation from those who, general government is the exclusive judge of the extent of the powers delegated to it, stop not short of despotism, since the discretion of those who administer the government, and not the Constitution, meaning of the General Assembly. If the would be the measure of their powers. That the several States who formed that instrument, being sovereign and independent, have the unquestionable right to judge of the infraction, and that a nullifiress of the evil, and thereby to preserve cation of those sovereignties of all unauthorized acts done under color of that instrument is the rightful remedy."

Time and experience confirmed Mr. Jefferson's opinion on this all-important point. In the year 1821 he expressed himself in this emphatic manner: "It is a fatal heresy to suppose that either our State governments are superior to the federal, or the federal to the State; neither is authorized literally to decide which behere. The State of Kentucky responded longs to itself or its copartner in governto Virginia, and on Nov. 10, 1798, ment; in differences of opinion between adopted those celebrated resolutions well the different sets of public servants, the appeal is to neither, but to their employers peaceably assembled by their reprependence. In those resolutions the legis- sentatives in convention." The opinion of lature of Kentucky declare "That the Mr. Jefferson on this subject has been so repeatedly and so solemnly expressed that it may be said to have been among the most fixed and settled convictions of his mind.

In the protest prepared by him for the measure of its powers; but that, as in legislature of Virginia, in December, 1825, in respect to the powers exercised by the federal government in relation to the tariff and internal improvements, which he declares to be "usurpations of the powers retained by the States, mere At the ensuing session of the legislat- interpolations into the compact, and di-

same subject in the other House, said: "This opposition is constitutional and legal; it is also conscientious. It rests on settled and sober conviction that such policy is destructive to the interests of The experience of every day government. confirms these sentiments. Men who act from such motives are not to be discouraged by trifling obstacles, nor awed by any dangers. They know the limit of constitutional opposition; up to that limit, at their own discretion, they will walk, and walk fearlessly." How "the being of government" was to be endangered by "constitutional opposition" to the embargo, I leave to the gentlemen to explain.

Thus it will be seen, Mr. President, that the South Carolina doctrine is the Republution of that day turned; that it embraces the very principles the triumphs of which, at that time, saved the Constitution at its last gasp, and which New Engbe the victims of unconstitutional legislation. Sir, as to the doctrine that the its powers, it seems to me to be utterly subversive of the sovereignty and independence of the States. It makes but little difference, in my estimation, whether Congress or the Supreme Court is invested with this power. If the federal government, in all or any of its departments, is to prescribe the limits of its own authority, and the States are bound to submit to the decision, and are not to be allowed

which, in my opinion, they will not sub- one word more to add. In all the efforts that have been made by South Carolina And the Senator from Massachusetts to resist the unconstitutional laws which himself, in a speech delivered on the Congress has extended over them, she has kept steadily in view the preservation of the Union by the only means by which she believes it can be long preserved—a firm, manly, and steady resistance against usurpation. The measures of the federal the people and dangerous to the being of government have, it is true, prostrated her interests, and will soon involve the whole South in irretrievable ruin. But even this evil, great as it is, is not the chief ground of our complaints. It is the principle involved in the contest, a principle which, substituting the discretion of Congress for the limitations of the Constitution, brings the States and the people to the feet of the federal government, and leaves them nothing they can call their own. Sir, if the measures of the federal government were less oppressive, should still strive against this usurpation. The South is acting on a principle she lican doctrine of '98; that it was promul- has always held sacred-resistance to ungated by the fathers of the faith; that it authorized taxation. These, sir, are the was maintained by Virginia and Kentucky principles which induced the immortal in the worst of times; that it constituted Hampden to resist the payment of a tax the very pivot on which the political revo- of 20s. "Would 20s. have ruined his fortune? No! but the payment of half 20s., on the principle on which it was demanded, would have made him a slave." Sir, if, acting on these high motivesland statesmen were not unwilling to if, animated by that ardent love of liberty adopt when they believed themselves to which has always been the most prominent trait in the Southern character—we should be hurried beyond the bounds of federal government is the exclusive judge a cold and calculating prudence, who is of the extent as well as the limitations of there, with one noble and generous sentiment in his bosom, that would not be disposed, in the language of Burke, to exclaim, "You must pardon something to the spirit of liberty"?

For the full text of the reply to this speech, see Webster, Daniel.

Haynes, John, statesman; born in Copford Hall, Essex, England; accompanied Rev. Edward Hooker to Boston in 1633, and in 1635 was chosen governor to examine and decide for themselves of Massachusetts. He was one of the when the barriers of the Constitution best educated of the early settlers in New shall be overleaped, this is practically England, and possessed the qualities of an "a government without limitation of able statesman. He went to the valley powers." The States are at once reduced of the Connecticut with Mr. Hooker in to mere petty corporations, and the people 1636; became one of the most prominent

Mohawk warriors, at the head of Lake In 1678 he accompanied La Salle to the George. In company with Colonel Will- Western wilds, with Chevalier de Tonti Left by La Salle a little below the present site of Peoria to prosecute discoveries, he and two others penetrated to the Mississippi in a canoe, by way of the Illinois River, in February and March, 1680. They explored the Mississippi northward until, in April, they were captured by a party of Sioux and carried to their villages. Hennepin, at the beginning of the voyage, had invoked the aid of St. Anthony of Padua, and when he discovered the great rapids of the upper Mississippi he gave them the name of Falls of St. Anthony. He claimed to have discovered the sources of the Mississippi, but never went above the Falls of St. Anthony, where he carved the arms of France on the forest trees. In July (1680) Hennepin and his companions were rescued from the Sioux by Graysolon du Luht (Duluth), and they were taken down to the Wisconsin River and made their way to Lake Michigan, and so on to Quebec. From the latter place Hennepin embarked for France, and there, in 1683, he published a full account of his explorations, ver. He was an active member of the it is a work of much value, as it pictures State constitutional convention of 1850, the life and habits of the Indians of the Northwest. In 1697 he published his New Discovery of a vast Country situated in America, which contained his former work, from 1863 to 1869, was chosen governor of with a description of a voyage down the Mississippi, largely copied from the narrative of Leclerc. This fraud was exposed by Dr. Sparks. Hennepin never went down the Mississippi below the mouth of the Wisconsin River, yet, in that work, he claimed to be the first who descended the great river to its mouth. can, missionary and explorer; born in the favor of Louis XIV., and when he en-Ath, Belgium, about 1640. He served in the Army of the named in honor of Henry, Prince of Wales. James and before Petersburg. On Sept. The company appropriated 10,000 acres 29, 1864, he was brevetted lieutenantof land at Henrico as an endowment for the proposed college or university. Edwin Sandys took special interest in the undertaking, and wealthy and influential persons in England, as well as in the colony, made generous donations for it. In 1620 George Thorpe, a member of the council for Virginia, was sent to take charge of the college land, and preparations were in progress for establishing the institution when the dreadful massacre by the Indians (1622) occurred. Mr. Thorpe and the minister at Henrico were victims, and a blight fell upon the enterprise. In 1621 Rev. Patrick Copeland, returning from the East Indies in the Royal James, one of the ships of the East India Company, commanded by Martin Pring, collected about \$350 from members of that company on board for the purpose of establishing a church or a school in Virginia. The London Company determined to found a free school at Charles City, and call it the "East India School." Early in 1622 a carpenter, with apprentices, was sent over to construct a building for it, and provision was made for a school-master, when the massacre paralyzed all efforts in that direction. The university scheme was abandoned, but in colonel, and, at the close of the war, 1625 efforts were made to establish the brevetted colonel in the regular army East India School, and this project also and brigadier-general of volunteers. He failed. No school for the education of served with distinction in the Indian wars the Indians in Virginia was established of 1874-76. With a detachment of the

alry at Wounded Knee Creek. He became lieutenant-colonel of the 7th Cavalry, Jan. 30, 1892; was given command of Fort Myer, Va.; was commissioned colonel of the 10th Cavalry, June 1, 1897; appointed a brigadier-general of volunteers, May 4, 1898; in October of the latter year was promoted to brigadier-general in the regular army; and on Dec. 7, 1898, was promoted to major-general of volunteers. He participated in the final actions around Santiago and then went to Porto Rico In December, 1898, with General Miles. he was transferred from the command of the district of Ponce to the post of governor-general of Porto Rico. In April, 1899, he relinquished his last command on account of ill-health and returned to the United States, where, on Oct. 18, he was given command of the Department of Missouri. He died in New York City, Oct. 27, 1899. General Henry was author of Records of Civilian Appointments, United States Army; Army Catechism for Non-commissioned Officers and Soldiers; Target Practice; and Practical Information for Non-commissioned Officers on Field Duty. After his death the citizens of the United States contributed a handsome sum of money for the support of his family.

Henry, John, naval officer; born Sept. 28, 1731; joined the British navy about 1744; was promoted captain for bravery at Mud Island, in the Delaware. He was with the British fleet which in May, 1778, destroyed the frigates Washington, Effingham, and others, besides twenty-three brigs and nine merchantmen; was promoted admiral in 1804. He died in Kent, England, Aug. 6, 1829.

Henry, John, adventurer; born in Ireland; became a naturalized citizen of the United States. He produced a temporary excitement in 1812 by "disclosures" con-Union. According to his story, he purfor five years, and amused himself by impostor and swindler.

9th Cavalry he made a notable march in at length attracted the attention of the December, 1890, to the relief of the Pine governor of Canada (Sir J. H. Craig), who Ridge Agency after the sanguinary con-flict between the Sioux and the 7th Cav-sent him on a mission to Boston early in 1809. That was the period of the embargo (see Embargo Acts), when violent opposition to the measure appeared in New England. It was thought that the United States might declare war against England, and Henry was instructed to ascertain whether rumors that in such an event the New England States would be disposed to separate from the rest of the Union had any solid foundation. He was to make diligent inquiries at the proper sources of information; and should any such disposition appear, and with it an inclination to form a connection with Great Britain, Henry was to intimate to the leaders that the British government might be communicated with through Governor Craig; and should the prospect seem promising, he was to exhibit these instructions as his credentials. was given to understand that he would be well rewarded for his pains. He reached Boston March 9, 1809, where he remained three months, till the apparent settlement of affairs by Erskine's arrangement, when Henry was recalled by Craig.

During that time he had written many encouraging letters to Craig's secretary. He spoke of the extreme discontent in New England, and expressed an opinion that, if war against England should be declared, the legislature of Massachusetts would take the lead in setting up a separate Northern confederation, which might result, perhaps, in some connection with Great Britain. He finally reported that a withdrawal from the Union was an unpopular idea there, but that there were leaders in favor of it. He did not mention any names. Henry went to England for the reward for his services, when he was treated coolly by the officers of the government, and, in a letter from Under-Secretary Peel, he was referred to Craig's successor in the Canadian government. cerning a plot for the destruction of the Offended at this treatment, Henry did not go to Canada, but landed in Boston, acchased an estate in Vermont, near the companied by a Frenchman who called Canada frontier, and there studied law himself Count de Crillon, but who was an Henry visited writing articles against republican insti- Governor Gerry, and from him obtained tutions, which he detested. These essays a letter of introduction to President Madison. He then went to Washington, began a series of experiments in electo the affair in this country and in Eng-9 he sailed for France in the United States schooner Wasp, where he would be safe from British vengeance.

On the same day the documents were laid before Congress, with a message from the President, in which he charged that the British government had employed a secret agent in fomenting disaffection in the capital of Massachusetts to the constituted authorities of the nation, and "in intrigues with the disaffected for the purpose of bringing about resistance to the laws, and eventually, in concert with a British force, of destroying the Union and forming the eastern part thereof into a political connection with Great Britain." Both political parties endeavored to make capital out of these "disclosures," but the excitement created soon died away. Mr. Foster, the British minister had no knowledge of the affair. Lord Holland called upon the British government (May 5) for an explanation, and gave notice that he should call for an investigation. Every pretext was brought to bear to defeat such a measure; but had entered into a "dishonorable and atrocious intrigue against a friendly power would stand unrefuted." And so it stands to this day.

and laid the whole matter before the tricity. He fully developed the power President, who was so well satisfied of of electro-magnetism, and perfected the the great value of Henry's disclosures, at electro-magnetic telegraph. As early as the moment when war was about to be de- 1831 he transmitted signals through a against England-overwhelming wire more than a mile in length, an acproof of the secret designs of the British count of which was published in Silligovernment to destroy the new republic- man's American Journal of Science. to the bar of the highest court in Vir- aristocratic members were startled, and a ginia in 1769, and in 1773 he was appointed one of the Virginia committee of correspondence. As a delegate to the first Continental Congress, in 1774, he opened the business of that body by declaring the union of the provinces, and saying, "I am not a Virginian-I am an American." He was an eloquent leader in the famous provincial convention at Richmond (March, 1775), and, at the head of the militia of Hanover, compelled LORD DUNMORE (q. v.) to restore powder he had removed from the colonial magazine at Williamsburg. For a short time Henry was in the military service, and was the first governor of the State of Virginia (1776-79). He was again elected governor after the war; and was a hot debate ensued. Henry supported his

a wonderful forensic speech that his fame ing it with all his strength because it

his abode at Red Hill, in Char-Washington appointed him Secretary of State in 1795; but he declined the nomination, as he did that of envoy to France, offered by President Adams, and of governor offered by the people. Henry was elected to the State Senate in 1799, but, dying June 6, 1799, never took his seat.

When the news of the passage of the Stamp Act and kindred measures reached Virginia (May, 1765) the House of Burgesses was in session. The aristocratic leaders in that body hesitated, and the session was drawing near its close, when Henry, finding the older and more influential members disinclined to move in the matter, offered a series of resolutions, in which all the rights of British - born subjects were claimed for the Virginians; denied any authority, anywhere,

day, they were reconsidered and softened. But a manuscript copy had already been sent to Philadelphia, and they soon appeared in the newspapers, producing a followed in Massachusetts by the recommendation of a committee of the General Assembly for a congress of delegates from the several colonies to meet in New York CONGRESS.

lutions passed the House of Burgesses in leaders; but in Henry's absence, the next sition to the Stamp Act, and the scheme of taxing America by the British Parliament. All the colonies, either through fear, or want of opportunity to form an opposition, or from influence of some kind or other, had remained silent. I had been for the first time elected a burgess a few days before, was young, inexperienced, unacquainted with the forms of the house, and the members that composed it. Finding the men of weight averse to opposition, and the commencement of the tax at hand, and that no person was likely to step forth, I determined to venture, and alone, unadvised, and unassisted, on the blank leaf of an old law-book, wrote the within. Upon offering them to the house, violent debates ensued. Many threats were uttered, and much abuse cast on me, by the party for submission. After a long and warm contest, the resolutions passed by a very small majority, perhaps of one or two only. The alarm spread throughout America with astonishing quickness, and the ministerial party were overwhelmed. The great point of resistance to British taxation was universally established in the colonies. This brought on the war which finally separated the two countries, and gave independence to ours. Whether this will prove a blessing or a curse, will depend upon the use our people make of the blessings which a gracious God had bestowed upon us. If they are wise, they will be great and happy. If they are of a contrary character, they will be miserable. Righteousness alone can wonderful effect. These resolutions were exalt them as a nation. Reader, whoever thou art, remember this; and in thy sphere, practise virtue thyself, and encourage it in others."

The Liberty or Death Speech .-- On City in October following. See STAMP ACT March 23, 1775, he offered resolutions in the Richmond convention to organize the After his death, there was found among militia and put the colony in a state of

"GIVE ME LIBERTY OR GIVE ME DEATH."

made the following address:

defence. The resolutions met with great as abilities, of the very worthy gentlemen opposition, and in supporting them he who have just addressed the house. But different men often see the same subject in different lights; and, therefore, I hope Mr. President,-No man thinks more it will not be thought disrespectful to highly than I do of the patriotism, as well those gentlemen if, entertaining, as I do,

theirs, I shall speak forth my sentiments jugation; the last arguments to which freely and without reserve. This is no kings resort. I ask gentlemen, sir, what time for ceremony. The question before means this martial array, if its purpose the house is one of awful moment to this country. For my own part, I consider it gentlemen assign any other possible moas nothing less than a question of freedom tive for it? Has Great Britain or slavery; and in proportion to the magnitude of the subject ought to be the freedom of the debate. It is only in this way that we can hope to arrive at truth, and fulfil the great responsibility which we hold to God and our country. Should I keep back my opinions at such a time, through fear of giving offence, I should consider myself as guilty of treason towards my country, and of an act of disloyalty towards the majesty of Heaven, which I revere above all earthly kings.

Mr. President, it is natural to man to indulge in the illusions of hope. We are apt to shut our eyes against a painful truth, and listen to the song of that siren, till she transforms us into beasts. Is this the part of wise men, engaged in a great and arduous struggle for liberty? Are we disposed to be of the number of those who, having eyes, see not, and having ears, hear not, the things which so nearly concern their temporal salvation? For my part, whatever anguish of spirit it may cost, I am willing to know the whole truth; to know the worst and to provide for it.

I have but one lamp by which my feet are guided, and that is the lamp of experience. I know of no way of judging of the future but by the past. And judging by the past, I wish to know what there has been in the conduct of the British ministry for the last ten years to justify those hopes with which gentlemen have been pleased to solace themselves and the Is it that insidious smile with which our petition has been lately received? Trust it not, sir. It will prove a snare to your feet. Suffer not your-selves to be betrayed with a kiss. Ask yourselves how this gracious reception of our petition comports with those warlike preparations which cover our waters and darken our land. Are fleets and armies necessary to a work of love and reconciliation? Have we shown ourselves so unwilling to be reconciled that force must be called in to win back our unable to cope with so formidable an adlove? Let us not deceive ourselves, sir. versary. But when shall we be stronger?

opinions of a character very opposite to These are the implements of war and subbe not to force us to submission? Can enemy, in this quarter of the world, to call for all this accumulation of navies and armies? No, sir, she has They are meant for us; they can be meant for no other. They are sent over to bind and rivet upon us those chains which the British ministry have been so long forging. And what have we to oppose to them? Shall we try argument? Sir, we have been trying that for the last ten years. Have we anything new to offer upon the subject? Nothing. We have held the subject up in every light of which it is capable; but it has all been in vain. Shall we resort to entreaty and humble supplication? What terms shall we find which have not been already exhausted? Let us not, I beseech you, sir, deceive ourselves longer. Sir, we have done everything that could be done to avert the storm which is now coming on. We have petitioned; we have remonstrated; we have supplicated; we have prostrated ourselves before the throne, and have implored its interposition to arrest the tyrannical hands of the ministry and Parliament. Our petitions have been slighted; our remonstrances have produced additional violence and insult; our supplications have been disregarded; and we have been spurned with contempt, from the foot of the throne! In vain, after these things, may we indulge the fond hope of peace and reconciliation. There is no longer any room for hope. wish to be free; if we mean to preserve inviolate those inestimable privileges for which we have been so long contending; if we mean not basely to abandon the noble struggle in which we have been so long engaged, and which we have pledged ourselves never to abandon, until the glorious object of our contest shall be obtained, we must fight! I repeat it, sir, we must fight! An appeal to arms and to the God of Hosts is all that is left us!

They tell us, sir, that we are weak;

and when a British guard shall be stationed in every house? Shall we gather strength by irresolution and inaction? until our enemies shall have bound us March 5, 1851. hand and foot? Sir, we are not weak, mission and slavery! Their clanking may be heard evitable—and let it come! I repeat it, sir, let it come.

It is vain, sir, to extenuate the matbut there is no peace. The war is actualso dear, or peace so sweet, as to be pur-fert to surrender to Foote. me, give me liberty or give me death!

born in Pittsburg, Pa., Feb. 17, 1837; graduated at the Western University of Pennsylvania in 1853; entered the Union army as a captain in the 1st Iowa Volunteers in 1861. He was in the battle of Wilson's Creek; and in the battle of Pea Ridge, he commanded the 9th Iowa Regi-he was lieutenant-colonel. In July, 1862, he was promoted to brigadier-general, and distinguished himself in Arkansas. November, 1862, he was made a majorgeneral; and in 1863 took part in the capture of Vicksburg. He was with General Banks afterwards in his operations in Louisiana. After the war he practised law in New Orleans, and became United States marshal for Louisiana, and Secretary of State.

Hessian Fly, the American wheat midge, destructive to wheat in the United States, whither it is said to have been brought by the Hessian soldiers in British pay during the Revolutionary War, in 1786, 1846, and 1886. The fly also occasioned much destruction in England and Scotland in 1788, 1887, and 1890.

During the Revolutionary Hessians. War Great Britain hired a large number of auxiliaries from the Landgrave of Hesse, the Count of Hesse-Hanau, the Duke of Brunswick, the Margrave of Anspach - Bayreuth, the Prince of Waldeck, and the Prince of Anhalt-Zerbst. Nearly 30,000 were brought to America. Nearly 13,000 of them never returned to Germany. A small proportion of these had been killed in battle or had died of their wounds. Many had died of sickness. Others had deserted, and the remainder settled in America at the end of the war. England paid \$35 for each man killed, \$12 for each man wounded, and in addition paid an annual sum of nearly \$60,000 to the Duke of Brunswick, \$550,000 to the Landgrave of Hesse-Cassel, and proportionate sums to the other princes. The total amount paid by England is unknown, as the records are incomplete and the sums voted by Parliament for the purpose of paying these troops cannot be identified (see German MERCENARIES). The best book on the subject of the German auxiliaries of Great Britain in the Revolutionary War is The Hessians in the Revolution, by Edward J.

Herron, Francis Jay, military officer; Lowell, from which the following tables are taken:

the first Secretary of the United States Navy. He declined a re-election in 1777, but resumed his seat in 1779, which he resigned in October on account of failing health. He died in Philadelphia, Nov. 10, 1779.

Hewitt, ABRAM STEVENS, manufacturer; born in Haverstraw, N. Y., July 31, 1822; graduated at Columbia College in 1842; admitted to the bar in 1845. Shortly after beginning the practice of law he was forced to abandon it, owing to poor eyesight; became a partner of Peter Cooper, his father-in-law, in the iron business; was active in the plan of the Cooper Union, and as secretary of its board of trustees has managed its financial and educational details; became a member of Congress, and, with the exception of one term, held a seat in the House of Representatives in 1874-86; was mayor of New York City in 1887-89. He published an address on A Century of Mining and Metallurgy in the United States.

Heyward, Thomas, signer of the Declaration of Independence; born in St. Luke's parish, S. C., in 1746; studied law in England, made a tour in Europe, and on his return became a warm defender of the rights of the colonies. He was a member of the first General Assembly of South Carolina after the flight of the royal governor. He was also a member of the committee of safety, and a delegate in Congress from 1775 to 1778, when he was appointed a judge. He was also in active military service in South Caro-Hewat, Alexander, historian; born in lina, and in 1780 was wounded. Captured prisoner to St. Augustine. He retired

a white canoe, with his young daughter; and as they walked up the bank, a sound special duty in Europe in 1884, and later like a rushing wind was heard in the air. Then a dark object, increasing in size every moment as it approached, appeared in the heavens. Fear seized the people, and they fled. Hiawatha stood firm. The object was an immense white heron, which fell upon and crushed the beautiful girl, at the same time being destroyed itself. The father was unhurt, and after grieving three days for the loss of his darling child, he reappeared at the council, and addressed the assembled nations. He told the Mohawks that they should be the first nation, because they were warlike and mighty, and should be called the "Great Tree"; the Oneidas were made the second nation, because they were wise in council, and received the name of the "Everlasting Stone"; the Onondagas were the third nation, because they were gifted in speech and mighty in war, and they were named the "Great Mountain"; the Cayugas were the fourth nation, for they were cunning published the results of his investigations his Song of Hiawatha.

Hiawatha, the reputed founder of the course in ship construction, design, and Iroquois Confederacy. Tradition tells us calculation under the direction of the Navy that he came from above, dwelt among the Department. In 1860 he was assigned to Onondagas, and caused the five related duty in the navy-yard at Mare Island, nations to form a confederacy for their Cal., and in 1862-69 was master shipmutual protection (see IROQUOIS Con- wright there. In the latter year he was FEDERACY). The people called him Hiamade an assistant naval constructor, with watha, the "wise man." When they had the relative rank of lieutenant. In 1875, assembled at the great conference on the after a competitive examination, he was border of the lake, Hiawatha appeared in commissioned a naval constructor. Higher Law Doctrine. In the debate on the admission of California into the Union as a free State, William H. Seward, on March 11, 1850, said in the course of his speech: "The Constitution regulates our stewardship; the Constitution devotes the domain to union, to justice, to defence, to welfare, and to liberty. But there is a higher law than the Constitution which regulates our authority over the domain and devotes it to the same noble purposes. The territory is a partno inconsiderable part—of the common heritage of mankind, bestowed upon them by the Creator of the universe. We are His stewards, and must so discharge our trust as to secure in the highest attainable degree their happiness."

Hildreth, RICHARD, historian; born in ated at Harvard College in 1829; studied and practised law and wrote for newspapers and magazines until 1832, when the course of many years Mr. Hildreth wrote several books and pamphlets, chiefly on the subject of slavery, to which system he was opposed. He resided on a the Atlas, in 1837-38, when he resumed entered the 1st Artillery, and served his editorial post on that paper; and re- in the war with Mexico, and against sided in Demerara, British Guiana, from the Seminoles in 1849-50; resigning in 1840 to 1843, when he edited, successive- 1861, joined the Confederates, and was ly, two newspapers there. Petersburg and Richmond, in 1864-65. In the final struggle at Petersburg, he was instantly killed by a musket-shot, April 2, 1865.

Hill, BENJAMIN HARVEY, statesman; born in Jasper county, Ga., Sept. 14, 1823; graduated at the University of Georgia in 1844; was admitted to the bar and settled at La Grange, Ga., to practise in 1845. He entered political life in 1851; became conspicuous in the Whig party, and in supporting Millard Fillmore for the Presidency established a reputation as an exceptional orator. In 1859 he was elected State Senator; in 1860 was a Bell and Everett Presidential elector; and in 1861 was a Unionist member of the State secession convention, in which he made a strong argument against the ordinance of secession. Later in the latter year he became a member of the Confederate provisional Congress and a member of the Confederate Senate, in which he served till the close of the war. After the war he opposed the reconstruction acts of Congress; supported Horace Greeley for the Presidency in 1872; was elected to Congress to fill a vacancy in 1875 and for a full term in 1876; and on Jan. 17, 1877, made a speech on the electoral commission bill, which he asserted was "fully constitutional, wise in its provisions, and patriotic in its purpose." While yet serving as a Representative he was elected to the United States Senate, and occupied the seat till his death, in Atlanta, Ga., Aug. 19, 1882. After his death a monument was erected to his memory in Atlanta, consisting of a lifesized statue of white marble. INGALLS, JOHN JAMES.

Hill, Daniel Harvey, military officer; born in York District, S. C., July 12, 1821; graduated at West Point in 1842; entered the artillery; served in the war with Mexico, and was brevetted captain and major; left the army in 1849, and became Professor of Mathematics-first in ter year he was elected United States

Maryland. He was one of the most efficient of the 1st North Carolina Volunteers. He officers of Lee's army in the defence of took part in the defence of Richmond in 1862, and was active in the seven days' battle. He soon rose to the rank of major-general. He commanded the Department of the Appomattox, and in February, 1865, was in command at Augusta, Ga. He was a brother-in-law of "Stonewall" Jackson, and a skilful commander. In 1877 he became president of the University of Arkansas, and subsequently of the Georgia Military and Agricultural College. He died in Charlotte, N. C., Sept. 25, 1889.

Hill, DAVID BENNETT, lawyer; born in Havana, N. Y., Aug. 29, 1844; studied law and was admitted to the bar in 1864; was a member of the New York Assembly in 1869-71. He presided over the Democratic State conventions of 1877 and 1881; was mayor of Elmira, N. Y., in 1882; lieutenant-governor of New York in 1882-85, and governor in 1885-91. In the lat-

HOBKIRK'S HILL

In 1881 and 1882 he was president of the Rawdon's intrenchments, where, six days Senate. In 1896 he was elected Vice- afterwards, he was surprised by the Brit-President of the United States on the ish and defeated, after a sharp battle of ticket with Mr. McKinley, and served till several hours. Greene's force was too his death, in Paterson, N. J., Nov. 2, weak to assail Rawdon's intrenchments 1899. He was connected with a large with any prospect of success, and he en-

camped on a wooded eminence and awaited reinforcements under Sumter. On the night of the 24th a drummer deserted to the British and informed Rawdon of Greene's weakness and his expectation of strength. As his provisions were almost exhausted, Rawdon saw no chance for success in battle unless he should strike immediately. so he prepared to fall upon Greene early on the morning of the 25th. Unsuspicious of danger, Greene's army was unprepared for an attack. The cavalry horses were unsaddled. some of the soldiers were washing their clothes, and Greene and his staff were at a spring on a slope of Hobkirk's Hill taking breakfast. Rawdon had gained the left flank of the Americans by marching stealthily along the margin of a swamp. Partially surprised, Greene quickly formed his army in battle-His cavalry were soon mounted. The Virginia brigade, under General Huger, with Lieutenant-Colonels Campbell and

of exceptional personal magnetism, and brigade, with Delaware troops under Kirkably supported President McKinley in the wood, led by Col. Otho H. Williams, with Colonel Gunby and Lieutenant - Colonels Hobkirk's Hill, BATTLE OF. When (in Ford and Howe, occupied the left; and the 1781) Greene heard of the retreat of artillery, under Colonel Harrison, were in Cornwallis, he pursued him as far as the the centre; North Carolina militia were Deep River, when he turned back and held in reserve; and in this position moved southward towards Camden to Greene was prepared to receive the onstrike a blow for the recovery of South coming Rawdon, whose forces ascended at Camden. On April 19 Greene encamped regiments of Ford and Campbell endeavat Hobkirk's Hill, about a mile from ored to turn their flank, while Gunby's

number of financial concerns; was a man Hawes, formed the right; the Maryland trying days of 1898.

Carolina. Lord Rawdon was in command the slope with a narrow front.

HOBKIRK'S HILL-HOBOKEN

Marylanders assailed the front with bayonets without firing. The battle was thus opened with great vigor, Greene commanding the Virginians in person.

At the moment when the Americans felt sure of victory, Captain Beatty, commanding a company of Gunby's veterans, was killed, and his followers gave way. unfortunate order was given for the whole regiment to retire, when the British broke through the American centre, pushed up to the brow of the hill, and forced Greene to retreat. Meanwhile Washington had fallen on the British rear and captured about 200 soldiers, whose officers he quickly paroled, and in the retreat carried away fifty of the captives. Americans were chased a short distance, when Washington turned upon the pursuers, made a gallant charge, and checked them. By this movement Greene was enabled to save all his artillery and baggage. He rallied his men, crossed the Wateree above Camden, and rested in a strong position before moving on Fort Ninety-The loss of each army in the battle was about the same—less than 270. This defeat disconcerted

Greene at first, but his genius triumphed.

Hoboken, MASSACRE AT. The river Indians, or those dwelling on the borders of the Hudson, were tributary to the powerful Mohawks. In the midwinter of 1643. a large party of the latter came down to collect by force of arms tribute which had not been paid. The river Indians, 500 in number, fled before the invaders, and took refuge, with their wives and children, among the Hackensacks at Hoboken, opposite Manhattan Island, where they asked the protection of the Dutch. At the same time many of the tribe in lower Westchester fled to Manhattan and took refuge with the Hollanders. The humane De Vries, who had a settlement on Staten Island, proposed to Governor Kieft to make this an occasion for establishing a permanent peace with the Indians, whose anger his cruelties had fearfully aroused. But the "man of blood" refused; and it was made the occasion of spilling more innocent blood. On a cold night in February, 1643, the fugitives at Hoboken, and those on Manhattan, slumbering in fancied security, were attacked by order of Kieft, without the shadow of an excuse. by armed Hollanders sent by the governor to murder them. Eighty of these Dutchmen were sent across the Hudson stealthily, among floating ice, and fell suddenly upon the stricken families at Hoboken.

rior and squaw, sachem and child, mother land, O., Sept. 14, 1901. and babe, were alike massacred," says furious slaughter. Mangled victims, seeksave their children, whom the soldiers had thrown into the stream, were driven back into the water, and drowned before the eyes of their unrelenting murderers." there, and forty of those on Manhattan. The river and the surrounding country were lighted with the blaze of burning wigwams; and by that horrid illumination De Vries witnessed the butchery from the ramparts of Fort Amsterdam. He told the cowardly governor, who remained within the walls of the fortress, that he had begun the ruin of the colony. The governor sneered at the clemency of De Vries; and when the soldiers returned to the fort the next morning, with thirty prisoners and heads of several of the slain Indians of both sexes, he shook their bloody hands with delight, praised them for their bravery, and made each of them a present. Then De Vries uttered his prophecy. See Kieft, William.

Hobson, EDWARD HENRY, military officer; born in Greenburg, Ky., July 11, 1825; received a common-school education; enlisted in the Kentucky Volunteers in 1846, for the war with Mexico, and was mustered out of service in June, 1847. In 1861 he organized and was commissioned colonel of the 13th Kentucky Volunteers; served at Camp Hobson till February, 1862; commanded his regiment at plan such a course, and conducted it in

to face with the most puzzling problem ever met in warfare. She will present the unique spectacle, when used in attack, of a weapon against which there is no defence. You can send torpedo-boat destroyers against torpedo-boats, but you can send nothing against the submarine boat, not even itself. The fanciful descriptions of the submarine battle of the future have one fatal defect. You cannot see under water. Hence, you cannot fight under water.

To-morrow, if we had a fleet of submarines big enough, they could protect New York Harbor completely against an attack by the combined surface fleets of the world. But our shipping and our city would still be at the mercy of our enemies, if they had even one submarine, manned by a fearless crew of experts. You could not close the harbor against her, even with a net-work of torpedoes and chains stretched across the Narrows, reaching from the surface to the bottom of the channel. From a safe distance she would simply send a torpedo against the net-work that would blow it to pieces, giving her all the passage-way she wanted to go in and out. She would never have to

In 1787 the price acre. This caused great dissatisfaction on of public land was reduced to $66^2/_3$ cents the part of the States, since as all lands per acre, and during the next year the were at the same minimum price the best ket, underbidding the government to check of public land within their limits as a

hinderance, begun to clamor for the restoration of these lands.

Schemes without number were now concocted for the disposal of the public lands, and in the session of 1827-28 Congress actually gave away to States and individuals-largely on the plea of internal improvements—no less than 2,300,000 acres of public land, and the suggestion was seriously made to restore all the public lands in the States to the State governments. This was strongly opposed, however, and many warm debates were carried on in Congress for several years on the public land question. These were in a measure checked by the fever for speculation in public lands which raged from 1834 till it precipitated the crash of 1837, but were renewed with even greater ardor when the proposition came up to have the general government assume the debts of the States which had lost heavily in the speculative era.

The plan to give the public lands to the States was again thrust forward and was proportion of the public lands. About 30, 1879. 1852 a homestead law, which was warmly

But here the scene seems to be un- with this power. Hence it becomes the inhappily changing. The British ministry, dispensable duty of every good and loyal

subject cheerfully to obey and patiently submit to all the acts, laws, orders, and regulations that may be made and passed by Parliament for directing and governing all these general matters.

Here it may be urged by many, and indeed with great appearance of reason, that the equity, justice, and beneficence of the British constitution will require that the separate kingdoms and distinct colonies, who are to obey and be governed by these general laws and regulations, ought to be represented in some way or other in Parliament, at least while these general matters are under consideration. Whether the colonies will ever be admitted to have representatives in Parliament-whether it be consistent with their distant and dependent state; whether, if it were admitted, it would be to their advantageare questions we will pass by, and observe that these colonies ought in justice, and for the evident good of the commonwealth, to have notice of every new measure about to be pursued, and new act about to be passed, by which their rights, liberties, and interests may be affected; they ought to have such notice, that they may appear or be heard by their agents, by counsel, or written representation, or by some other equitable and effectual way.

The colonies are at so great a distance from England that the members of Parliament can generally have but little knowledge of their business, connections, and interests, but what is gained from the people who have been there; the most of those have so slight a knowledge themselves that the informations they can give are very little to be depended upon, though they may pretend to determine with confidence on matters far above their reach. All such informations are too uncertain to be depended upon in the transaction of business of so much consequence, and in which the interests of 2,000,000 free people are so deeply concerned. There is no kind of inconvenience or mischief can arise from the colonies having such notice, and being heard in the manner above mentioned; but, on the contrary, very great mischiefs have already happened to the colonies, and always must be expected, if they are not heard before things of such importance are determined concerning them.

Had the colonies been fully heard before the last act had been passed, no reasonable man can suppose it ever would have passed at all, in the manner it now stands. For what good reason can possibly be given for making a law to cramp the trade and interest of many of the colonies, and at the same time lessen in a prodigious manner the consumption of the British manufactures in them? These are certainly the effects this act must produce. duty of 3d. per gallon on foreign molasses is well known to every man in the least acquainted with it to be much higher than that article can possibly bear. and therefore must operate as an absolute prohibition. This will put a total stop to the exportation of lumber, horses, flour, and fish to the French and Dutch sugarcolonies; and if any one supposes we may find a sufficient sale for these articles in the English West Indies, he verifies what was just now observed, that he wants true information. Putting an end to the importation of foreign molasses at the same time puts an end to all the costly distilleries in these colonies and to the rum trade with the coast of Africa, and throws it into the hands of the French. With the loss of the foreign molasses trade the codfishing in America must also be lost and thrown also into the hands of the French. That this is the real state of the whole business is not mere fancy; neither this nor any part of it is an exaggeration, but a sober and most melancholy truth.

gallon View this duty of 3d. per on foreign molasses, not in the light of a prohibition, but supposing the trade to continue and the duty to be paid. Heretofore hath been imported into the colony of Rhode Island only about 1,250,000 gallons annually; the duty on this quantity is £14,375 sterling, to be paid yearly by this little colony; a larger sum than was ever in it at any one time. This money is to be sent away, and never to return; yet the payment is to be repeated every year. Can this possibly be done? Can a new colony, compelled by necessity to purchase all its clothing, furniture, and utensils from England, to support the expenses of its own internal government, obliged by its duty to comply with every call from the crown, to raise money in emergencies; after all this, can every man in it pay

419

article only? There is surely no man staves, which used to be intermixed among in his right mind believes this possible. them, must lose one-half of their weight, The charging foreign molasses with this high duty will not affect all the colonies equally, nor any other near so much as this of Rhode Island, whose trade depends more on foreign molasses and on distilleries than that of any other; this must show that raising money for the either alternative, and by supposing, on is stopped, and with it the principal ability of the colonies to get money, but, on the other hand, that this trade is continued and that the colonies get money from it, but all their money is taken from them by paying their duty; can Britain be the gainer by this? Is it not the chosen interest of Britain to dispose of and be paid for her own manufactures? And doth she not find the greatest and best market for them in her own colonies? Will she find an advantage in disabling the colonies to continue their trade with their being made poor?

Ministers have great influence, and parif it be only of the skins of beasts.

lumber, the most natural product of these seizure, the unhappy owner may

24s. a year for the duties of a single ships carrying flax-seed casks without the which must prevent their continuing this trade, to the great injury of Ireland and of the plantations; and what advantage is to accrue to Great Britain by it must be told by those who can perceive the utility of this measure.

Enlarging the power and jurisdiction general services of the crown or colonies of the courts of vice-admiralty in the by such a duty will be extremely unequal, colonies is another part of the same act and therefore unjust. And, by taking greatly and justly complained of. Courts of admiralty have long been there in most the one hand, the foreign molasses trade of the colonies, whose authority were circumscribed with moderate territorial jurisdictions, and whose courts have always done the business necessary to be brought before these courts for trial in the manner it ought to be done, and in a way only moderately expensive to the subjects; and if seizures were made, or informations exhibited, without reason or contrary to law, the informer or seizer was left to the justice of the common law, there to pay for his folly or suffer for his temerity.

But now this case is quite altered, and her? Or can she possibly grow rich by a custom-house officer may make a seizure in Georgia of goods ever so legally imported, and carry the trial to Halifax, liaments have great power: can either of at 1,500 miles' distance, and thither the them change the nature of things, stop our owner must follow him to defend his propmeans of getting money, and yet expect erty; and when he comes there, quite beus to purchase and pay for British manu- youd the circle of his friends, acquaintfactures? For twenty-four ed every measure that might be offensive, hours afterwards not a thing was seen and all such manufactures as were inter-floating on the bosom of the river with-dicted. Besides all this, they have risked out being fired at by musket or cannon. their lives when they have been ordered, This event greatly amused the Ameriand furnished money whenever it has been cars, and Hopkinson wrote a satirical called for; have never been either trouble- poem entitled the Battle of the Kegs,

BATTLE OF THE KEGS.

Gallants attend, and hear a friend Trill forth harmonious ditty; Strange things I'll tell, which late befell In Philadelphia city.

'Twas early day, as poets say, Just when the sun was rising, A soldier stood on log of wood, And saw a thing surprising.

As in amaze he stood to gaze (The truth can't be denied, sir), He spied a score of kegs, or more, Come floating down the tide, sir.

A sailor, too, in jerkin blue, The strange appearance viewing, First d—d his eyes, in great surprise, Then said, "Some mischief's brewing.

"These kegs, I'm told, the rebels hold, Pack'd up like pickled herring; And they've come down t'attack the town In this new way of ferry'ng."

The soldier flew, the sailor too, And, scared almost to death, sir, Wore out their shoes to spread the news, And ran till out of breath, sir.

Now up and down, throughout the town, Most frantic scenes were acted; And some ran here, and others there, Like men almost distracted.

Some "Fire!" cried, which some denied, But said the earth had quaked; Ran through the streets half naked.

HOPKINSON—HOPPINS

Sir William* he, snug as a flea, Lay all this time a snoring; Nor dream'd of harm as he say warm In bed with Mrs. L-ng.+

Now, in a fright, he starts upright,
Awaked by such a clatter; He rubs both eyes and boldly cries, "For God's sake, what's the matter?"

At his bedside he then espied Sir Erskine, t at command, sir; Upon one foot he had one boot, And t'other in his hand, sir.

"Arise! arise!" Sir Erskine cries;
"The rebels—more's the pity— Without a boat, are all afloat, And ranged before the city.

"The motley crew, in vessels new, With Satan for their guide, sir, Pack'd up in bags, or wooden kegs, Come driving down the tide, sir.

"Therefore prepare for bloody war; These kegs must all be routed; Or surely we despised shall be, And British courage doubted."

The royal band now ready stand, All ranged in dread array, sir, With stomach stout to see it out, And make a bloody day, sir.

The cannons roar from shore to shore, The small-arms loud did rattle; Since wars began I'm sure no man E'er saw so strange a battle.

The rebel dales, the rebel vales, With rebel trees surrounded, The distant woods, the hills and floods, With rebel echoes sounded.

The fish below swam to and fro, Attack'd from every quarter Why sure (thought they), the devil's to pay 'Mong folks above the water.

The kegs, tis said, though strongly made Of rebel staves and hoops, sir, Could not oppose their powerful foes, The cong'ring British troops, sir.

From morn to night these men of might Display'd amazing courage, And when the sun was fairly down, Retired to sup their porridge.

A hundred men, with each a pen, Or more, upon my word, sir, It is most true, would be too few Their valor to record, sir.

repute; and was the leading counsel of Dr.

Rush in his suit against Cobbett (see COBBETT, WILLIAM). He was also counsel for JUDGE SAMUEL CHASE (q. v.) in his impeachment trial. As a member of Congress (1816-20), he distinguished himself by his course on the tariff question, and by his opposition to a recharter of the United States Bank. In 1828 he was appointed judge of the United States district court of eastern Pennsylvania, an office which his father and grandfather

Such feats did they perform that day

Against these wicked kegs, sir,
That, years to come, if they get home,
They'll make their boasts and brags, sir.

BATTLE HYMN OF THE REPUBLIC.

Mine eye hath seen the glory of the coming of the Lord:

He is trampling out the vintage where the grapes of wrath are stored; He hath loosed the fateful lightning of his

terrible swift sword;

His truth is marching on.

I have seen him in the watch-fires of a hundred circling camps;

They have builded him an altar in the evening dews and damps;

I can read his righteous sentence by the dim and flaring lamps, His day is marching on.

I have read a fiery gospel writ in rows of burnished steel:

"As ye deal with my contemners, so with you

my grace shall deal;" Let the Hero, born of woman, crush the serpent with his heel, Since God is marching on.

He has sounded forth the trumpet that shall

never call retreat; He is sifting out the hearts of men before his judgment seat;

Oh, be swift, my soul, to answer him! be jubilant, my feet!
Our God is marching on.

In the beauty of the lilies Christ was born across the sea,

With a glory in his bosom that transfigures you and me;

As he died to make men holy, let us die to make men free, While God is marching on.

Howe, MARK ANTONY DE WOLFE, ediraphies Series).

After leaving the Delaware with his fleet, in 1778, he had an encounter off Rhode Island with a French fleet, under the Count d'Estaing, when he disappeared from the American waters. In 1782 he was made admiral of the blue, and created an English viscount; and in September of that year he relieved Gibraltar, and received the thanks of both Houses of Parliament. In 1787 he was made admiral of the white, and in August the next year was raised to an earldom. Because of a complete victory over the French, which he obtained in 1794, he was rewarded with a gold medal, the Order of the Garter, and the commission of admiral tor; born in Bristol, R. storms for many weeks, and then returned to England in September, bearing only the fruit of the discovery of the island of Spitzbergen. Neither he nor his employers were disheartened, and late in April, 1608, he sailed again, expecting to make a passage between Spitzbergen and Nova Zembla. Again he was compelled by the ice to turn back. His employers were now discouraged, and Hudson went over to Holland and offered his services to the Dutch East India Company, and they were accepted. April 6, 1609, he sailed from Amsterdam in the Half Moon, a stanch vessel of 90 tons, and steered for Nova Zembla. Again the ice-barrier forbade his entrance to the polar seas. Determined not to return fruitless to Amsterdam, he sailed around the southern shores of Greenland, into the beaten track of searchers after a

northwest passage. Again he was repulsed tan Bay, south of Staten Island, and

HUDSON RIVER, DISCOVERY OF THE

Hudson River, DISCOVERY OF THE. and south; we steered away north north-Third Voyage of Master Henry Hudson, bee 39 degrees, 3 minutes. Degrees," written by Robert Juet:

The first of September [1609], faire

The following narrative is from "The west. At noone we found our height to toward Nova Zembla, and at his Returne, soundings thirtie, twentie-seven, twentie-his Passing from Farre Islands to New-foure, and twentie-two fathomes, as wee found Land, and along to Fortie-foure went to the northward. At sixe of the Degrees and Ten Minutes, and thence to clocke wee had one and twentie fathoms. Cape Cod, and so to Thirtie-three De- And all the third watch, till twelve of grees; and along the Coast to the North- the clocke at mid-night, we had soundward, to Fortie-two Degrees and an Halfe, ing one and twentie, two and twentie, and up the River Neere to Fortie-three eighteene, two and twentie, eighteene, and two and twentie fathoms, and went sixe leagues neere hand north north-west.

The second, in the morning, close weather, the wind variable betweene east weather, the winde at south in the morn-

ing; from twelve untill two of the clocke from the land. At five of the clocke we sounding one and twentie fathoms; and eight fathoms water; the night was faire. in running one glasse we had but six- This night I found the land to hall the teene fathoms, then seventeene, and so compasse 8 degrees. For to the northshoalder and shoalder untill it came to ward off us we saw high hils. For the twelve fathoms. We saw a great fire, but day before we found not above 2 degrees ten fathoms, whereupon we brought our fall with, and a pleasant land to see. tackes aboord, and stood to the eastward east south-east, foure glasses. Then the ten of the clocke; then it cleered, and the sunne arose, and wee steered away north wind came to the south south-east, so againe, and saw the land from the west wee weighed and stood to the northward. by north to the north-west by north, all The land is very pleasant and high, and

we steered north north-west, and had anchored, being little winde, and rode in could not see the land; then we came to of variation. This is a very good land to

like broken islands, and our soundings bold to fall withall. At three of the

THE HALF MOON IN THE HUDSON.

shoare we had seven fathoms. The course the northmost, thinking to have gone into along the land we found to be north-east it, but we found it to have a very shoald first sight of, untill we came to a great water. Then we cast about to the south-lake of water, as wee could judge it to ward, and found two fathoms, three bee, being drowned land, which made it fathoms, and three and a quarter, till we to rise like islands, which was in length came to the souther side of them; then ten leagues. The mouth of that land we had five and sixe fathoms, and hath many shoalds, and the sea breaketh anchored. So wee sent in our boate to on them as it is cast out of the mouth sound, and they found no lesse water of it. And from that lake or bay the land then foure, five, sixe, and seven fathoms, lyeth north by east, and wee had a great and returned in an hour and a halfe. So streame out of the bay; and from thence wee weighed and went in, and rode in our sounding was ten fathoms two leagues five fathoms, oze ground, and saw many

were eleven and ten fathoms. Then wee clock in the after-noone, wee came to looft in for the shoare, and faire by the three great rivers. So we stood along to by north. From the land which we had barre before it, for we had but ten foot

great. minutes.

The fourth, in the morning, as soone as the day was light, wee saw that it was good riding farther up. So we sent our boate to sound, and found that it was a shoare. Then we weighed and went in ten great mullets, of a foote and a halfe long a peece, and a ray as great as foure men could hale into the ship. So wee trimmed our boate and rode still all day. north-west, and our anchor came home, and wee drove on shoare, but tooke no skins loose, well dressed. They have yellow copper. They desire cloathes, and are very civill. They have great store of maize, or Indian wheate, whereof they make good bread. The countrey is full of great and tall oake.

the day was light, the wind ceased and Point. sent our boate to sound the bay, and we found that there was three fathoms hard currants. For one of them came aboord death of our man; which they did not. and brought some dryed, and gave me but durst not trust them.

salmons, and mullets, and rayes, very weather, and our master sent John Col-The height is 40 degrees, 30 man, with foure other men in our boate, over to the north-side to sound the other river, being foure leagues from us. They found by the way shoald water, two fathoms; but at the north of the river eighteen, and twentie fathoms, and very good very good harbour, and foure and five riding for ships; and a narrow river to fathomes, two cables length from the the westward, betweene two ilands. The lands, they told us, were as pleasant with with our ship. Then our boate went on grasse and flowers and goodly trees as land with our net to fish, and caught ever they had seene, and very sweet smells came from them. So they went in two leagues and saw an open sea, and returned; and as they came backe, they were set upon by two canoes, the one having At night the wind blew hard at the twelve, the other fourteene men. The night came on, and it began to rayne, so that their match went out; and they had hurt, thanked bee God, for the ground is one man slaine in the fight, which was an soft sand and oze. This day the people Englishman, named John Colman, with of the countrey came aboord of us, seem- an arrow shot into his throat, and two ing very glad of our comming, and more hurt. It grew so darke that they brought greene tabacco, and gave us of it could not find the ship that night, but for knives and beads. They goe in deere labored to and fro on their oars. They had so great a streame, that their grapnell would not hold them.

The seventh, was faire, and by ten of the clocke they returned abourd the ship, and brought our dead man with them, whom we carried on land and buryed, and The fifth, in the morning, as soone as named the point after his name, Colmans Then we hoysed in our boate, the flood came. So we heaved off our and raised her side with waste boords for ship againe into five fathoms water, and defence of our men. So we rode still all night, having good regard to our watch.

The eighth, was very faire weather, wee by the souther shoare. Our men went on rode still very quietly. The people came land there, and saw great store of men, aboord us, and brought tabacco and Indwomen, and children, who gave them ian wheat to exchange for knives and tabacco at their comming on land. So beades, and offered us no violence. So we they went up into the woods, and saw fitting up our boate did marke them, to great store of very goodly oakes and some see if they would make any shew of the

The ninth, faire weather. In the mornsome, which were sweet and good. This ing, two great canoes came aboord full of day many of the people came aboard, men; the one with their bowes and arsome in mantles of feathers, and some in rowes, and the other in shew of buying of skinnes of divers sorts of good furres. knives to betray us; but we perceived their Some women also came to us with hempe. intent. Wee tooke two of them to have They had red copper tabacco pipes, and kept them, and put red coates on them, other things of copper they did weare and would not suffer the other to come about their neckes. At night they went neere us. So they went on land, and two on land againe, so wee rode very quiet other came aboord in a canoe; we tooke the one and let the other goe; but hee The sixth, in the morning, was faire which wee had taken, got up and leapt

over-boord. Then wee weighed and went grees. In the after-noone we weighed, off into the channell of the river, and an- and turned in with the floud, two leagues chored there all night.

till twelve of the clocke. Then we weighed ground; and had an high point of land, and went over, and found it should all the which shewed out to us, bearing north by middle of the river, for wee could finde east five leagues off us. but two fathoms and a halfe and three The fourteenth, in the morning, being fathomes for the space of a league; then very faire weather, the wind south - east, wee came to three fathomes and foure we sayled up the river twelve leagues, and fathomes, and so to seven fathomes, and had five fathoms, and five fathoms and a anchored, and rode all night in soft ozie quarter lesse; and came to a streight beground. The banke is sand.

weather. At one of the clocke in the after- east by north, one league; and we had noone wee weighed and went into the twelve, thirteene, and fourteene fathomes. river, the wind at south south west, The river is a mile broad: there is very sixe, five, sixe, seven, eight, nine, ten, up north-west, a league and an halfe deepe twelve, thirteene, and fourteene fathomes. water. Then north-east by north, five Then it shoalded againe, and came to five miles; then north-west by north, two fathomes. that it was a very good harbour for all very high and mountainous. The river is windes, and rode all night. The people full of fish. of the country came aboord of us, making shew of love, and gave us tabacco and Ind- misty, until the sunne arose: then it ian wheat, and departed for that night; cleered. So wee weighed with the wind but we durst not trust them.

after-noone, at two of the clocke, wee had a very good depth, as sixe, seven, weighed, the winde being variable be- eight, nine, ten, twelve, and thirteene tweene the north and the north-west. fathomes, and great store of salmons in So we turned into the river two leagues the river. This morning our two savages and anchored. This morning, at our first got out of a port and swam away. After rode in the river, there came eight and we were under sayle, they called to us in twentie canoes full of men, women and scorne. At night we came to other mounchildren to betray us: but we saw their taines, which lie from the rivers side. intent, and suffered none of them to come There wee found very loving people, and aboord of us. At twelve of the clocke very old men: where wee were well used. they departed. They brought with them Our boat went to fish, and caught great oysters and beanes, whereof wee bought store of very good fish. some. They have great tabacco pipes of The sixteenth, faire and very hot yellow copper, and pots of earth to dresse weather. In the morning our boat went their meate in. It floweth south-east by againe to fishing, but could catch but few, south within.

northerly. At seven of the clocke in the aboord, and brought us eares of Indian morning, as the floud came we weighed, corne, and pompions, and tabacco: which and turned foure miles into the river. wee bought for trifles. Wee rode still all The tide being done wee anchored. Then day, and filled fresh water; at night wee there came foure canoes aboord: but we weighed and went two leagues higher, and suffered none of them to come into our had shoald water: so wee anchored till They brought great store of very day. good oysters aboord, which we bought for The seventeenth, faire sun-shining trifles. and ran up sixe leagues higher, and found could not tell how to take it. both sides. Toward night we borrowed so neere the shoare, that we grounded: so we layed out our small anchor, and heaved off againe. Then we borrowed on the againe, and anchored all night.

So we rode there all night.

men went up with our boat to sound the and unconstant soundings. river, and found two leagues above us yet once more to go farther up into the did beare; but much people resorted aboord, so wee went not this day. Our all night very well. carpenter went on land, and made a foreof our countrey women would doe in a water, and anchored. strange place. In the ende one of them

The canoes shoalds in the middle of the channell, and and folke went all on shoare, but some of small ilands, but seven fathoms water on them came againe, and brought stropes of beades, some had sixe, seven, eight, nine, ten; and gave him. So he slept all night quietly.

The two and twentieth was faire weather: banke in the channell, and came aground in the morning our masters mate and foure againe; while the floud ran we heaved off more of the companie went up with our boat to sound the river higher up. The The eighteenth, in the morning, was people of the countrey came not aboord faire weather, and we rode still. In the till noone: but when they came, and saw after-noone our masters mate went on the savages well, they were glad. So at land with an old savage, a governor of three of the clocke in the afternoone they the countrey; who carried him to his came aboord, and brought tabacco, and house, and made him good cheere. The more beades, and gave them to our master, nineteenth, was faire and hot weather: at and made an oration, and shewed him all the floud, being neere eleven of the clocke, the countrey round about. Then they wee weighed, and ran higher up two sent one of their companie on land, who leagues above the shoalds, and had no lesse presently returned, and brought a great water then five fathoms; we anchored, and platter full of venison dressed by themrode in eight fathomes. The people of the selves; and they caused him to eate with countrie came flocking aboord, and brought them: then they made him reverence and us grapes and pompions, which wee bought departed, all save the old man that lay for trifles. And many brought us bevers aboord. This night, at ten of the clocke, skinnes and otters skinnes, which wee our boat returned in a showre of raine bought for beades, knives, and hatchets. from sounding of the river; and found it to bee at an end for shipping to goe in. The twentieth, in the morning, was faire For they had beene up eight or nine weather. Our masters mate with foure leagues, and found but seven foot water,

The three and twentieth, faire weather. but two fathomes water, and the channell At twelve of the clocke wee weighed, and very narrow; and above that place, seven went downe two leagues to a shoald that or eight fathomes. Toward night they had two channels, one on the one side, and returned: and we rode still all night. The another on the other, and had little wind, one and twentieth was faire weather, and whereby the tyde layed us upon it. So the wind all southerly: we determined there wee sate on ground the space of an houre till the floud came. Then wee had river, to trie what depth and breadth it a little gale of wind at the west. So wee got our ship into deepe water, and rode

The foure and twentieth was faire yard. And our master and his mate de- weather: the winde at the north-west, termined to trie some of the chiefe men wee weighed, and went downe the river of the countrey, whether they had any seven or eight leagues; and at halfe ebbe treacherie in them. So they tooke them wee came on ground on a banke of oze in downe into the cabin, and gave them so the middle of the river, and sate there till much wine and aqua vitæ, that they were the floud. Then wee went on land, and all merrie: and one of them had his wife gathered good store of chest-nuts. At ten with them, which sate so modestly, as any of the clocke wee came off into deepe

The five and twentieth was faire was drunke, which had been aboord of our weather, and the wind at south a stiffe ship all the time that we had beene there: gale. We rode still, and went on land to and that was strange to them; for they walke on the west side of the river, and

found good ground for corne and other bases, and barbils; and returned in an garden herbs, with great store of goodly houre. We rode still all night. oakes, and walnut-trees, and chest-nut The eight and twentieth, being faire slate for houses, and other good stones.

mate and foure more of our companie, to was darke: then wee anchored. cut wood. This morning, two canoes came The nine and twentieth was drie close teene yeares with them, who behaved them- the edge of the mountaines, or the northselves very modestly. Our master gave ermost of the mountaines, and anchored: one of the old men a knife, and they gave because the high land hath many points, him and us tabacco. And at one of the and a narrow channel, and hath manie edclocke they departed downe the river, mak- die winds. So we rode quietly all night in ing signes that wee should come downe to seven fathoms water. them; for wee were within two leagues of the place where they dwelt.

would have had us anchor, and goe on land grow on them were all blasted, and some to eate with him: but the wind being of them barren, with few or no trees on faire, we would not yeeld to his request; them. The people brought a stone aboord so he left us, being very sorrowfull for like to an emery (a stone used by glasiers our departure. At five of the clocke in the to cut glasse), it would cut iron or steele: afternoone, the wind came to the south yet being bruised small, and water put south-west. So wee made a boord or two, to it, it made a color like blacke lead water. Then our boat went on shoare to colours. At three of the clocke they defish right against the ship. Our masters parted, and we rode still all night. mate and boatswaine, and three more of could not finde a good place. They tooke north. In the morning we weighed at

trees, ewe trees, and trees of sweet wood weather, as soon as the day was light, wee in great abundance, and great store of weighed at halfe ebbe, and turned downe two leagues belowe water; for the streame The sixe and twentieth was faire doth runne the last quarter ebbe: then we weather, and the wind at south a stiffe anchored till high water. At three of gale; wee rode still. In the morning our the clocke in the after-noone we weighed, carpenter went on land, with our masters and turned downe three leagues, untill it

up the river from the place where we first weather; the wind at south, and south found loving people, and in one of them and by west; we weighed early in the was the old man that had lyen aboord of morning, and turned downe three leagues us at the other place. He brought another by a lowe water, and anchored at the old man with him, which brought more lower end of the long reach: for it is stropes of beades and gave them to our sixe leagues long. Then there came cermaster, and shewed him all the countrey taine Indians in a canoe to us, but would there about as though it were at his com- not come aboord. After dinner there came mand. So he made the two old men dine the canoe with other men, whereoff three with him, and the old mans wife: for they came aboord us. At three of the clocke brought two old women, and two young in the after-noone wee weighed, as soone maidens of the age of sixteene or seven- as the ebbe came, and turned downe to

The thirtieth was faire weather, and the wind at south-east, a stiffe gale be-The seven and twentieth, in the morn-tweene the mountaynes. We rode still ing, was faire weather, but much wind at the afternoone. The people of the countrey the north; we weighed and set our fore came aboord us and brought some small top-sayle, and our ship would not flat, but skinnes with them, which we bought for ran on the ozie banke at half ebbe. Wee knives and trifles. This is a very pleaslayed out anchor to heave her off, but ant place to build a towne on. The road could not. So wee sate from halfe ebbe to is very neere, and very good for all halfe floud: then wee set our fore-sayle windes, save an east north-east wind. The and mayne top-sail, and got downe sixe mountaynes look as if some metall or leagues. The old man came aboord, and minerall were in them. For the trees that fourteen fathomes glistering: it is also good for painters

HUI SHEN

been derived from Sakhyamnui. the full rendering of one of Buddha's names. The Buddhist priests in Tibet and North China are called "lamas," and the Mexican priest is known as the "tlama." A deified priest or lama, who is said to have lived on a small island near the Colorado River, had the name of Quatu Sacca, which seems to combine the two names Gautama and Sakhya. No very great value, however, is due to any single case of these resemblances to Buddhist names, but there being so many makes it highly probable that they are not all accidental. Again, it is worthy of notice that if "fusang" was used by Hui Shen to represent the maguey or agave plant, then, as Mexico signifies "the place or region of the agave," it follows naturally that if Mexico was the country he visited, he would call it the country of the "fusang."

When we come to look for visible traces of Buddhism among the antiquities of Mexico, we are soon amply rewarded. Images and sculptured tablets, ornaments, temples, pyramids, etc., abound that cannot well be ascribed to any other source with the show of reason. Among these may be mentioned the following: A large image found in Campeachy representaccurately a Buddhist priest in his robes.—An image of Buddha at Palenque, sitting cross-legged on a seat formed of two lions placed back to

in India and China. - An elaborate and outside of Buddhist temples in China, elephant - faced god found among the Japan, and India .-- A perfect elephant's Aztecs, which is evidently an imitation head sculptured on the walls at Palenque, of the Indian image of Ganesha.—A the elephant being the usual symbol of Buddhist altar or table of stone found Buddha in Asia, and no elephants being at Palenque. - Figures of Buddha sit- found in America. - An old Mexican image ting cross - legged with an aureola around now in the Ethnographical Societies' mu-

the characters being evidently intended for Mongolia, the large pyramidal base and Buddha, but engraved by a sculptor who the mode of construction all seeming to did not know the Chinese written lan- point to Buddhist origin.—The ornaments guage.—On the walls of the temple of in the walls of the temples in different Uxmal there are astronomical diagrams parts of Mexico are similar in design to and images, representing among other those of many buildings in China and things the dragon which causes eclipses India; particularly the pattern known as by swallowing the sun—a thoroughly Chinese notion—but instead of scales it is which is found in an almost endless vacovered with feathers, showing the idea riety of diamond fret, labyrinth fret, methat it can fly.—The enormous temples or ander fret, double fret—having the fillets

interlacing at right angles—and others for which we have no names. These may be seen to advantage in pictures of the walls "Room of of the Mosaics," at Mitla, at Uxmal, and elsewhere. -There is a Buddhist cross, or symbol of Buddha, carved on a pillar at Palenque.

It must be acknowledged that there are many difficulties and inconsistencies in Hui Shen's account of the introduction of Buddhism into Fusang, or America. These, however, are easily accounted for when it is remembered he was a native of Cabul, speaking Chinese imperfectly, while Yu Kie, who had never travelled, must have failed to understand some of his statements. The account was written before printing was in use, and hence in the copying many errors may have crept in. Furthermore, the Chinese characters are subject to changes, in the lapse of time, both

Hull, ISAAC, naval officer; born in Derby, Conn., March 9, 1775; nephew of Gen. William Hull; when nineteen years old he commanded a merchant ship which sailed to London; entered the navy as lieutenant in 1798, and rose to captain in 1806. He was in the Constitution, and distinguished himself in the West Indies and in the Mediterranean. He sailed in the Constitution in July, 1812, and had a remarkable chase by a British squadron (see Con-STITUTION). In August he encountered the Guerrière, and made her a captive. For this

exploit Congress voted him a gold medal. Afterwards he was a naval commissioner, and commodore of the navy-vards at Boston. Portsmouth, and Washington. He served in the American navy, afloat and ashore, thirty-seven years, and died in Philadelphia, Feb. 13, 1845. His remains rest in Laurel Hill Cemetery, and over them is a beautiful altar-tomb of Italian marble—a copy of the tomb of Scipio Barbatus at Rome. It is chastely ornamented, and surmounted by an American eagle, in the attitude of defending the national flag, upon which it stands.

Hull, WILLIAM, military officer; born in Derby, Conn., June 24, 1753; graduated at Yale College in 1772; studied divinity a year; then became a student at the Litchfield Law School; and was admitted to the bar in 1775. He soon afterwards became captain in Webb's regiment,

ton, and Princeton, and after the bat-Hull, Amos Girard, author; born in the at the latter place he was promoted of the Early Settlement of Oswego Falls. 1779; and soon afterwards to colonel.

11 all the boats were sent down to Spring Wells in full view of the British, and Colonel McArthur, with his regiment, marched to the same place. After dark troops and boats moved up the river unobserved to Bloody Run, above Detroit. The British, finding all silent at Spring Wells, believed the Americans had gone down to attack Malden, 18 miles below, so they left Sandwich and hurried to its defence. At dawn there were no troops to oppose the passage of the Americans, and Hull's troops passed the river unmolested. Colonel Cass hoisted the American flag at Sandwich, and the American troops encamped near. On the same day Hull issued a stirring proclamation, in which he set forth the reasons for the invasion, and assured the inhabitants that all who remained at home should be secure in person and property. He did not ask them to join him, but to remain quiet. This proclamation, and the presence of a considerable army, caused many

moved to Plantation Number Three, at the Castle, where he remained until the close of the war. At the age of fifteen, having acquired a man's stature, William entered the Continental army. He enlisted in a regiment of Massachusetts militia commanded by Col. Samuel McCobb, Capt. Benjamin Lemont's company, as a volunteer for six months. That was in the spring of 1780 or 1781; and he was honorably discharged about Christmas, the same year, at Cox's Head, at the mouth of the Kennebec River. He received an annual pension of \$21.60 until 1865, when an annual gratuity of \$300 was granted by Congress to each of the five Revolutionary soldiers then supposed to be living. Only four of the number lived to receive this gratuity. William Hutchings and Lemuel Cook were the last.

In 1865, when over 100 years of age, he

cepted it. A revenue-cutter conveyed him from Castine to Bangor. The guns of Fort Knox, on the Penobscot, gave him a salute of welcome as he passed. At Bangor multitudes rushed to get a glimpse of the veteran as he was escorted through the streets. Senator Hamlin delivered an oration on that occasion, and at the close Mr. Hutchings responded at some length to a toast. "My friends told me," he said, "that the effort to be here might cause my death; but I thought I could never die any better than by celebrating the glorious Fourth."

Hutchins, THOMAS, geographer; born in Monmouth, N. J., in 1730; joined the British army when sixteen years old; was made paymaster and captain of the 60th Royal American Regiment. In 1779, while in London, his desire for American independence became known, and he spent six weeks in prison on the charge of writing to Benjamin Franklin, then in France. He is said to have lost nearly \$60,000 affair. Later he settled in by this Charleston, S. C. ten years. In 1752 he was chosen judge and on each side of the gate was a large of probate; was a councillor from 1749 oak-tree. The ground sloped, and in front to 1766; was lieutenant-governor from 1758 to 1771; and was made chief-justice

of the province in 1768. At that time he held four high offices under the King's appointment, and he naturally sided with the crown in the rising disputes, and became very obnoxious to the republicans. When, in 1769, Governor Bernard was recalled. Hutchinson became acting-governor of Massachusetts, and was commissioned governor in 1771. He was continually engaged in controversies with the popular Assembly, and often with his council. The publication of some of his letters (1773), which proved that he had been for years urging upon Parliament the necessity for the strict enforcement of power over the colonies, raised a storm of indignation, and his recall was demanded. This indignation was increased by his action concerning the landing of cargoes of tea in Boston, and he sailed for England, June 1, 1774, where he was rewarded with a pension. He never returned to his native country. He wrote and published a history of Massachusetts from the first settlement until 1750. The official residence of the governor of Massachusetts was called the "Province House." It was a large brick building, three stories in height, and was formerly decorated with the company in the pay of the province the King's arms, richly gilded. A cupola and given the fortress up to the regulars. surmounted the roof. In front of the They also complained of the unusual num-

were about twenty stone steps. The King's arms are in possession of the Massachusetts Historical Society. Hutchinson died in Brompton, near London, June 3, 1780.

Hutchinson took a seat in Governor Bernard's council, January, 1767, where he had no right. The Massachusetts Assembly resented this usurpation, this "lust of power," in intruding into an elective body to which he had not been chosen. The council, by unanimous vote, denied the pretensions of the intruder, for the language of the charter was too clear to admit of a doubt; yet Bernard urged the interposition of the British government to keep him there. This conduct of the crown officers greatly irritated the people.

When, in May, 1770, he called a meeting of the Assembly at Cambridge, that body insisted that, by the terms of the charter, the general court could only be held at Boston. A dispute arose that consumed much of the time of two sessions, and it was October before the Assembly would agree to proceed with needed business, and then under protest, after a day spent in solemn humiliation and prayer. Then they made a bitter complaint against the governor because he had withdrawn from the castle in Boston Harbor

beneficial to a great number of particular merchants. And the first suggestion of a design in the ministry to enlarge the revenue, and to habituate the colonies to parliamentary taxes, was made from England; and opposition to the measure was recommended, with an intimation that it was expected that the tea would not be suffered to be landed. The committees of correspondence in the several colonies soon availed themselves of so favorable an opportunity for promoting their great purpose. It soon appeared to be their general determination that, at all events, the tea should be sent back to England in the ships which brought it. The first motions were at Philadelphia, where, at a meeting of the people, every man who should be concerned in unlading, receiving, or vending the tea was pronounced an enemy to his country. This was one of the eight resolves passed at the meeting.

The example was soon followed at Boston. The people were summoned, by notifications posted in different quarters, to meet at the tree of liberty, to hear the resignation of the consignees of the tea, which was then daily expected. The consignees also, by a letter left at one of their houses, were required to attend at the same time at their peril. The people met, but, the consignees not appearing, a committee was appointed to acquaint them at one of their warehouses where they had met that, as they had neglected to attend, the people thought themselves warranted to consider them as their enemies. They treated the message with contempt, and the people, many of whom had followed the committee, forced open the doors of the warehouse, and attempted to enter a room in which the consignees, with some of their friends, were shut up; but, meeting with resistance, they soon after dispersed, and the body of the people who remained at the tree, upon the return of their committee, dispersed also. This seems to have been intended only as an intimation to the consignees of what they had to expect. Two days after, what was called a "legal" meeting of the protect the persons of the consignees or inhabitants was held in Faneuil Hall. the property under their care. He con-Here the resolves which had been passed sidered that, if the ships came into the by the people of Philadelphia were first harbor above the castle, they could not adopted; and then a further resolve pass by it again without a permit under

a branch of commerce which had been passed that the inhabitants of the town, by all means in their power, will prevent the sale of the teas exported by the East India Company, and that they justly expect no merchant will, on any pretence whatever, import any tea liable to the duty. Committees were also appointed to wait on the several persons to whom the teas were consigned, and in the name of the town to request them, from a regard to their characters, and to the peace and good order of the town, immediately to resign their trust. Each of the consignees gave an answer of the same import, that, as they were not yet acquainted with the terms upon which the teas were consigned to them, they were not able to give a definite answer to the request of the town. 'The answers were all voted to be daringly affrontive to the town, and the meeting was immediately after dissolved.

Three vessels were expected every hour with the teas. The consignees were afraid of exposing themselves and their bondsmen to damages, which might arise from a refusal or neglect to execute their trust; on the other hand, they were anxiously concerned for their personal safety, and made their application to the govern-He foresaw that this would prove or. a more difficult affair than any which had preceded it since he had been in the chair. The controversies with the council and house had a tendency to deprive him of the esteem and favor of the people; but he had not been apprehensive of injury to his person. He was now to encounter with bodies of the people collected together, and a great proportion of them the lowest part of the people, from whom, when there is no power to restrain them, acts of violence are to be expected. He knew that the council would give him no aid. A man of the most influence among them had said to him that he was of opinion, instead of any attempts to suppress the motions of the people, it was more advisable to recommend to the consignees to reship the tea to England. He had no expectations of being able to

anchoring without the castle, and their waiting for orders; and this advice was approved of by the consignees, and by the owner of the ship first expected, if not by the owners of the other ships; and orders were given to the pilots accordingly.

The consignees of the tea, when they

* "Friends! brethren! countrymen!-That worst of plagues, the detested tea, shipped for this port by the East India Company, is now arrived in this harbor—the hour of destruction of manly opposition to the machinations of tyranny stare you in the face. Every friend to his country, to himself, and posterity, is now called upon to meet at Faneuil Hall, at nine o'clock this day, at which time the bells will ring, to make an united and successful resistance to this last, on Sunday one of the ships with the tea ministration."

to make sale of any part of it, until they usurpers. could receive directions from their prinhe was sent for by this committee; and, cause the ship to be brought up to town, and to a particular wharf, where it had The consignees of the tea, judging themselves no longer in a place of safety, withdrew to the castle.

The people assembled in Boston took the name of "the body" instead of a "legal town-meeting," and began with that spirit with which all established powers ought to act in the exercise of their legal constitutional authority. They resolved that, "at all events," the tea arrived in charge of Captain Hall should be returned to the place from whence it came, and that no duty should be paid upon it. They then adjourned to the afternoon, to give time for the consignees to deliberate. As soon as they reassembled, they resolved that the tea should be sent back in the same bottom in which it came. To this resolve the owner of the vessel, who was present in the meeting, said he must enter a protest. It was thereupon resolved that Mr. Rotch, the owner, be directed not to enter the tea, and Captain Hall, the master, not to suffer any of it to be landed, at their peril. They did not stop at mere declaratory acts or naked resolves. This, they knew, would render future acts and resolves contemptible. They established a watch of twenty-five inhabitants for securing the ship and cargo, and appointed a captain for the night.

It being intimated that the consignees, if they had time, would make their proposals to the body, "out of great tenderness to them, and from a strong desire to bring this matter to a conclusion, notwithstanding the time they had hitherto expended on them, to no purpose." the meeting was prevailed with to adjourn to the next morning.

The governor, seeing the powers of gov-

saw no prospects of protection from gov- erment thus taken out of the hands of the ernment, made proposals to Mr. Adams, legally established authority, could not and others, a standing committee of the justify a total silence, though he knew he town, for securing the tea, and forbearing could say nothing which would check the He sent the sheriff with a proclamation, to be read in the meeting, cipals; but no proposals were hearkened bearing testimony against it as an unlawto. And, as soon as the master of the ful assembly, and requiring the moderator ship which brought the tea came on shore, and the people present forthwith to separate at their peril. The sheriff desired after examination, both the master and leave to read the directions he had received owner were required, at their peril, to from the governor, which was granted; but the reading of the proclamation was opposed, until Mr. Adams signified his acquinot been customary for ships from London escence. Being read, a general hiss followed, and then a question whether they would surcease all further proceedings as the governor required, which was determined in the negative, nemine contradicente.

> The consignees, in a letter to the selectmen of Boston, which was read to the meeting, signified that it was utterly out of their power to send the tea back to England, but they would engage to keep it in a store until they could receive further directions from England, to which they afterwards added that they would be content to have it under the constant inspection of a committee, to be appointed by the town. But all was declared not in the least degree satisfactory, and that nothing short of sending back the tea would be so. The owner and master of the ship were directed to attend the "body"; and a vote passed, while they were present, without a negative, "that it is the firm resolution of the body that the owner shall return the tea in the same vessel in which it came, and that they now require it of him." The owner promised to comply, but intimated that it was by compulsion, and that he should be obliged to protest, to save himself from damage. The master also promised to carry it back. The factors for the two other vessels expected were sent for, and, being informed of the engagements made by the owner and master of the ship arrived, they also made such engagements as were satisfactory; and, after making provision for the continuance of a watch. so long as the tea continued in the harbor, and for an alarm to the inhabitants upon any molestation, they passed a resolve "that if any person, or persons,

shall hereafter import tea from Great Britain, or if any master, or masters, of quired at the castle, for all vessels exany vessel, or vessels, in Great Britain, cept small coasters, and there were sevshall take the same on board to be im- eral men-of-war in the harbor, which ported to this place, until the unrighteous it was supposed would stop the ship act (mentioned in the preamble to the refrom proceeding any other way, the desolve) shall be repealed, he, or they, shall struction of the tea was considered as be deemed, by this body, an enemy to his recessary to prevent payment of the duty. country; and we will prevent the landing A demand was made from the collector, and sale of the same, and the payment in form, of a clearance for the ship, which of any duty thereon, and will effect the he could not grant until the goods which return thereof to the place from whence were imported, and regularly entered, it shall come." Copies of this resolve were landed, and the duties paid, or sewere ordered to be sent to England and cured; and the like demand of a permit to the seaport towns in the province.

resolves into execution at the risk of their dissolved.

ous in this body than in any of the former assemblies of the people. It was superior ranks and orders, and all had an tional difficulties. Another meeting of equal voice. No eccentric or irregular the body was, therefore, called, in order motions, however, were suffered to take to inquire the reason of the delay in place. All seemed to have been the plan sending the ship back to England. The of a "legal" meeting of any town.

Immediately after the dissolution of this body the committees of correspondence of the towns of Boston, Roxbury, Dorchester, Brookline, and Cambridge united, and held their meetings daily, or by short adjournments, in Faneuil Hall, or one of the rooms belonging to it, and gave such directions as they thought proper. Two of the other vessels with tea arriving from London, they were ordered by this new body to the same wharf where the first ship lay, under pretence of the conveniency of having the whole under one guard. It soon after appeared that a further conveniency accompanied it.*

* Two days after the dissolution of the body the following publication was posted in different parts of the town, and printed in the newspapers. It might be the act of a single person unknown, but in such a time

As a permit or pass was always rewas made of the naval officer, with whom A resolve passed to carry the votes and blank permits were intrusted by the governor, to be filled up, and delivered to lives and properties; and the meeting was such vessels only as had been cleared at the custom-house, and, therefore, in this A more determined spirit was conspicu- case was refused. bent of the people.

The military authority, which by charter was given to the governor, had been assumed by this body of the people, who appointed guards and officers, which appeared sometimes with fire-arms, though generally without them. And, when he required the colonel of the regiment of militia in the town to use the powers with which by law he was intrusted, he excused himself by urging the hazard to which he should be exposed and the inefficacy of any attempt.

Even the declarations of the governor against the unlawful invasions of the people upon the authority of government were charged against him as officious, unnecessary acts, and were made to serve to inflame the people and increase disorders. He considered the intimations given him tance; something might intervene to diof personal danger as part of the general plan for discouraging him from persevering in his duty; but, in some instances of a serious appearance, he could not take any measures for his security, without the charge of needless precaution, in order to bring an odium against the people, when they meant him no harm.

up some show of authority, and caused a had taken any new measures, or appeared council to be summoned to meet at Boston to be inclined to them, tending, or which the day after the destruction of the tea, might be improved, to irritate and disturb and went to town himself to be present the people. The people, he said, There was not a justice of peace, sheriff, had taken the powers of government into observed that, having done everything else in their power to prevent the tea from being landed, and all to no purpose, they had been driven to the necessity of destroying it, as a less evil than submission to the duty. So many of the actors and abettors were universally known that a proclamation, with a reward for discovery, would have been ridiculed. The attorney-general, therefore, was ordered to lay the matter before the grand jury, who, there was no room to expect, would ever find a bill for what they did not consider as an offence.

This was the boldest stroke which had yet been struck in America. The people in all parts of the province showed more or less concern at the expected consequences. They were, however, at a disvert them. Besides, the thing was done: there was no way of nullifying it. Their leaders feared no consequences. To engage the people in some desperate measure had long been their plan. They never discovered more concern than when the people were quiet upon the repeal of an act of Parliament, or upon concessions Notwithstanding the forlorn state he made, or assurances given; and never was in, he thought it necessary to keep more satisfaction than when government Great pains had been ain, their offences, long since, had been of tions they had met with, which finally upon attaining to the object which first brought on the loss of the tea, were owing engaged them. To what extent has this been actually accomplished?

A very marked and, it must also be said, a most unusual case is reported in the Annales Medico-Psychologiques, and has been verified and summarized by Mr. F. W. H. Myers, secretary of the Society for Psychical Research.

Still further condensed, it is as follows:

shown by the facility with which the notize her at a time when she could be hypnotized subject may be influenced, and kept quiet only by the strait-jacket and the wonderful effect, physical, mental, and the continuous cold douche to the head. moral, which suggestion properly applied She would not look at the operator, but

Two years later M. Voisin wrote suggestion while in the hypnotic con- that she was a nurse in a Paris hospital and that her conduct was irreproach-

> This is an unusual but by no means a unique case. M. Voisin has reported oth-Here, then, we come ers equally striking; and M. Dufour, medical director of another asylum, has also found hynotism "able to render important service in the treatment of mental disease," and has adopted it as a regular and important factor in its cure.

I mention these cases not as being the most practical in character, but as showing the power for good of hypnotic treatment in some cases of a most unpromising class. The class to which I would especially call attention is the one embracing mental deficiencies, evil habits, and vicious tendencies, exhibited especially in childhood and youth. Under the head of mental deficiencies may be mentioned dulness of perception, imperfect In the summer of 1884 there was at the power of attention, deficient memory, and Salpetrière a young woman of a deplor- general inaptitude for acquiring knowlable type—a criminal lunatic, filthy in edge; under evil habits may be mentioned habits and violent in demeanor, and with personal uncleanliness, biting the nails, a life-long history of impurity and theft. idleness, cowardice, the tobacco, opium, M.
